

SCPMG 2018 Urology Symposium
Friday – Saturday, October 5 – 6, 2018
Park Hyatt Aviara Resort – Carlsbad, CA

Friday, October 5, 2018

Time	Topic	Faculty
7:00 am	Registration, Continental Breakfast, Networking and Product Education	
8:40 am	Welcome Remarks and Introductions	Gary Chien, MD – Symposium Chairman
Oncology Upper Tract and Surgical Optimization Facilitators: Gary Chien, MD and Mark Lassoﬀ, MD		
8:45 am	Optimizing Surgical Outcomes: Preoperative Risk stratify patients-- recommend proper nutrition, order appropriate VTE prophylaxis and antibiotics to optimize health	John Stoffel, MD
9:15 am	Optimizing Surgical Outcomes: Intraoperative Perform effective time outs, huddles, briefings; utilize communication/teamwork to properly position patients and ensure patient safety and optimize outcomes	John Stoffel, MD
9:45 am	Optimizing Surgical Outcomes: Postoperative Utilize enhanced recovery pathways, including pain management and best practices for transitions of care	John Stoffel, MD
10:15 am	Break, Networking and Product Education	
10:30 am	Medical Management of Renal Cancer for Urologist Assess 2017 NCCN guidelines and apply to practice as to improve clinical outcomes. Employ preoperative risk stratification to identify neoadjuvant or adjuvant therapy for optimal management of RCC care to improve outcomes.	John Gore, MD, MS, FACS
11:00 am	Surgical Management of Renal Cancer for Urologist Assess 2017 NCCN guidelines and apply to practice as to improve clinical outcomes. Assess surgical approach and employ technique for optimal surgical treatment of localized renal cancer.	John Gore, MD, MS, FACS
11:30 am	Resident Presentations Evaluate evidence-based research, appropriately incorporate into clinical practice	Pooya Banapour, MD Peter Elliott, MD Neil Patel, MD Ramzi Jabaji, MD
12 – 1pm	Lunch, Networking and Product Education	

Oncology Lower Tract Facilitators: David Finley, MD and William Sohn, MD		
1:00 pm	Prostate Cancer Screening Update – 2018 Optimize EBM to increase the quality of screening and improve cancer detection. Order prostate screening for each individual based on clinical risk/need to improve value of screening for those that benefit most.	Joseph Presti, MD
1:30 pm	MRI Targeted Biopsy: WHO, WHAT, WHEN? Select patient based on criteria for MRI targeted biopsy. Standardize technique and interpretation of MRI to reduce variability.	Soroush Rais-Bahrami, MD
1:50 pm	Prostate Cancer - Part 2: “Impact of 2012 USPSTF on Prostate Cancer Screening in KP” Share lessons learned in treatment/research to provide optimal management of genitourinary cancer patients	Joseph Presti, MD
2:20 pm	MRI Targeted Biopsy: HOW? Select patient based on criteria for MRI targeted biopsy; Standardize technique and interpretation of MRI to reduce variability	Soroush Rais-Bahrami, MD
2:40 pm	Break, Networking and Product Education	
3:00 pm	The Initial Experience Prepare for/implement a comprehensive program of diagnostic MRI and MRI-targeted prostate biopsy and ensure quality	James Chang, MD
3:15 pm	Prostate MRI Prepare for/implement a comprehensive program of diagnostic MRI and MRI-targeted prostate biopsy and ensure quality	Adam Jung, MD
3:30 pm	Cases (as applied to cases) Prepare for/implement a comprehensive program of diagnostic MRI and MRI-targeted prostate biopsy and ensure quality	Soroush Rais-Bahrami, MD James Chang, MD
3:45 pm	Panel Q & A Share lessons learned in treatment or difficult cases to provide alternative therapies and/or develop new protocols	John Gore, MD, MS, FACS Joseph Presti, MD Jon Kaswick, MD
4:15 pm	Adjourn Day 1	Gary Chien, MD

Saturday, October 6, 2018

Time	Topic	Faculty
7:00 am	Registration, Continental Breakfast, Networking and Product Education	
8:30 am	Day 2 Overview and Location Survey	Gary Chien, MD – Symposium Chairman
Trauma Reconstruction Facilitators: Polina Reyblat, MD and Christopher Tenggardjaja, MD		
8:35 am	Radiation Induced Bladder Dysfunction, Fistulae Identify/Dx GU pathology seen after radiation therapy and properly manage care	Benjamin Breyer, MD, MAS
9:05 am	AUA Guideline on Urethral Strictures Analyze and utilize AUA stricture guidelines	Lee Zhao, MD
9:35 am	Management of Post Prostatectomy Incontinence and Vesicourethral Anastamotic Strictures Select treatment option for post prostatectomy incontinence & anastomotic stricture disease for individual patient to manage and optimize care	Benjamin Breyer, MD, MAS
10: 05 am	Update SCPMG Urology Determine the effects of health care on desired outcomes and to assess the degree to which health care adheres to processes based on scientific evidence	Eugene Rhee, MD
10:20 am	Break, Networking and Product Education	
10:40 am	Application of Robotic Surgery in Reconstruction Recommend robotic surgery for reconstructive applications in urologic procedures as appropriate	Lee Zhao, MD
11:10 am	PANEL Q & A Share lessons learned in treatment or difficult cases and apply in clinical cases	Lee Zhao, MD Benjamin Breyer, MD, MAS
12:00 pm	Lunch, Networking and Product Education	
DERM and Sexual Development Facilitators: Gene Huang, MD and Stacey Carter, MD		
1:00 pm	Defining the Lesion Identify and distinguish normal, benign, premalignant and malignant GU dermatologic lesions, treat or refer	Gary White, MD
1:30 pm	HPV and Other Infections Identify, diagnose and treat a variety of STI/STD lesions	Julie Ritchie, MD
2:00 pm	Inflammatory Conditions Identify and distinguish various inflammatory GU dermatologic lesions and manage care or refer	Gary White, MD
2:30 pm	Disorders of Sexual Development (Part A) Outline the components of a genitoplasty procedure to pt/family. Evaluate and manage potential late complications a genitoplasty including incontinence. Assess rationale for early and delayed surgical intervention for genital abnormalities w/family and or patient.	Paul Kokorowski, MD, MPH
3:00 pm	Disorders of Sexual Development (Part B) Q & A (30 minutes)	Paul Kokorowski, MD, MPH
4:00 pm	Program Adjourned	Gary Chien, MD
