

## **2018 Meeting**

***Crowne Plaza Indianapolis Downtown Union Station, Indianapolis, IN***

### ***APTA Clinical Practice Guideline for Instrumented Gait Analysis***

#### ***Purpose***

The Academy of Pediatric Physical Therapy of the American Physical Therapy Association is sponsoring the development of a clinical practice guideline on the use of instrumented gait analysis for children with gait and movement disorders. For the guideline to be relevant, it is imperative that all stakeholders provide input and feedback. The aim of this presentation is to introduce GCMAS members to the purpose of the clinical practice guideline, the process that will be used to develop the guideline, and how GCMAS members can contribute to that process.

#### ***Presenters***

Amy Winter Bodkin, PT, PhD, PCS
