# Constant innovation

## Eternal logic

Innovation, is to create new resource;  
No one can control change, but only change before changing.

Before you are a leader, success is all about growing yourself.  
When you become a leader, success is all about growing others.

What you should focus on is not how big the market is going to be, but how much market share is in current field.

In the 3.0 marketing era, the core is community and interactive value; the core is value creation and value management.

# To create customers is the only goal for enterprises
