

What We Do

HIMSS Asia Pacific Membership

HIMSS members have access to key insights, best practices, education, and each other - to improve the delivery of care. There are 3 main tiers of HIMSS Membership – Individual, Organizational Affiliate and Corporate. Your membership dues contribute to the education, resources, and thought leadership necessary to drive your career and our industry forward.

HIMSS Asia Pacific Communities

The HIMSS Asia Pacific Communities are tailored to bring together healthcare IT professionals in the same community to encourage problem solving, solution sharing, education and networking opportunities at the highest level.

HIMSS Asia Pacific Media

Started in May 2015, the HIMSS Asia Pacific Media is your go-to resource bank on healthcare informatics. Providing exclusive articles, guest interviews, videos, podcasts, webinar reviews, press releases and whitepapers and social media tidbits. The aim of HIMSS Asia Pacific media is to provide education and timely knowledge to APAC communities.

HIMSS Asia Pacific Education

Being a HIMSS member makes it easier for you to gain access and take advantage of the great content delivered by industry experts and thought leaders. With exclusive educational articles, webinars and many more, we provide the tools, resources and support for you to stay current in the rapidly evolving field of health IT.

HIMSS Asia Pacific Conferences

HIMSS Asia Pacific conferences are devoted to bringing together world class speakers, exceptional education sessions and cutting edge health IT products and solutions. Join us at our conferences to learn, discuss and share practical implications and real world solutions to enhance healthcare in your organization and country.

HIMSS Asia Pacific Communities

The HIMSS Asia Pacific Communities is set up with the objective of encouraging knowledge exchange through a community platform to access innovative cutting-edge technologies, networking opportunities and educational resources. Each national community will be led by a Community Committee.

National Committee

HIMSS Asia Pacific National Committee is a dedicated and committed group of industry experts to drive the country's Health IT community forward through the use of healthcare IT and management systems.

In addition, the Committee will provide advice, content expertise and drive HIMSS Community events for the country. The Committee will help focus efforts in the country on our worldwide goal of transforming health through IT.

Meet your community committee chairpersons:

Dr. Ryan Bañez
Chief Medical Informatics
Officer, Health Informatics Inc.

Dr. Somsak Wankijcharoen
Chief Information Officer
Bangkok Hospital

Adj. A/Prof. Gamaliel Tan
Chief Medical Informatics
Officer, Head of Orthopaedics,
Jurong Health Services

Dr. Kevin Awyong
Deputy Chief Medical
Informatics Officer, Deputy
Director, Medical Informatics,
Jurong Health Services

Community Events

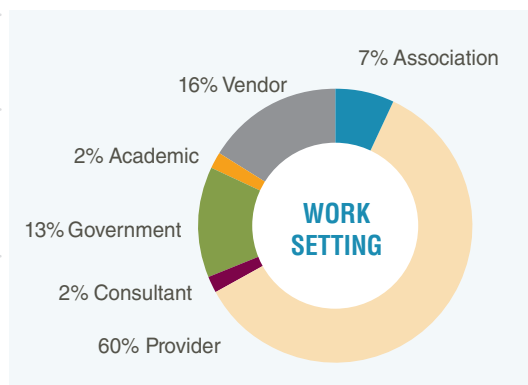

Previously known as Roadshows, our community events bring key topics to regional communities. They provide a targeted group of audience the face to face opportunity to learn from keynote speakers, exchange ideas, and network. All within the comforts of their home cities.

130+ Senior attendees

Over 60 unique
healthcare organizations

Percentage of decision
makers = **52.2%**

"The HIMSS Bangkok roadshow clearly reflected HIMSS's position as a thought leader in the domain of healthcare IT. As a local stakeholder, I gained much insight into what leading hospitals in the region are doing and as a technology provider, Medicomp networked with many senior stakeholders."

Piyanun Yenjit, Operation Director, Medicomp Systems, Thailand

Be a committee member today. Contact Joannas Yeow at jyeow@himss.org or +65 9837 8407 for more information.

Showcase your Thought Leadership through Content. Media Opportunities include:

HIMSS Leadership Series	Bite-Sized Social Media Content	Guest Interviews
HIMSS Asia Pacific Digest (online) and The Best of HIMSS Asia Pacific Digest (print)	Exclusive Articles	Whitepapers, Thematic Reports and Press Releases
		Infographics

A HIMSS ASIA PACIFIC EXCLUSIVE ARTICLE

Spok on mHealth

HIMSS Asia Pacific spoke with our Gold Corporate Member Spok about all things mHealth, from the evolution of technology to drivers in the mHealth market. Now, we're looking to improve healthcare outcomes and what the future holds for this space. John Jordan, Spok's Regional Vice President of Sales for Asia Pacific tells us what's ahead of the curve.

How has healthcare technology evolved in the past 10 years? What are the biggest barriers with regards to the use of technology?

How do mHealth technologies improve healthcare outcomes? Specifically from the perspectives of:

- Healthcare Providers**
- Patients**

MONTHLY HIMSS Asia Pacific

The Internet of Things (IoT) has long been a buzzword in the consumer world. From smartwatches to smart cars, IoT is making its way into our lives. More recently, IoT is beginning to make its mark in the highly regulated healthcare sector. In a recent issue, articles published by Forrester on April 23, it is estimated that there will be a \$117 billion market for Internet of Things in Healthcare by 2020. We speak with Dr. Clive Gold, Director of Strategic Initiatives and Challenges in driving an IoT healthcare in the Asia-Pacific region, as well as the latest trends for healthcare professionals to embrace technologies in order to better serve their patients and improve healthcare delivery outcomes.

Latest Announcement from HIMSS Asia Pacific

We are very honoured to have the Ministry of Health Singapore as a supporting organization of HIMSSAsiaPacific.

Minister for Health, Mr. Gan Kim Yong will be giving the opening address on 7 September.

Find out more about the event here: www.himssasiaspacific.org/15

Healthcare IT News from Around the World

4 Questions Answered by Mr. Clive Gold
EMC's Healthcare Director

Clive, what is the value of IoT in the Asian healthcare sector?

The Asian healthcare sector faces many unique challenges. From a wide population density variation, to some of the most disaster-prone environments, being established by the effects of climate change, and

Clinical Decision Support Systems – A Solution to Medication Errors?

Jae-Ho Lee, MD, PhD
Chief, Department of Biomedical Informatics, Asan Medical Center, Seoul, South Korea

Medication errors are known to cause high mortality and morbidity. In the United States, 7,000 patients die annually from medication errors. Medication errors generally occur as a result of human factors, such as lack of communication, lack of knowledge, and lack of resources. Clinical Decision Support Systems (CDSS) can help to reduce the risk of medication errors by providing decision support to healthcare providers. CDSS can help to reduce medication errors by providing decision support to healthcare providers. CDSS can help to reduce medication errors by providing decision support to healthcare providers.

HIMSS Asia Pacific Digest

July 2015 Issue

MONTHLY

This month, it's all about: **INTEROPERABILITY AND HEALTH JOURNEY**

Overcoming Barriers to Interprofessional Collaboration with Information Technology to Create Better Interoperability and Quality in Care

Mr. Michelle Towner, Chief Professional Practice Officer, Clinician Clinical Solutions was the featured interviewee. Michelle Towner, Chief Professional Practice Officer, Clinician Clinical Solutions was the featured interviewee. Michelle Towner, Chief Professional Practice Officer, Clinician Clinical Solutions was the featured interviewee.

The article will provide insights into:

- 01 What the barriers are to interoperability
- 02 Overcoming these barriers through information technology to help create interoperability and quality in care
- 03 The role of information technology in creating interoperability and quality in care
- 04 The role of information technology in creating interoperability and quality in care

Michelle is also one of our judges at upcoming the HIMSS Asia Pacific Digital Healthcare Awards 2015. The HIMSS Asia Pacific Digital Healthcare Awards is a global platform to recognize outstanding achievements and innovations in the range of health innovation and technology to advance patient care and safety. Established in 2013, it is held annually across Asia Pacific, the Middle East and Europe. Find out more about the Awards.

Webinars

Our monthly webinars are focused on a specific theme and are led by esteemed thought leaders in the field. The themes are specially curated to suit your learning needs. Expect interactive learning on trending HIT topics anytime and anywhere you are, and utilize lessons learnt to add value to your career and organization.

Our Corporate Members Webinars include:

June 2016

Enabling EMR Interoperability

Sponsored by

Speaker: Brian Edds, Vice President of Product Strategy, Spok

June 2016

Engaging the Physician in the Benefits of IT and How This Improves Patient Outcomes

Sponsored by

Speakers: Andy David, Industry Principle Healthcare APJ, SAP and Jan Korten, Solution Owner Clinicals, Healthcare Provider, IBS, SAP AG

May 2016

Digital Health and Population Health Management

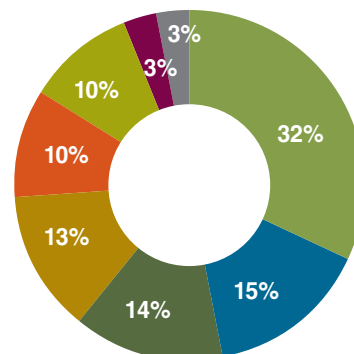

Sponsored by

Speaker: Dave Adams, Director, Head of Solutions Architecture, Asia, Africa and Middle East, CSC

Average of **55.5** registrations per webinar

Apart from leading the webinar session, HIMSS will also upload post-webinar:

- ▶ Webinar recording
- ▶ Presentation slides
- ▶ Webinar review (written in-house by HIMSS Asia Pacific)

to the members resource page for viewing by all HIMSS Asia Pacific members, creating further awareness and thought leadership for our corporate members.

“The webinars provide me with the opportunity to hear from industry leaders and practitioners on the latest trends and challenges in healthcare IT. It’s also extremely convenient to attend such interactive webinars at the comfort of your home or wherever you are with an internet access. I highly recommend this to all healthcare IT professionals to remain up to date on health IT matters.”

Benjamin Mah, Manager of Applications/IT, Integrated Health Information Systems (IHIS)

11 – 14 September 2017, Marina Bay Sands, Singapore

Population Health
Collaborative Care

Data and Technology

Value-Based Care

TEAM-BASED CARE: Unifying Patients and Providers

PRE-CONFERENCE DAY:
11 SEPTEMBER

**MAIN CONFERENCE AND
EXHIBITION:**
12 - 13 SEPTEMBER

POST-CONFERENCE DAY:
14 SEPTEMBER

Team-based care is the antidote to fragmented health care. It brings multidisciplinary healthcare providers together, working collaboratively alongside patients and caregivers to achieve optimal outcomes and care experiences.

Coupling team-based care with information technology and advanced analytics maturity, the needs of our patient population throughout the continuum of care can then be sustainably enhanced.

At HIMSS AsiaPac17 in Singapore, expect to learn, share and discuss insights on team-based care that will benefit your patients, care team and organization both clinically and operationally.

MAIN CONFERENCE TRACKS:

Population Health

Health information technology at present has gone beyond just managing a patient's medical records and improving the quality of care - it is now the enabler for population health management. Through a team-based care approach, both patients and multidisciplinary providers will be further empowered to build a healthier community together.

Collaborative Care

As the future of healthcare shapes into one with multiple care models to provide the right care to the right patient in the right setting, the seamless exchange of information and communication amongst the care team and patients are key to the successful delivery of collaborative care.

Data and Technology

The reach of technological innovation and data has grown exponentially, impacting the way care is received and delivered. New technology and innovations are necessary to keep up with the increasing demands of both patients and providers. Together with data, healthcare technologies are bound to make a break through, empowering care teams to achieve even better outcomes and care experiences.

Value-Based Care

Healthcare systems all around the world are struggling with rising costs to overcome the growing challenges and the increase in healthcare spending does not necessarily translate to better outcomes for patients. To achieve the best outcomes at the lowest cost, value based care replaces today's fragmented healthcare system by moving away from a supply driven system to a patient centered system.

Nursing

Nurses are often the first point of contact for patients and their caregivers. Being at the frontline, they work in an information intensive environment. Similar to nurses, information technology is the foundation of our future healthcare. When these two segments intersect, nurses are better equipped to develop efficient processes and provide exceptional care.

HIMSS ASIA PACIFIC MEMBERS SPEAK

“New Zealand has a fast growing and vibrant digital health community. We see this collaboration between HiNZ and HIMSS as a key step in building stronger networks between our members and the international experts in digital health.”

Kim Mundell,
Chief Executive,
Health Informatics
New Zealand
(HiNZ)

“Bumrungrad International strongly advocates the use of healthcare information technology to improve the lives of our patients from around the world. As an Organizational Affiliate of HIMSS Asia Pacific, we stand together with HIMSS in providing leadership for Thailand and the region.”

Dr. James Miser,
CMIO, Bumrungrad
International

“Our collaboration with HIMSS Asia Pacific has enabled us to touch base regularly with stakeholders in the Asia Pacific region, and has helped us to directly connect with them to advise on solutions and HIT plans.”

Dianne Gruneklee
Regional Marketing
Manager - APAC
Hyland, creator of
OnBase®

“HIMSS membership has given us access to exclusive opportunities to further our knowledge of healthcare systems and technology. We believe this partnership helps us advance the use of information technology in our hospital, to help us deliver the best care for patients and caregivers, and benefit our staff as well.”

Dr. Goh Min Liong,
CMIO, Changi General Hospital, Singapore

“Paknambo hospital is the first in Thailand to achieve HIMSS Analytics EMRAM Stage 6 on its Clinical Transformation roadmap. HIMSS played a significant role in supporting this transformation, and we are proud to continue our collaboration as an organizational affiliate.”

Asst. Prof. Korpom
Rookkapan, MD
Hospital Director
Paknambo Hospital

“In 2014, the Asian Hospital and Medical Center was searching for a roadmap that we can follow on our journey to adopt electronic medical records. We came to learn about HIMSS Asia Pacific and the EMRAM and we were convinced that this was the benchmark we wanted. Through these two years of partnership, the EMRAM has given us a structured path to approach the digitalization of our healthcare system. HIMSS has also been a great place to meet the people who will help and guide us to our digital goals.”

Dr. Juan Antonio Javellana, MD,
Director, Medical Informatics, Asian Hospital and Medical Center
