Conference Theme

Pinpointing the value and impact of health information and technology is complex. **Value is demonstrated in many ways and providers arrive at value differently.** While we have, without a doubt, passed a tipping point and it is widely understood now that IT can create value, there is still a catch: this is not automatic.

HIMSS AsiaPac19 will offer global best practice for you and your organization to plan for, implement and commit to creating quantifiable and sustainable value-based care for your patients and consumers.

Thematic Tracks

Sustainability & Growth

Reinvent business models, transform infrastructure and supply chains, and innovate to create value-added services.

Track topics include:

- Operation & cost-efficiency
- Infrastructure
- Supply chain
- Revenue cycle management

Patient Experience

Learn to embrace a consumer-centric ecosystem and value-add to the empowered, engaged and smart consumer.

Track topics include:

- Patient engagement
- Aged care and chronic disease management
- Personal wellness
- Privacy & security

Unlocking the Value of AI

Step into the future with the transformative forces of AI and data. Think predictive, preventive, intelligent and high-value care delivery.

Track topics include:

- Imaging analytics
- Preventive care
- Robotics & virtual nursing
- Cybersecurity

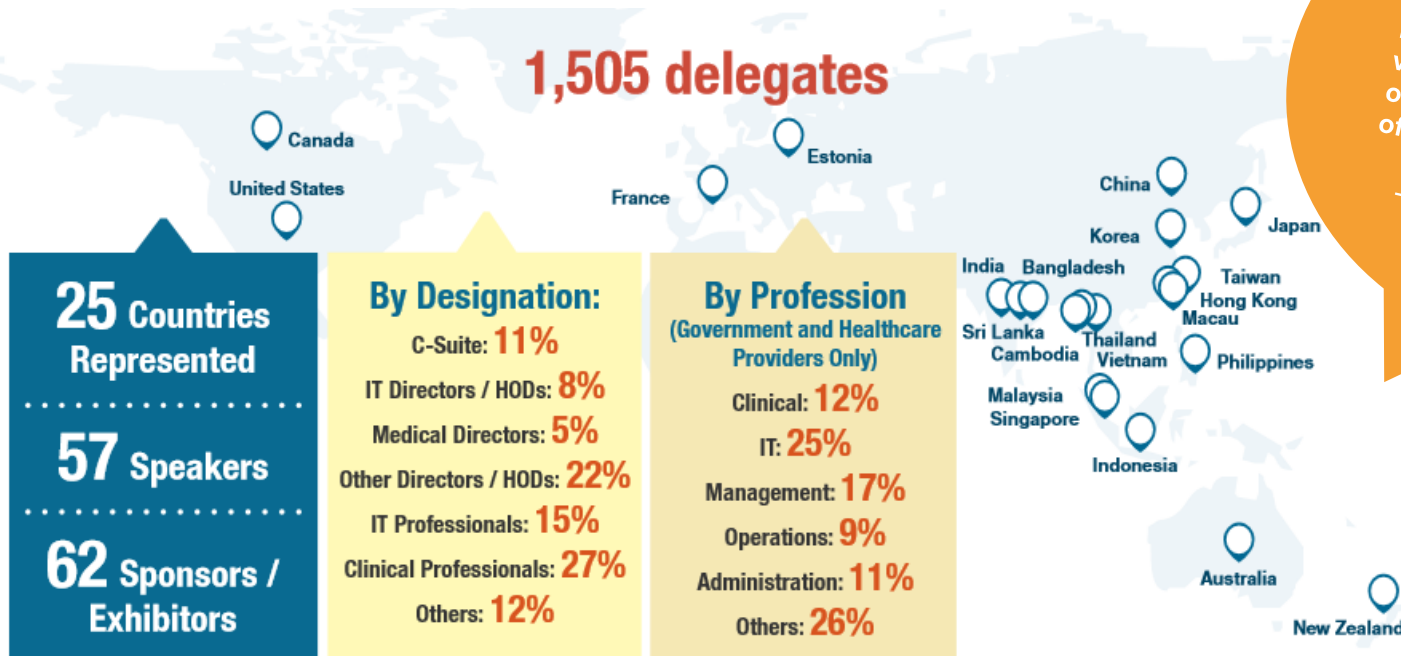

Value-Based Care

Redefine quality, improve processes, demonstrate evidence and showcase the value that is created with health IT.

Track topics include:

- Payers & providers
- Population health
- Patient outcome
- Next-gen revenue cycle

Statistics from HIMSS AsiaPac16 Bangkok
