

Three Ways To Start Implementing SWIFT

1. **Implement** the evidence-based practices of the SWIFT Domains and Features in your School, District, or other local educational agency:
 - **Learn** about these evidence-based practices here at the National PLI by going to sessions presented by current SWIFT partners. Get to know some of these people and learn from their experiences.
 - **Watch** with your colleagues at home the [SWIFT-in-60 video](#) series and use the associated discussion guides to consider what the practices might look like in your school ([guide.swiftschools.org](#)).
 - **Use** the [SWIFT Fidelity Integrity Assessment](#) (SWIFT-FIA) to assess and monitor your school's current status of SWIFT implementation. ([swiftschools.org/shelf](#))
 - **Use** SWIFT's free, downloadable resources to get started with the evidence-based practices. A great place to begin is SWIFT's Multi-tiered System of Support tools: [Tiered Intervention Matrix](#), [School Data Profile](#), [Resource Map](#), and [Master Schedule](#) ([guide.swiftschools.org/multi-tiered-system-of-support/inclusive-academic-instruction](#)).
 - **Share** with your community the SWIFT [Parent & Family Resources](#) brochures in both English and Spanish ([swiftschools.org/community](#)).
 - **Facilitate** transformation of your organization using SWIFT [Technical Assistance](#) tools ([swiftschools.org/playbook](#)).
2. **Send** an email to swift@ku.edu if you represent a State Education Agency and want to partner with the SWIFT Center. Ask how your state can be considered in the **SWIFT State Selection process** if another round of OSEP funding for inclusive school reform becomes available.
3. **Request** technical assistance to implement SWIFT in your state or local educational agency. Send an email to the SWIFT Education Center at swifteducationcenter@ku.edu. Ask how to explore or begin a **technical assistance partnership**.
