

PowerEdge Servers Driving Workloads

Roger Andersson r_andersson@dell.com

The CIO Paradigm

Business Priorities

- Deliver business results to shareholders
- Improve customer satisfaction & innovate
- Cut/maintain costs
- ✓ Keep us competitive
- Improve employee productivity

"Keeping the Lights On"

- Manage current workloads
 Application rationalization
 HW updates & migrations
 Reduce costs
- Protect our data

Technology Priorities

Accelerating the Business

- Optimize workloads
- Software-defined X
- Utilize new IT benchmarks
- Deliver ubiquitous mobility
- Implement Cloud Computing

Customer-inspired, Dell-engineered solutions

From the largest hyperscale data centers to the smallest home offices

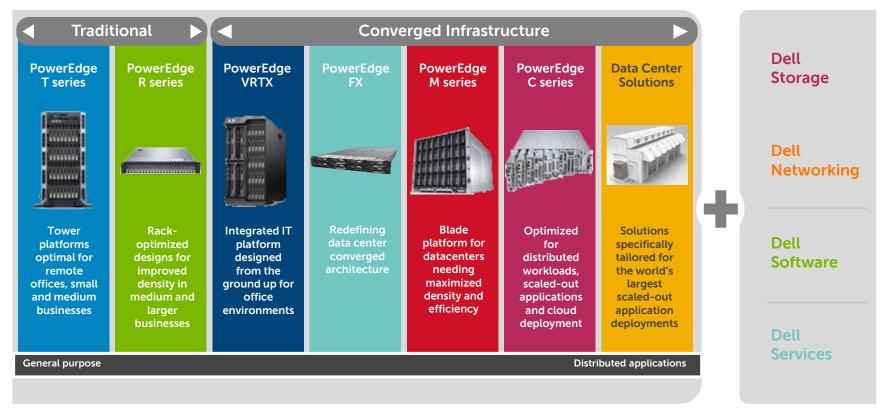

- Consistent, stable architectures
- Flexible platforms, adaptable infrastructures
- Optimized by workloads and environment

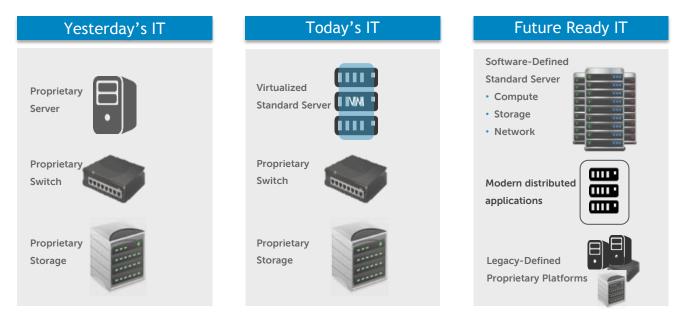

The Dell Enterprise Server Solutions Portfolio

Workload-optimized solutions for any size enterprise

Data Center Evolution Service demands are driving infrastructure changes

- IT agility and efficiency is required for business competitiveness
- Maintaining application scalability and performance are critical
- Standardized HW and simplified management are needed to reduce IT budget growth

PowerEdge 1-socket servers – the latest generation

	T130	Т330	R230	R330
	Outstanding first server or replacement server for SOHO and Small Business.	Excellent first server or replacement server for SMB. Also highly attractive ROBO server for large institutions.	Powerful 1-socket rack server for SMB and ROBO.	1-socket rack server for SMB and ROBO, enhanced with greater HA and serviceability

Balanced Storage -Ideal for Exchange

R730xd

Users continue to ask for balanced local storage capacity

Need for storage-hungry workloads like Exchange, SharePoint

13th Generation PowerEdge brings the first 2U server with 130TB of local storage

R730xd is designed for storage-centric workloads like UC&C

- 130TB of local storage within a fully featured 2U rack server
- Capacity is a primary design point for Microsoft Exchange with little consideration for performance. Flash make sense for actively used email and can address "spike" usage. The capacity-based storage is ideal for archiving
- 33% more capacity and spindles (16)
- One R730xd can
 - Host 100 thousand 1GB mailboxes
 - Host multiple SharePoint instances
- Deliver increased Microsoft Exchange performance with Flash based storage by 30% or more

Introducing the FX Architecture

Dell's revolutionary approach to converged infrastructure for enterprise computing

Optimize Workloads

Maximize Efficiency

Tailor infrastructure precisely, with the right compute, storage, caching, and connectivity to meet specific workload needs Easily and rapidly scale your workloads with an unprecedented level of density, allowing more services using fewer resources resulting in overall lower costs Simplify Complexity

Simplify management of increasingly complex data centers using the flexibility of FX platforms to standardize operations for higher productivity

The FX architecture is designed to make building workload specific solutions as easy as putting blocks together

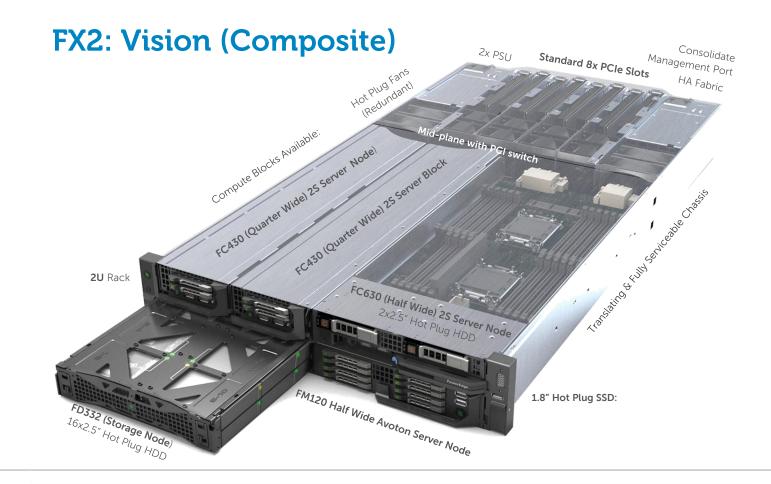

Deploy only the resources you need... Only when you need them.

The PowerEdge FC630 server

2x Intel E5-2600 v3 CPU 24 x DIMM slots Up to 4x10 GbE LOM NVMe SSD option

A single FC630 server block with two 2.5" drives

A single FC630 server block with eight 1.8" drives

4 FC630 server blocks in a fully loaded FX2 enclosure each with 8 1.8" SSDs

2x Intel E5-2600 v3 CPU 8 x DIMM slots Up to 2x10 GbE LOM

The PowerEdge FC430 server

12 DELL Confidential

4x Intel E5-4600 v3 CPU 48 x DIMM slots Up to 8x10 GbE LOM NVMe SSD Option

The PowerEdge FC830 server

1 FC830 server blocks with eight 2.5" drives

2 FC830 server blocks (each with 16 1.8" SSDs) in a fully loaded FX2 enclosure

PowerEdge FM120x4 server Energy Savings and Density for Light Workloads

- Density and energy efficiency in small bite size
- Ideal for web servers, light data analytics and hosting
- Low acquisition cost & easy scalability
- Independent management of each
 server

4 sleds each with 4 microservers Individually serviceable sleds

Each server:

- 1 Intel Avaton CPU 2-8 cores
- 2 UDIMMs
- 1x 2.5" or 2x 1.8"
- 2x 1GE (2:1 aggregation)
- iDRAC

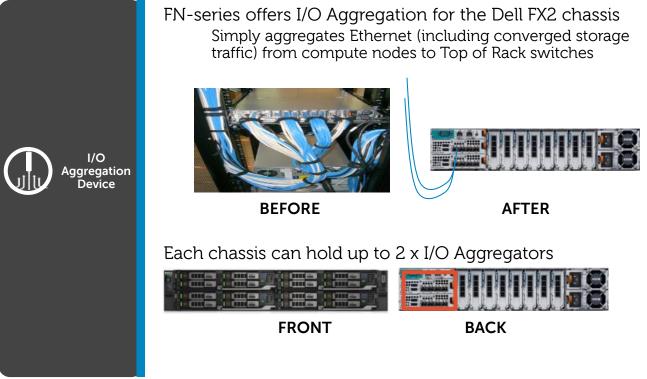

Hot swap power supplies 2x 1100 1GE pass through Module IO Aggregator

PowerEdge FD332 flexible internal disk

- Massive DAS capacity opens up many possibilities
 - Up to 16 direct attach (DAS) SFF storage devices - SSDs and/or HDDs , both SATA and SAS
 - Add 48 direct attached drives to a single server in just 2U
 - 12Gb/s SAS
- Mix and match pass-through & RAID I/O options via Single or Dual PERC9 RAID controller
 - Each controller has a x8 Gen3 PCIe link to FX2
- Accelerate and simplify
 deployment of storage resources
- Service drives independently, without interrupting concurrent operations

PowerEdge FN-Series I/O Aggregator

Ease of Use Through Pre-Configuration

Web Servers: FM120s = massive consolidation

Grow web hosting capacity within existing facility space limits Save on OPEX with energy efficient microservers

Get the details from the Principled Technologies whitepaper: http://www.principledtechnologies.com/Dell/PowerEdge_FX2_FM120x4_0215.pdf

Oracle RAC: FC630s & Fluid Cache

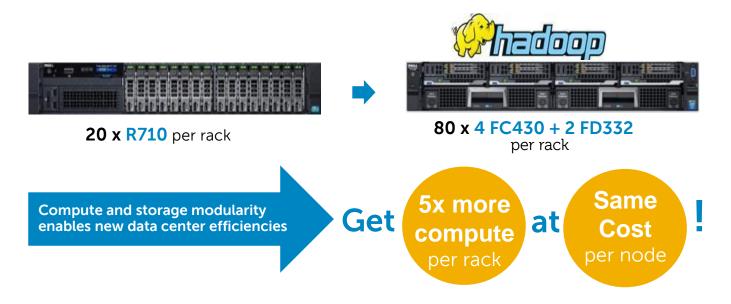

S4810 switches 4 FC630s running Fluid Cache Software, configured as a RAC cluster -----..... 8888 Mar 0 -----Cached data is shared across a high speed private network (m): 000 Each FC630 in this configuration has 1 800GB Express Flash PCIe SSD. **3.7x** "Hot" data from the SAN is Get cached closer to the server in more C . . (1000) . (222transactions low latency Express Flash drives to accelerate application performance

Host an Oracle RAC cluster and Fluid Cache for SAN in a single FX chassis – and significantly out perform the competition

Get the details from the Principled Technologies Whitepaper: <u>http://salesedge.dell.com/doc?id=0901bc828093af1e&ll=sr</u>

Big Data: with FC430s, FD332s & hadoop

Get 5 times* the density of prior generation at the same price

A viable and cost effective large data analytics approach: cluster scale out simplicity- fast local storage – easy scalability

SQL: consolidate workloads by > 4 times* Using FD332s an FC830 and SanDisk DAS Cache

One FC830 with eight 2.5" drives and 2 FD332 storage blocks in a single FX2s chassis

Accelerate data access with ultra low latency Express Flash NVMe PCIe devices using SanDisk DAS Cache caching and high capacity FD332 storage

Get the details from the Principled Technologies whitepaper: http://www.principledtechnologies.com/Dell/PowerEdge_FX2_FC830_FD332_database_consolidation_0615.pdf

* compared to the previous generation PowerEdge R820 server

VDI: with VMware vSAN on FC430 & FD332

4 FC430s running VMware Virtual SAN

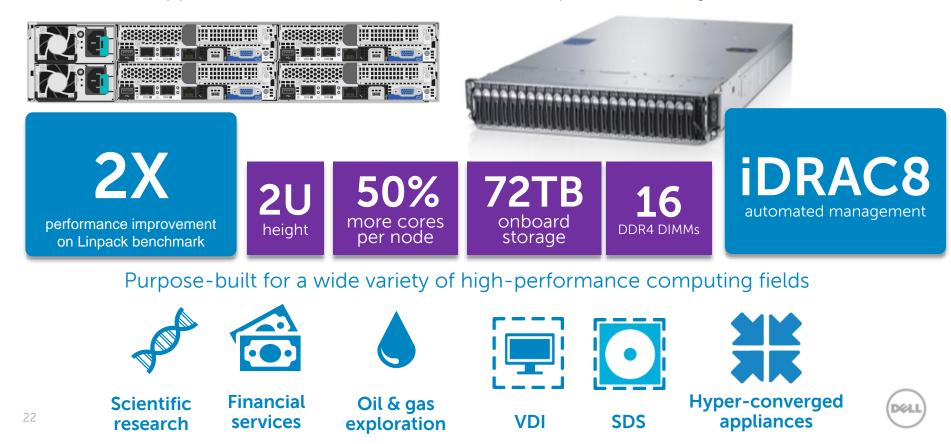

Viable and cost effective large data analytics approach - cluster scale out simplicity - local storage - easy-to-repeat for growth.

Get the details from the Principled Technologies whitepaper: <u>http://www.principledtechnologies.com/Dell/PowerEdge_FX2_FC430_VMware_VSAN_VDI_0215.pdf</u>

Introducing the **Dell PowerEdge C6320**

Ultimate compute performance in a dense 4-in-2U package for HPC and hyper-converged solutions and appliances with the Intel Xeon E5-2600 v3 processor family

Introducing the **Dell PowerEdge C4130**

Industry-leading accelerator density and unmatched **flexibility** for the most demanding HPC workloads

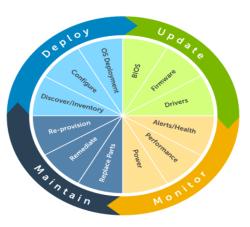

Purpose-built for a wide variety of high-performance computing fields:

* Theoretical double-precision value from 2x Intel Xeon E5-2690v3 + 4x NVIDIA Tesla K80 GPUs

Saving significant management cost Reducing TCO with simplified and streamlined lifecycle management processes

The engine behind: iDRAC with Lifecycle Controller

Automation

"ZeroTouch" automated deployment

Rack, cable and walk away! No special technician training required

Automated server updates

Latest updates are always staged in the server, ready to be applied, reducing maintenance windows

Automated technical support

Greatly reduces time to identify and resolve server issues

Simplification

Enhanced agent-free solution

Real-time server performance monitoring and SAS storage health monitoring

Simplified

management "at-the-box"

Deploy, configure and troubleshoot servers with all the information you need at your fingertips

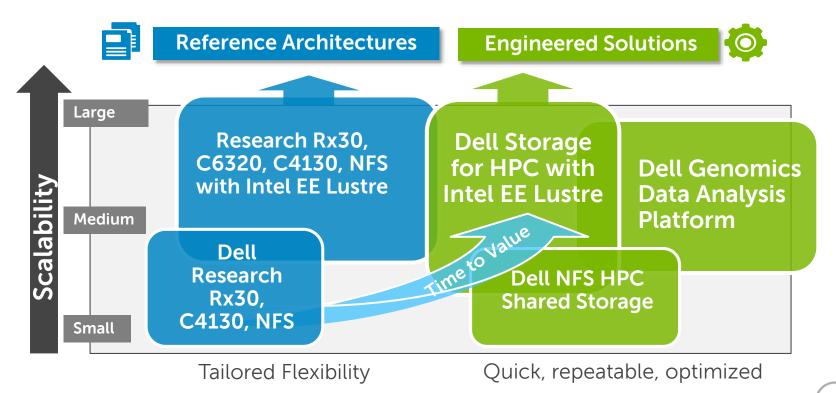

OpenManage Essentials

Automated lifecycle management with a 1-to-many console, and profile based configuration capabilities

Dell Blueprint for High Performance Computing

Deliver insights faster and more efficiently
