Supporting Hospital Group:

7 Sponsors and Exhibitors:

Thought Leader Sponsor:

Luncheon Sponsor:

Gold Sponsors:

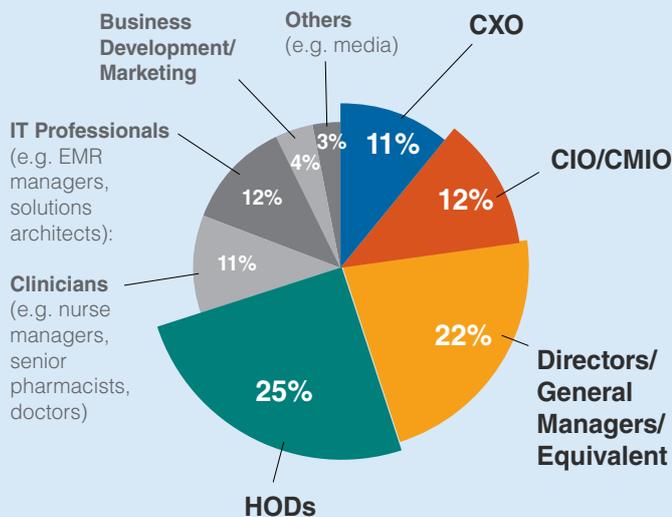

EMRAM Sponsor:

Supporting Sponsor:

Attendees by Job Titles:

Dr. Richard Ashby, AM
 CEO & CIO,
 eHealth Queensland, Australia

Earl Blessing
 Program Director,
 Monash Health, Australia

Dr. Zoran Bolevich
 CEO & CIO,
 eHealth NSW, Australia

Jürgen Brandstätter
 Member, IHE International Board;
 Co-Chair, IHE Europe, Austria

Russell Branzell
 CEO & President,
 CHIME

John H. Daniels
 Global Vice President,
 HIMSS Analytics

John Ellis
 Co-Founder and Principal
 Consultant, Andgiet Security;
 Former Chief Strategist,
 Cybersecurity, Akamai
 Technologies, APJ, Singapore

Prof. Adam Elshaug
 Professor of Health Policy,
 Co-Director and Head of Value in
 Health Care Division,
 Menzies Centre for Health Policy,
 University of Sydney, Australia

Tim Kelsey
 CEO,
 Australian Digital Health Agency,
 Australia (Invited)

Dr. John Lambert
 CCIO,
 eHealth NSW, Australia

H. Stephen Lieber, CAE
 CEO & President,
 HIMSS

A/Prof. Meredith Makeham
 Chief Medical Adviser,
 Australian Digital Health Agency,
 Australia

Dr. Robin Mann
 National Chief of Innovation,
 Calvary Health Care, Australia

Morten Elbæk Petersen
 CEO,
 sundhed.dk - The Danish eHealth
 Portal, Denmark

Andrew M. Saunders
 Health CIO,
 Department of Health & Human
 Services, Victoria, Australia

Will Smart
 CIO,
 NHS England, UK

Dr. Tim Stettheimer
 Vice President and Regional CIO,
 Ascension Health Information
 Services, USA

Adj. A/Prof. Gamaliel Tan
 CMIO,
 Head of Orthopaedics,
 JurongHealth Services, Singapore

Russel Withers
 Executive Director - Information &
 Performance, CIO, Western Health,
 Australia

Jason Plant
 Director,
 Western HealthLinks,
 Western Health, Australia

Are you ready for the New Mandatory Data Breach Notification Laws?

Australia's largest provider of integrated health insurance, Medibank meets regulatory compliance and secures sensitive health files for millions of citizens with Ipswitch's MOVEit Managed File Transfer.

Download our whitepaper, **Healthcare IT's Guide to Information Security and Compliance**, to find out how you can protect your critical data and meet regulatory compliance.

For more information or to arrange a demo, contact Ipswitch's authorised Australian partner, DNA Connect on 1300 723 600.

CHIME is at the Forefront of Healthcare IT Leadership

During a time of momentous change within the healthcare field, CHIME members are better positioned to serve all of their constituencies.

Today's CIOs and senior IT executives are facing considerable challenges. But you don't have to do it alone. Let CHIME be your support system to navigate the influx of demands. CHIME members are the highest ranking IT executives within their organization or facility. A typical CHIME member oversees the information services department and chairs the information technology steering committee within their organization.

To learn more about CHIME or apply for membership visit our website www.chimecentral.org.

WE LAUNCHED HEALTHCARE IT NEWS AUSTRALIA ON 31 MAY!

Digital health transforming healthcare with benefits for Australians through My Health Record

Meredith Makeham, Chief Medical Advisor, Australian Digital Health Agency

It would be an understatement to say that digital technology has transformed the way we engage with the world around us in so many facets of our lives, such as communications, business and banking, travel and social interactions. Our healthcare services have generally been much slower in the development of digital tools to support us with understanding and interacting with our health and care needs. There are some good reasons for caution here – our health systems and care providers are focused on the important principle of ‘First, do no harm,’ and innovation needs to be balanced with the assurance of safety as a fundamental feature of new design.

However there is a shift in the way we are now able to experience and understand our health and care needs, and one sign of this is the development and planned expansion of our national My Health Record system, supported by the recent federal budget announcement of \$374 million over the next two years, and due for delivery to all Australians by the end of 2018 – unless they choose not to have one... [Read on.](#)

Open EMRs – what is the alternative to the single vendor EMR?

Robin Mann, National Chief of Innovation, Calvary Care

At its core, the medical record is a documentation system where clinicians record care and communicate assessments, findings, conclusions and plans to other carers. The record can also include orders and results, prescriptions and records of drug administration.

Traditionally, medical records in hospitals were separate from nursing records; however, increasingly these are combined. Computerisation provided the opportunity for integrating decision support, clinical guidelines and care pathways, data analytics and reporting, all of which promise greater efficiencies in workflow, and better outcomes for patients.

Computers replaced paper records in general practice quickly, whereas computerisation in hospitals was slower and largely driven by the requirement for data for disease registries and audit purposes, which led to many different electronic ‘clinical information systems’ that worked for one specialty, but not others, and the lack of standard data models led to major difficulties in exchanging information between them.

The single vendor hospital EMR solutions that we see today were largely a response to this lack of interoperability and have enabled some hospitals to become entirely computerised, more efficient and deliver higher quality care.

So why could this be a problem?... [Read on.](#)

HEALTHCARE IT NEWS AUSTRALIA

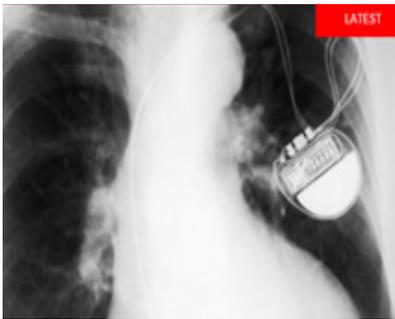

Advanced healthcare through digitisation.

Remote treatment options to enhance accessibility and combat barriers of cost. Organisational efficiency. The threat of cybercrime and how to win the arms race against ransomware and hackers. At its centre: a patient-centric systems-wide approach.

Welcome to the HIT revolution.

HIMSS EMRAM and O-EMRAM Winners

▼ Royal Children's Hospital Melbourne

“The electronic medical record had an immediate impact on the way clinical care was delivered at the RCH when it was launched in April 2016. **There were clear benefits for clinicians from day one in terms of the speed and ease with which they can access patient information through the electronic medical record.** We’ve also continued to make significant improvements to the system and our work practice to ensure we are getting maximum benefit from the technology for our patients, particularly in relation to medication management.”

Professor Mike South, Chief Medical Information Officer, The Royal Children's Hospital Melbourne

▼ Princess Alexandra Hospital

“Princess Alexandra Hospital’s successful achievement of HIMSS Analytics EMRAM Stage 6 is an important milestone on our journey to become a digital leader in Australia. **Our success can be attributed to the clinical leadership at PAH and the support of all staff in becoming the first large scale digital hospital in Australia.**”

Michael Draheim, Chief Information Officer, Metro South Health

Call for Nominations for Committee Members

The HIMSS Asia Pacific Australia Community invites Committee Member nomination.

Be a Thought Leader - provide advice, content expertise and drive HIMSS Community events

Be the Voice of your local community - help focus efforts in Australia on our worldwide goal of transforming health through IT

Pay it forward - you'll be amazed by the people you meet and the experiences you'll have when you give back to your community

Join Us – and be a part of a dedicated and committed group of industry experts to drive Australia's Health IT community

Contact Joannas at jyeow@himss.org to find out more.

HIMSS is a global voice, advisor and thought leader of health transformation through health IT with a unique breadth and depth of expertise and capabilities to improve the quality, safety, and efficiency of health, healthcare and care outcomes. HIMSS designs and leverages key data assets, predictive models and tools to advise global leaders, stakeholders and influencers of best practices in health IT, so they have the right information at the point of decision.

Through its health IT network of over 1 million experts, over 200 knowledge exchanges and collaborations, including 64,000-plus members, HIMSS drives innovative, forward thinking around best uses of technology in support of better connected care, improved population health and low cost of care.

HIMSS is a not-for-profit, headquartered in Chicago, Illinois with additional offices in North America, Europe, United Kingdom and Asia.
