Nokia Software Defined Access Networks

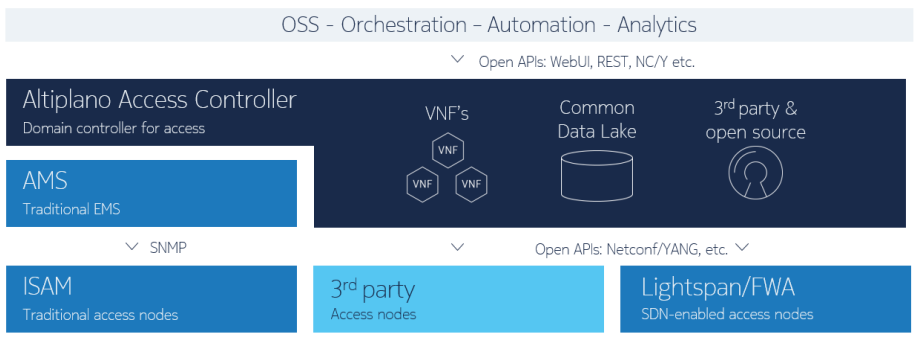
Solutions to grow your business

Key changes in the access industry

- Broadband traffic grows more than 10x faster
- Convergence at the edge for improved network performance
- Agility to cater to the quickly changing needs
- Automation, Automation, Automation …

Our approach to tackle these changes

- E2E SDN solutions for any deployment scenario
- Migration to SDN at your own pace, where and when needed
- Pre-defined solution blueprints
- Managed by a domain controller providing open northbound and southbound interfaces to integrate across vendor domains



Nokia SDAN provides a lot of benefits
