**EUROPEAN
TELEMEDICINE
CONFERENCE**

7-8 OCTOBER 2014 | ROME, ITALY

IS TELE PSYCHIATRY READY TO BE FULLY INTEGRATED IN THE HEALTHCARE SYSTEM?

MASTERMIND NORWAY. INTEGRATED STEPPED CARE IN PSYCHIATRY

Follow us  @himsseurope #HIMSSETC

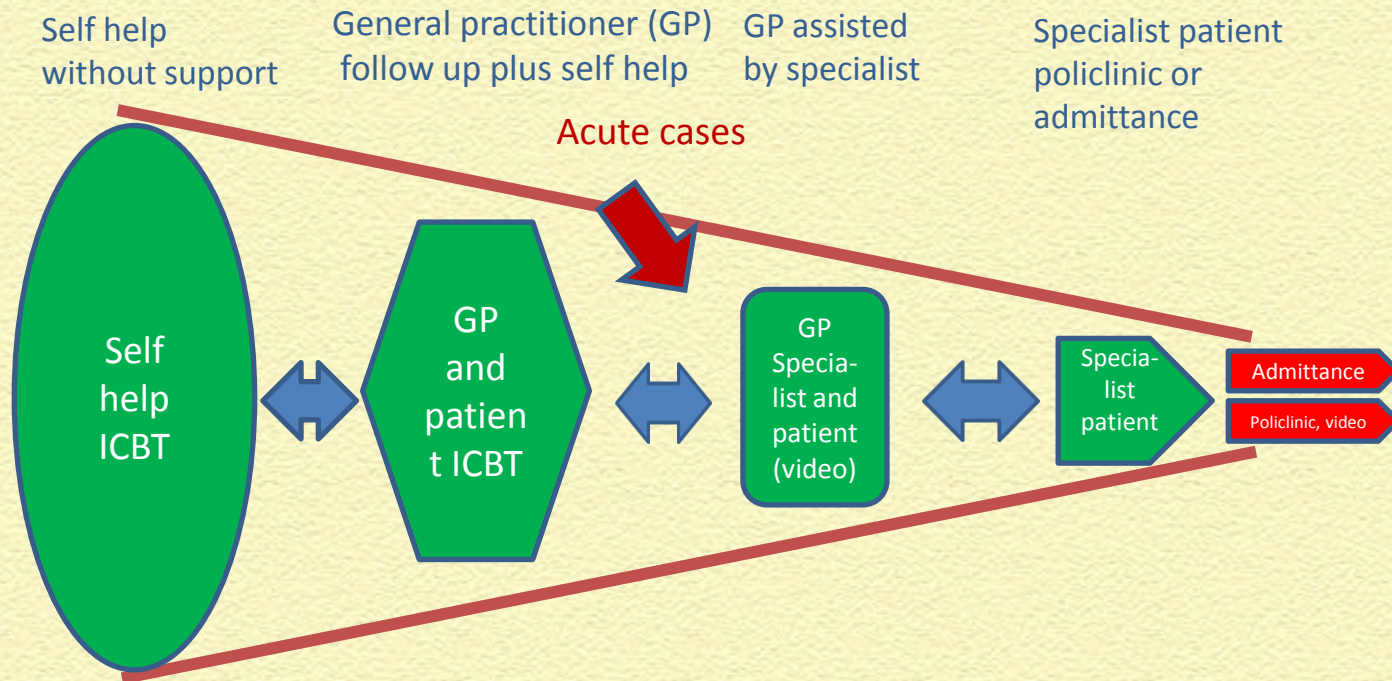

Mastermind EU

- 9 countries, 13 regions, 23 partners in Europe
- 5.000 patients
- Depression
- Computer based cognitive therapy
- Video based care

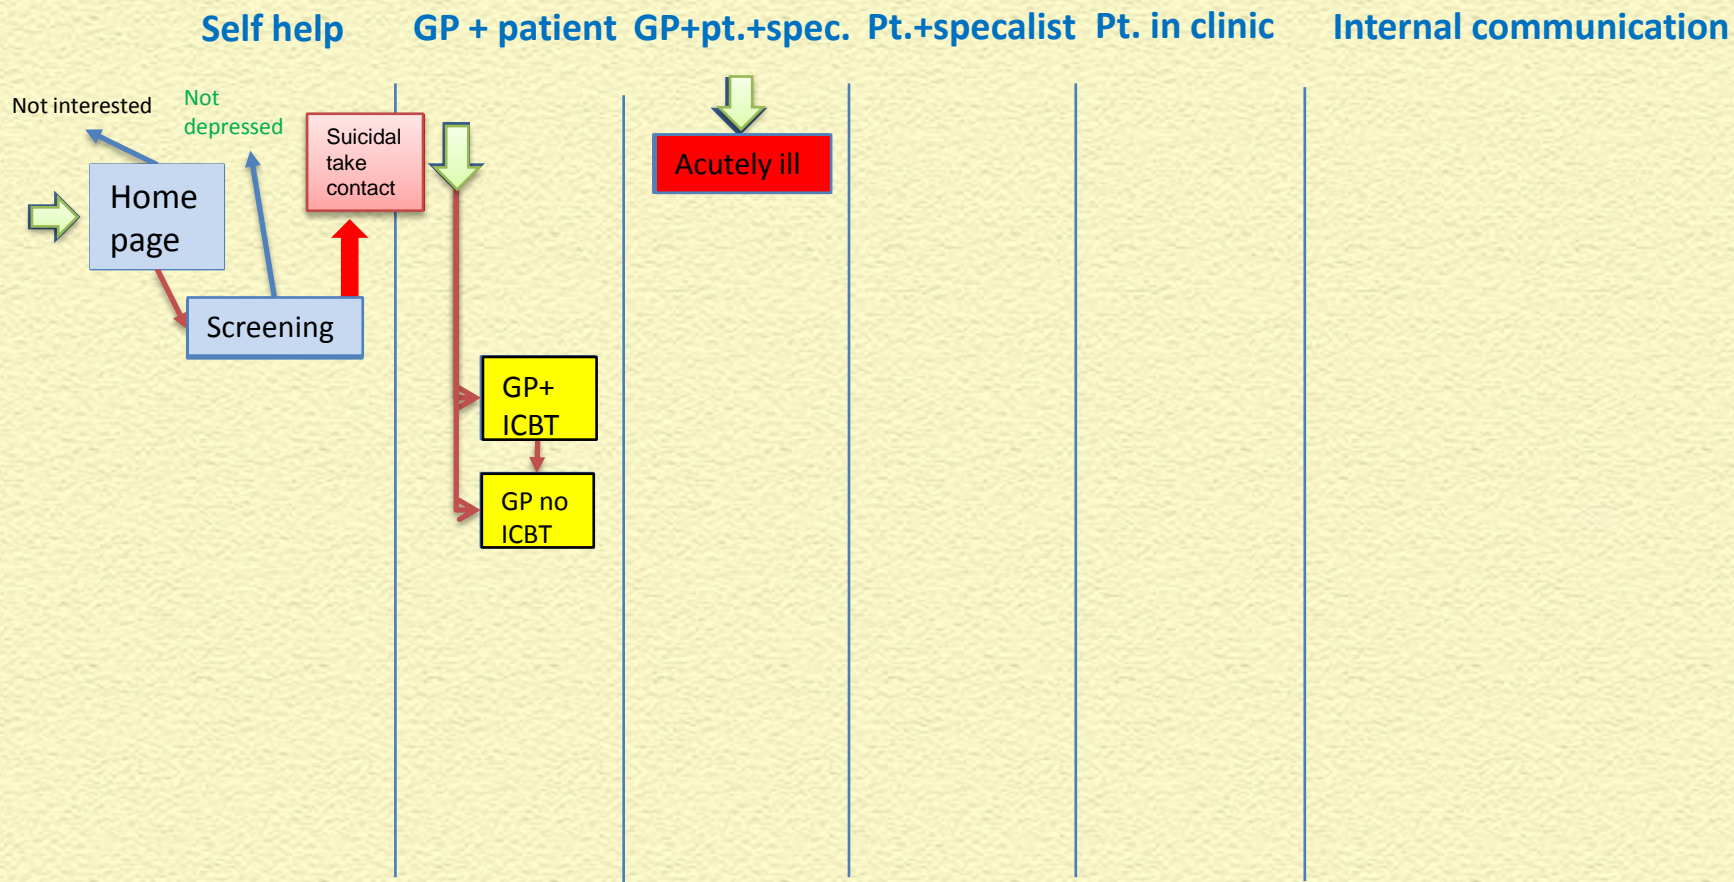

Mastermind, Norway. Basic concept “The funnel”

Integration of ICBT and video in a comprehensive stepped care system

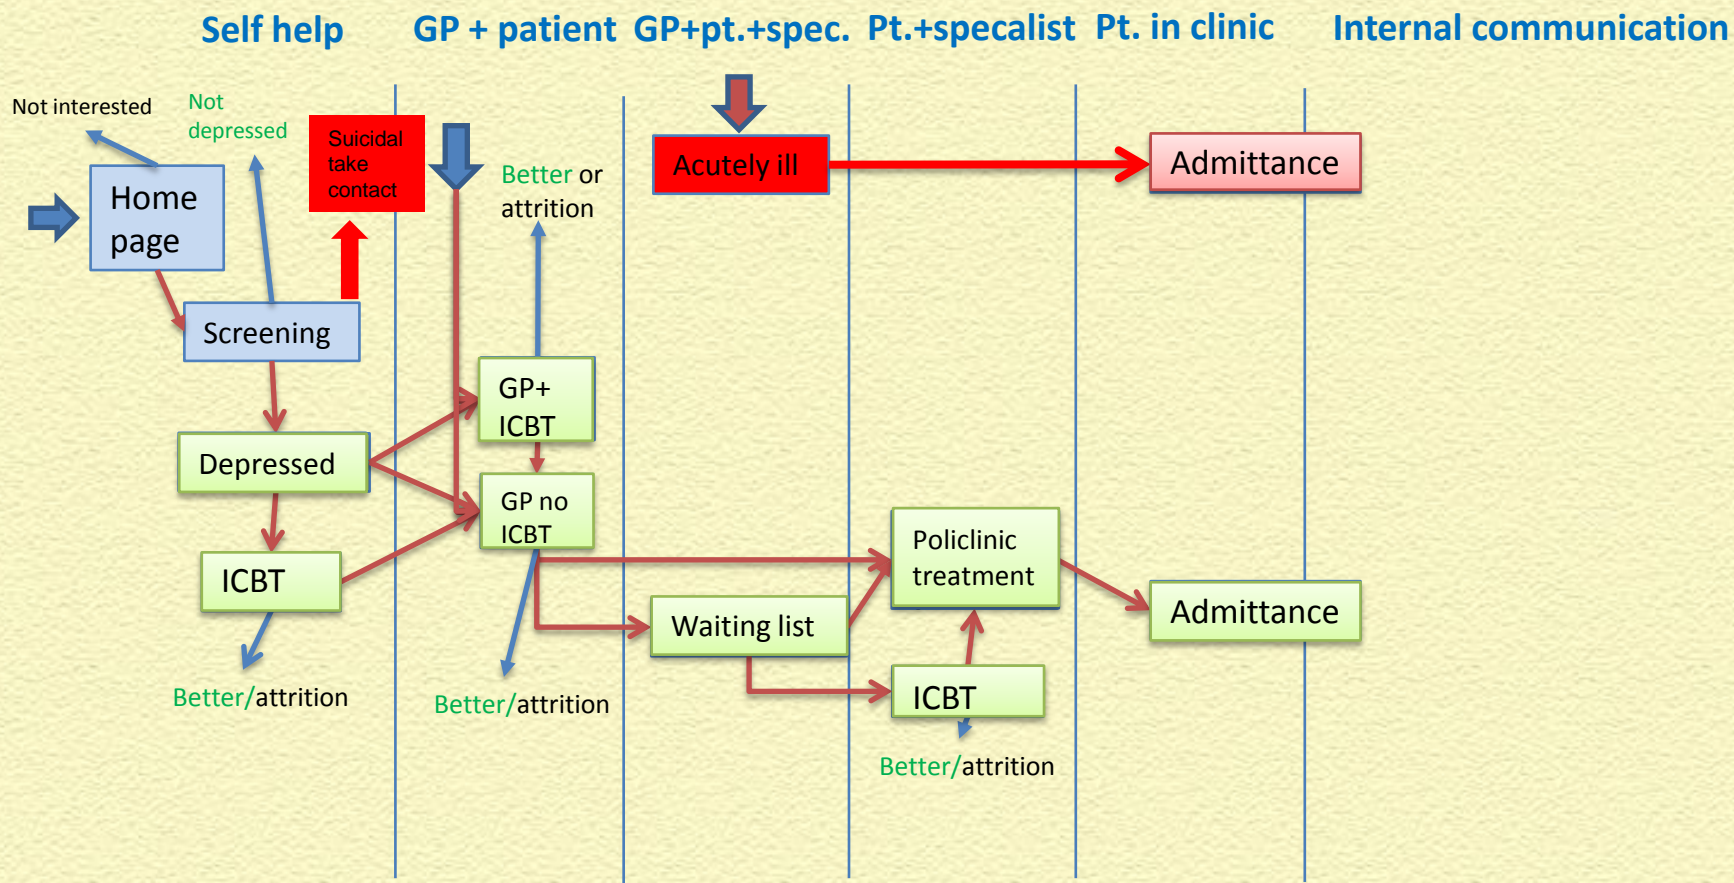

Background. Why do want to try this?

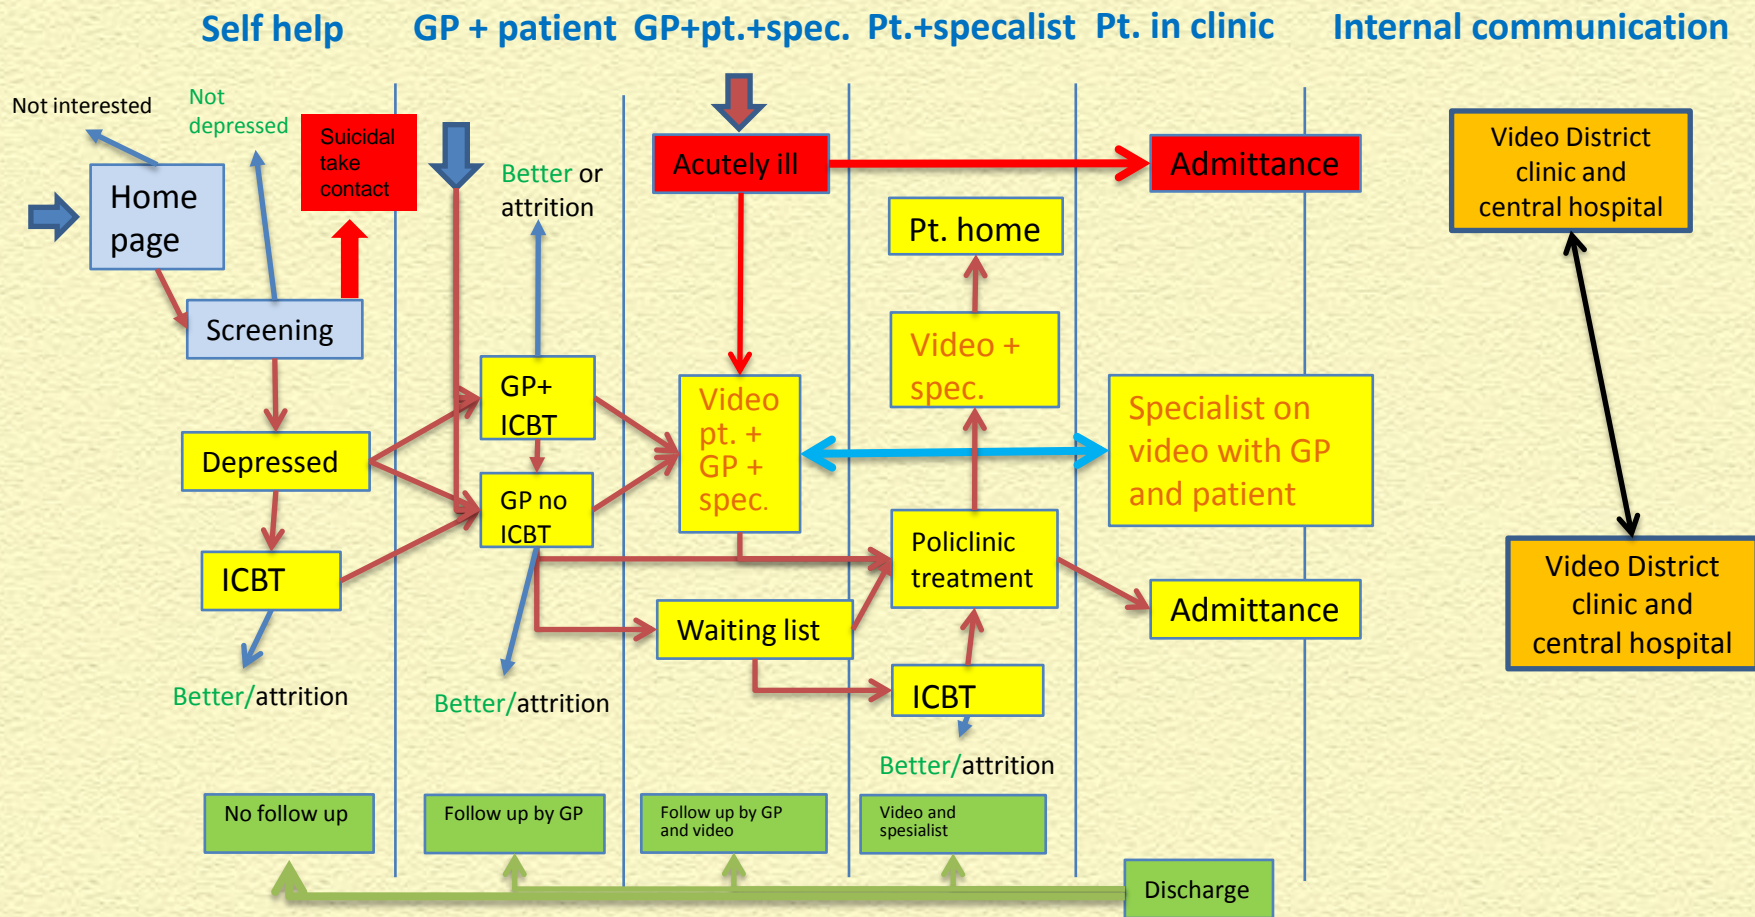

- Video experiences:
 - Internal communication between District Psychiatric Clinics and University Hospital (DeVaVi)
 - Communication between specialist and patient at primary health care (E-BUP)
 - Video conferences between GPs and collaborators
- Other relevant experiences:
 - Acute teams assisting GPs in treatment of acutely mentally ill patients
 - Psychologist or psychiatrists advisory visits to GPs offices in elective treatment of patients
 - Electronic communication between collaborators (FUNNKe)
 - Standardized electronic diagnostic forms (ELSK)
- Administrative conditions:
 - GPs are paid well for video conferences
