

At A.K.A Cleaning Machines we aim to supply quality-cleaning machinery to suit our customers various requirements. We have a range of equipment that will offer cleaning solutions for a wide range of cleaning situations. Whether it's a hospital operating theatre that requires a high degree of sterilisation without the use of chemicals, removing heavy build-up from commercial kitchens or delicate cleaning around machinery where the use of moisture is not possible, we are sure to have the solution.

We are based in South East Queensland we offer sales & service to all areas of Australia and New Zealand. We offer full after sales service and can supply programmed maintenance on the machines we sell.

We have a range of equipment from Floor Scrubbers, Sweepers, Steam Cleaners, Dry Ice Blasters, Vacuum cleaners and Parts Washers for both domestic and commercial applications.

A Brand NEW addition to our range is the INTELBLAST Dry Ice Blasting machines.

We have been appointed Australian & New Zealand Distributors for this innovative and extremely effective way to clean, especially where contamination from moisture presents a problem.

For almost 50 years Dry Ice Blasting has been used in industries that require gentle but effective cleaning without the use of chemicals or water.

Since DRY ICE is not adding any material that needs to be collected, it thereby gives the cleaning operator a perfect opportunity to reach and clean areas and parts that normally only can be done by hand.

DRY ICE blasting offers cleaning without a mess. No use of water or chemicals. No destruction of surface.
