Biography

Brad Tapley is the Site Supply Chain Supervisor at Plant Vogtle Nuclear Plant supporting both operational and construction. Prior to coming to Plant Vogtle, Brad supported Plant Hatch as a SR Sourcing Specialist. He also brings 6+ years of On Shift Nuclear Operations experience and training. Prior to joining the Nuclear Industry, Brad worked in the manufacturing field at JCB North America and Trane Residential Systems. He obtained an Industrial Management degree from Georgia Southern University in 2006 and is currently pursuing his Masters in Integrated Supply Chain Management from the University of Wisconsin-Platteville. In his spare time Brad enjoys hunting, fishing and traveling with his family. Brad and his wife Kelli live in Evans, Georgia along with their two kids Tenley (6) and Briggs (3).

Abstract

This year's Technical Session will provide relevant updates from some of the most active Industry Organizations. Topics will include: Regulatory Compliance, Supply Chain impacts from decommissioning a fossil unit, Generation and Transmission Critical Spare management, Renewables and Solar. This session will identify and explain the impacts on Supply Chain Organizations. This information will be beneficial to share with your organization!
