

# STOVA

## Friday, 27 November 2015

8:30 am - 8:55 am

### **Registration - LEVEL 5**

REGISTRATION AREA

8:55 am - 9:00 am

### **CONFERENCE OPENING - DAY THREE**

AUCKLAND 3 & 4

9:00 am - 9:45 am

### **MOBILE ENGAGEMENT - COUNCIL APP'S TO COMMUNICATE WITH COMMUNITIES**

AUCKLAND 3 & 4

Dominic Di Martino, Asset Services Manager | Asset Services, Brimbank City Council

Technology is fast converging to a point of singularity. Today, perhaps more than ever, society and individuals can “do more” with less physical technology. The proliferation of smart phone technology and our ability to access more information, faster than ever before, is becoming the ideal platform to transform the way we do business, communicate and organise the way our society functions.

Local Governments across Australia are quickly realising the benefits of smart phone technology to better engage with their communities and remain technology relevant in the private public business dichotomy.

9:45 am - 10:30 am

### **A GOOGLE PERSPECTIVE ON A DIGITAL FUTURE**

AUCKLAND 3 & 4

Ross Young, Public Policy and Government Affairs, Google New Zealand

10:30 am - 11:00 am

### **MORNING TEA WITH THE VENDORS**

EXHIBITION AREA

11:00 am - 11:30 am

### **INTELLIGENT COMMUNITIES**

AUCKLAND 3 & 4

Annette Main, Mayor, Wanganui District Council

Whanganui's vision is to be a leader in the digital world. They use an independent global framework to measure progress towards this international aspiration. The Intelligent Community Forum is a best

practice policy think-tank out of New York that studies communities around the world as they strive to create thriving broadband economies. Whanganui competes with around 400 communities every year to get into the Smart21 Intelligent Communities and has been successful in 2013, 2014 and 2015. Mayor Annette Main will talk about the shift from Smart Cities to Intelligent Communities, why this is important and how Whanganui does it.

11:00 am - 12:55 pm

OPEN DATA WORKSHOP

AUCKLAND 2

Laura Manley, Co-Founder and Director of Partnerships and Programs, Center for Open Data Enterprise  
Workshop with Laura Manley

11:35 am - 12:05 pm

**LOCAL GOVERNMENT, PRIVACY AND ONLINE  
PROPERTY AND BUILDING INFORMATION**

AUCKLAND 3 & 4

Octavia Palmer, Policy Adviser , Office of the Privacy  
Commissioner

**TRANSFORMATIVE TECHNOLOGY: MAKING THE  
"DIGITAL WHARE TAONGA OF THE FUTURE" A REALITY**

AUCKLAND 1

Braden Rowe, Director, Desktop Imaging

Using a privacy-by-design approach to help Councils make online property and building information systems as privacy enhancing as possible. This presentation will include descriptions of different types of privacy safeguards that can be used for systems such as online property files, ratings information databases and consent trackers.

Everyone wants ALL their corporate information in one place, a digital whare taonga if you will.

Sometimes the problem is so big you don't know where to start - well, one bite at a time as the analogy with eating the elephant goes. You need the right technology and tools to convert a variety of collections into one source of the truth - we want to show you how a leading Local Government agency has identified a way forward, and the technology and experience required to achieve a solution?

International guest Byron Knowles joins Braden Rowe to present a combination of local along with international scenarios demonstrating how the power of technology and the right expertise can drive transformation and success.

12:10 pm - 12:55 pm

**LISA TAMATI - MOTIVATIONAL SPEAKER**  
AUCKLAND 3 & 4

She has overcome asthma, a broken back and although has never been a talented runner she has in fact run the equivalent of over 2 and a half times around the circumference of the Earth in training and racing. She has competed in the most difficult and brutal races on earth including over 2000km in the Sahara, and also a run through NZ 2,250km in 42 days. Competing in Badwater Ultramarathon through Death Valley, USA 217km twice it is known as the unofficial World Champs of Ultrarunning and is the hottest desert on Earth.

Lisa is one of seven people to have conquered the Himalayan High race 222km which navigates over the two highest passes in the world, her achievements continue on in 2014. Lisa is the Author of two Books, "Running Hot" and "Running to Extremes" and has both Produced/Directed or been the focus of 8 documentaries and movies to date.

She is also a business woman who is the Director of five companies and knows very well the challenges of the business community. She will share her journey and tips for goal setting, staying motivated and focused.
