What We Do

HIMSS Asia Pacific Membership

HIMSS members have access to key insights, best practices, education, and each other - to improve the delivery of care. There are 3 main tiers of HIMSS Membership – Individual, Organizational Affiliate and Corporate. Your membership dues contribute to the education, resources, and thought leadership necessary to drive your career and our industry forward.

HIMSS Asia Pacific Education

Being a HIMSS member makes it easier for you to gain access and take advantage of the great content delivered by industry experts and thought leaders. With exclusive educational articles, webinars and many more, we provide the tools, resources and support for you to stay current in the rapidly evolving field of health IT.

HIMSS Asia Pacific Communities

The HIMSS Asia Pacific Communities are tailored to bring together healthcare IT professionals in the same community to encourage problem solving, solution sharing, education and networking opportunities at the highest level.

HIMSS Asia Pacific Conferences

HIMSS Asia Pacific conferences are devoted to bringing together world class speakers, exceptional education sessions and cutting edge health IT products and solutions. Join us at our conferences to learn, discuss and share practical implications and real world solutions to enhance healthcare in your organization and country.

HIMSS Asia Pacific Media

Started in May 2015, the HIMSS Asia Pacific Media is your go-to resource bank on healthcare informatics. Providing exclusive articles, guest interviews, videos, podcasts, webinar reviews, press releases and whitepapers and social media tidbits. The aim of HIMSS Asia Pacific media is to provide education and timely knowledge to APAC communities.

What happened at the 2016 Community Roadshows:

130+ Senior attendees from over 60 unique healthcare organizations attended our 2016 community roadshows. Read the full article at http://www.himssasiapac.org/content-library/thematic-reports

"The HIMSS Manila roadshow was a great prelude to the Bangkok conference. It was an intimate gathering that emphasised the necessity and great potential for cooperation and sharing in the AsiaPac Health Informatics sphere"

Dr. Juan Antonio Javellana, MD., Medical Informatics, Asian Hospital and Medical Center, Philippines

"The HIMSS Bangkok roadshow clearly reflected HIMSS's position as a thought leader in the domain of healthcare IT. As a local stakeholder, I gained much insight into what leading hospitals in the region are doing and as a technology provider, Medicomp networked with many senior stakeholders."

Piyanun Yenjit, Operation Director Medicomp Systems,Thailand

"I have been in the field of health informatics for more than 30 years. With the current state of technologies and the emergence of innovations to help patients manage their care better, I'm feeling excited all over again!"

Dr. Jai Mohan, Professor of Health Informatics & Paediatrics, International Medical University, Malaysia

"The HIMSS Bangkok roadshow gave me ideas to integrate digital technologies into patient-centered approaches. Shared experiences from top healthcare leaders in the region is very useful to learn how they achieve advanced digital & patient-centered care."

Dr. Narinthorn Surasinthorn, Assistant Hospital Director, Samitivej Sukhumvit Hospital,Thailand

A HIMSS ASIA PACIFIC EXCLUSIVE ARTICLE

Advancing Digital and Patient-Centered Care Requires Competent Clinicians and Informatics Professionals

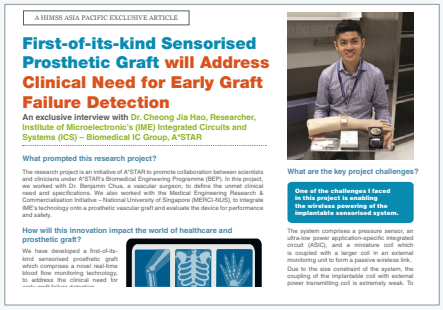
Dr. William Hersh, Professor and Chair, Department of Medical Informatics & Clinical Epidemiology (DMICE), Oregon Health & Science University, USA

Dr. William Hersh will be giving the opening keynote session on 25 August @ 9am.

In the US, at what level generally is clinician and informatics professional competency? And where are the gaps?

Clinicians in the US for the most part have basic computer literacy and they are gaining applied informatics skills. A large majority of physicians and nurses use electronic health records, even if the systems have usability and workflow challenges. They

3 key takeaways that HIMSS AsiaPac16 attendees will receive from William Hersh's presentation:



A HIMSS ASIA PACIFIC EXCLUSIVE ARTICLE

First-of-its-kind Sensorised Prosthetic Graft will Address Clinical Need for Early Graft Failure Detection

An exclusive interview with Dr. Cheong Jia Hao, Researcher, Institute of Microelectronic's (IME) Integrated Circuits and Systems (ICS) – Biomedical IC Group, A*STAR

What prompted this research project?

The research project is an initiative of A*STAR to promote collaboration between scientists and clinicians under A*STAR's Biomedical Engineering Programme (BEP). In this project, we worked with Dr. Benjamin Chua, a vascular surgeon, to define the unmet clinical need and specifications. We also worked with the Medical Engineering Research & Commercialisation Initiative – National University of Singapore (MERCI-NUS), to integrate IME's technology onto a prosthetic vascular graft and evaluate the device for performance and safety.

How will this innovation impact the world of healthcare and prosthetic graft?

We have developed a first-of-its-kind sensorised prosthetic graft which comprises a novel real-time blood flow monitoring technology, to address the clinical need for

What are the key project challenges?

One of the challenges I faced in this project is enabling the wireless powering of the implantable sensorised system.

The system comprises a pressure sensor, an ultra-low power application-specific integrated circuit (ASIC), and a miniature coil which is coupled with a larger coil in an external monitoring unit to form a passive wireless link. Due to the size constraint of the system, the coupling of the implantable coil with external power transmitting coil is extremely weak. To

HIMSS Asia Pacific Roadshows

Manila, Kuala Lumpur and Bangkok Pre-Conference Roadshows 2016

HIMSS Asia Pacific has taken its pre-conference roadshows to Manila, KL, and Bangkok this year.

The Manila and KL roadshows ran on 24 May and 26 May respectively. Bangkok, the exciting city where HIMSS AsiaPac16 will be held later this August, hosted the final roadshow on 16 June.

What were the key messages shared to prepare audiences for the upcoming annual event?

This report contains:

1. Key takeaways from Manila and KL roadshows
2. In-depth review of Bangkok roadshow panel discussions

Key Takeaways from Manila (24 May 2016) and KL (26 May 2016)

At the Manila and Kuala Lumpur stops, we saw the following line-up:

Clinical Decision Support Systems – A Solution to Medication Errors?

Jae-Ho Lee, MD., PhD.
Chief, Department of Biomedical Informatics, Asan Medical Center, Seoul, South Korea

Medication errors are known to cause high mortality and morbidity. In the United States, 7,000 patients die annually from medication errors [1]. Pediatric and geriatric patients are more susceptible to this type of error. Computerized order entry (CPOE) and clinical decision support system (CDSS) can be a solution to this type of error by alerting dose error, drug-drug interactions, and drug-allergy interaction, monitoring adverse drug events (ADEs), and providing decision-making based on clinical practice guidelines. Several CDSS projects have reduced ADEs, decreased medication error rates, and reduced cost.

INTEROPERABILITY AND HEALTH JOURNEY

Overcoming Barriers to Interprofessional Collaboration with Information Technology to Create Better Interoperability and Quality in Care

Ms. Michelle Troseth, Chief Professional Practice Officer, Elsevier Clinical Solutions won the Nursing Informatics Leadership Award at HIMSS14. As a nurse leader, Michelle shares about key barriers to inter professional collaboration, how information technology can help achieve this collaboration for better interoperability and quality in care as well as how up and coming technologies can improve the patient health journey.

The article will provide insights into:

01 What the key barriers are to interprofessional collaboration

02 Overcoming these barriers through information technology so that better interoperability and quality in care can be achieved

HIMSS Asia Pacific Education

Webinars

Our monthly webinars are focused on a specific theme and are led by esteemed thought leaders in the field. The themes are specially curated to suit your learning needs. Expect interactive learning on trending HIT topics anytime and anywhere you are, and utilize lessons learnt to add value to your career and organization.

HIMSS Asia Pacific Members Resource Library

Unable to attend our webinar sessions and community events? The HIMSS Asia Pacific Members Resource Library gives members unlimited access to past conference presentations, webinar recordings, seminar materials and exclusive reports to help you keep up with the latest HIT happenings in our region, at your convenience.

HIMSS Learning Center

Stay current in Health IT with The Learning Center. Experience the rich platform of HIMSS conferences, webinars virtual events, online courses, and more. Gain valuable knowledge to help you navigate in a rapidly changing healthcare market. You're in charge, and you have the flexibly to learn at work, at school or in your living room. Visit HIMSSLEARN.ORG

TIGER Virtual Learning Environment (VLE)

TIGER (Technology Informatics Guiding Education Reform) VLE is a unique one stop education portal. TIGER VLE contains resources which enables the interprofessional clinical workforce to use informatics and emerging technologies to improve patient care. Be it academic or clinical, TIGER VLE is designed to expand your skill sets by providing a personalized learning experience in a self-paced format from basic to advanced levels.

Professional Development Certification

Take advantage of professional development certifications to set yourself apart from other HIT professionals. At HIMSS, we provide you the footpath to expanding your career opportunities in the HIT marketplace and gain skills to help you make a difference in your organization and community. Get CPHIMS certified today.

"The webinars provide me with the opportunity to hear from industry leaders and practitioners on the latest trends and challenges in healthcare IT. It's also extremely convenient to attend such interactive webinars at the comfort of your home or wherever you are with an internet access. I highly recommend this to all healthcare IT professionals to remain up to date on health IT matters."

Benjamin Mah, Manager of Applications/IT, Integrated Health Information Systems (IHiS)

HIMSS AsiaPac17

11 – 14 September 2017, Marina Bay Sands, Singapore

Population Health
Collaborative Care
Data and Technology
Value-Based Care

TEAM-BASED CARE:
Unifying Patients and Providers

PRE-CONFERENCE DAY:
11 SEPTEMBER

MAIN CONFERENCE AND EXHIBITION:
12 - 13 SEPTEMBER

POST-CONFERENCE DAY:
14 SEPTEMBER

Team-based care is the antidote to fragmented health care. It brings multidisciplinary healthcare providers together, working collaboratively alongside patients and caregivers to achieve optimal outcomes and care experiences.

Coupling team-based care with information technology and advanced analytics maturity, the needs of our patient population throughout the continuum of care can then be sustainably enhanced.

At HIMSS AsiaPac17 in Singapore, expect to learn, share and discuss insights on team-based care that will benefit your patients, care team and organization both clinically and operationally.

MAIN CONFERENCE TRACKS:

Population Health
Health information technology at present has gone beyond just managing a patient's medical records and improving the quality of care - it is now the enabler for population health management. Through a team-based care approach, both patients and multidisciplinary providers will be further empowered to build a healthier community together.

Collaborative Care
As the future of healthcare shapes into one with multiple care models to provide the right care to the right patient in the right setting, the seamless exchange of information and communication amongst the care team and patients are key to the successful delivery of collaborative care.

Data and Technology
The reach of technological innovation and data has grown exponentially, impacting the way care is received and delivered. New technology and innovations are necessary to keep up with the increasing demands of both patients and providers. Together with data, healthcare technologies are bound to make a break through, empowering care teams to achieve even better outcomes and care experiences.

Value-Based Care
Healthcare systems all around the world are struggling with rising costs to overcome the growing challenges and the increase in healthcare spending does not necessarily translate to better outcomes for patients. To achieve the best outcomes at the lowest cost, value based care replaces today's fragmented healthcare system by moving away from a supply driven system to a patient centered system.

Nursing
Nurses are often the first point of contact for patients and their caregivers. Being at the frontline, they work in an information intensive environment. Similar to nurses, information technology is the foundation of our future healthcare. When these two segments intersect, nurses are better equipped to develop efficient processes and provide exceptional care.

HIMSS ASIA PACIFIC MEMBERS SPEAK

"New Zealand has a fast growing and vibrant digital health community. We see this collaboration between HiNZ and HIMSS as a key step in building stronger networks between our members and the international experts in digital health."

Kim Mundell,
Chief Executive,
Health Informatics New Zealand (HiNZ)

"Bumrungrad International strongly advocates the use of healthcare information technology to improve the lives of our patients from around the world. As an Organizational Affiliate of HIMSS Asia Pacific, we stand together with HIMSS in providing leadership for Thailand and the region."

Dr. James Miser,
CMIO, Bumrungrad International

"Our collaboration with HIMSS Asia Pacific has enabled us to touch base regularly with stakeholders in the Asia Pacific region, and has helped us to directly connect with them to advise on solutions and HIT plans."

Dianne Gruneklee
Regional Marketing Manager - APAC
Hyland, creator of OnBase ®

"HIMSS membership has given us access to exclusive opportunities to further our knowledge of healthcare systems and technology . We believe this partnership helps us advance the use of information technology in our hospital, to help us deliver the best care for patients and caregivers, and benefit our staff as well."

Dr. Goh Min Liong,
CMIO, Changi General Hospital, Singapore

"Paknampo hospital is the first in Thailand to achieve HIMSS Analytics EMRAM Stage 6 on its Clinical Transformation roadmap. HIMSS played a significant role in supporting this transformation, and we are proud to continue our collaboration as an organizational affiliate."

Asst. Prof. Korpong Rookkapan, MD
Hospital Director
Paknampo Hospital

"In 2014, the Asian Hospital and Medical Center was searching for a roadmap that we can follow on our journey to adopt electronic medical records. We came to learn about HIMSS Asia Pacific and the EMRAM and we were convinced that this was the benchmark we wanted. Through these two years of partnership, the EMRAM has given us a structured path to approach the digitalization of our healthcare system. HIMSS has also been a great place to meet the people who will help and guide us to our digital goals."

Dr. Juan Antonio Javellana, MD,
Director, Medical Informatics, Asian Hospital and Medical Center

HIMSS Asia Pacific

HIMSS is a global voice, advisor and thought leader of health transformation through health IT with a unique breadth and depth of expertise and capabilities to improve the quality, safety, and efficiency of health, healthcare and care outcomes. HIMSS designs and leverages key data assets, predictive models and tools to advise global leaders, stakeholders and influencers of best practices in health IT, so they have the right information at the point of decision.

Through its health IT network of over 1 million experts, over 200 knowledge exchanges and collaborations, including 60,000-plus members, HIMSS drives innovative, forward thinking around best uses of technology in support of better connected care, improved population health and low cost of care.

HIMSS is a not-for-profit, headquartered in Chicago, Illinois with additional offices in North America, Europe, United Kingdom and Asia.

We welcome contributions.
