Aerofloat
WASTEWATER TREATMENT SPECIALISTS

Food and Beverage
Wastewater Treatment

DO YOU HAVE A WASTEWATER PROBLEM?

"In my lifetime career working in the dairy industry this is the only DAF that I've found that eliminates the smell factor. What's more, the water board is happy with the end result – and that's important!"
Sam Montalto – Monte Fresco Cheese.

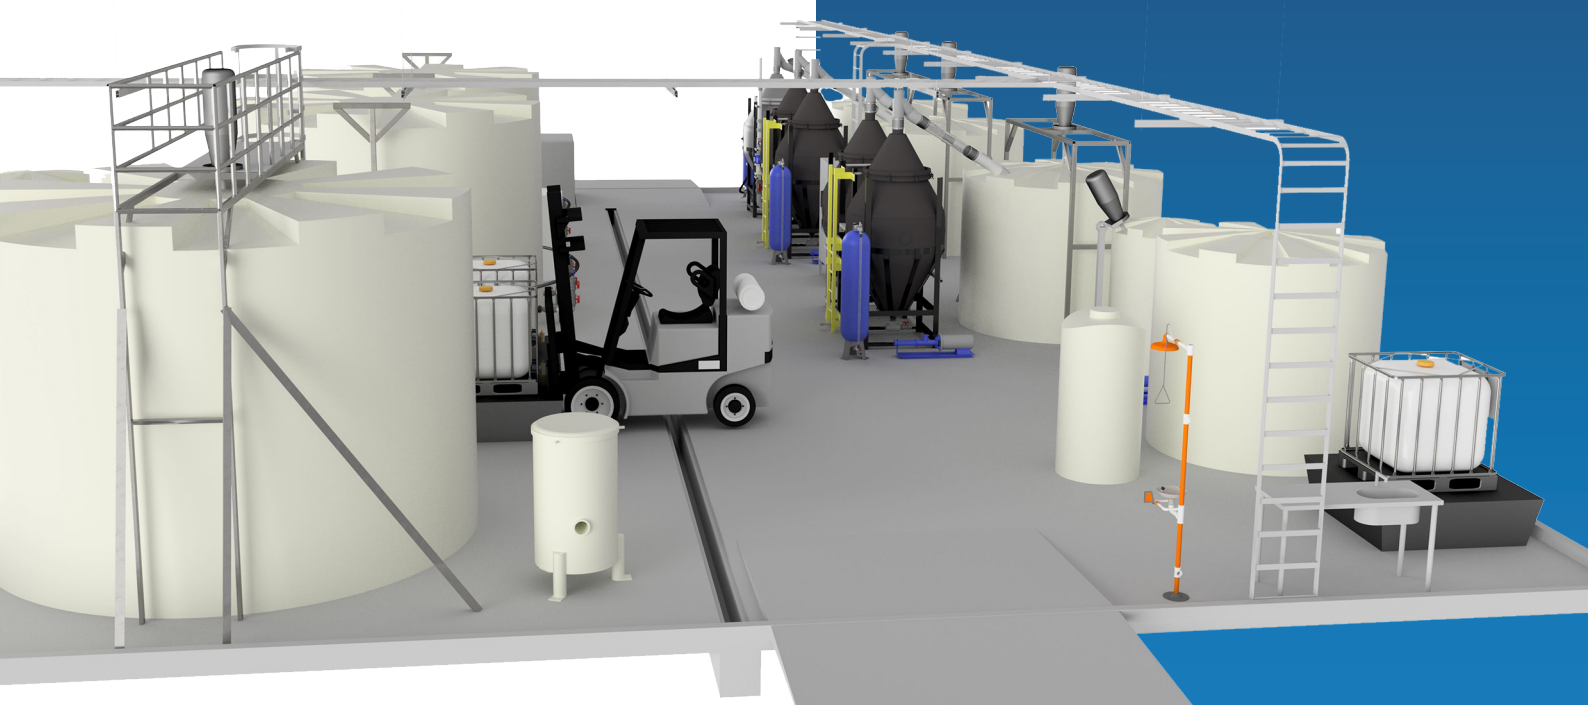
- wineries
- fresh produce manufacturers
- smallgoods
- oils and sauces manufacturers
- general food manufacturers

Compact, Affordable Low Maintenance



Norco Diary Treatment Plant – 3D Design
DAF + MBBR

Patented World First Technology

With more stringent discharge limits being imposed and subsequent rising trade waste costs, managing wastewater in the food and beverage industry can be problematic for business owners.

Aerofloat offers an effective and compact solution for treatment of production wastewater. The unique design of Aerofloat's DAF and MBBR systems allow businesses to manage their suspended solids (SS), fats, oils and grease (FOG, BOD and COD in a way that's both practical and affordable.

Jewel Fine Foods - DAF Plant

Reduces SS, FOG BOD/COD

Fresh Air for Boutique Dairy

"Aerofloat made us feel completely assured that we were going in the right direction. We met other suppliers promising improbable results for a lot of money. Aerofloat was never going to leave us with something that was half-done."
Karen Neil – Fresh Food Bros. Pty Ltd.

Aerofloat DAF Features
