

About Redback®

Your Local Audio Partner.

Redback® commercial public address products are manufactured in Australia by Altronics.

Established in 1974, Altronics is a 100% Australian owned and operated company.

Altronics have gained a reputation as one of the industries most respected electronic wholesalers in Australia and continue to manufacture locally to ensure a high standard of product.

There is significant added value for customers when purchasing an Australian made Redback® amplifier or PA product.

Local support & feedback.

The best product features come as a direct result of feedback from customers, and when you call Altronics, you speak to a real person - no recorded messages, call centres or automated push button options. Altronics in-house service department has all the know how to answer any technical queries.

Buy local.

It's not only the assembly team at Altronics who are employed as a direct result of your purchase, but hundreds more at local companies involved in the supply chain.

Industry leading 10 year warranty.

There's a reason Redback® has an industry leading DECADE warranty. It's because of a long tried and tested history of bulletproof reliability. Altronics have witnessed original Redford amplifiers still in service in schools - that's over 37 years of operation - and still going strong!

In addition to the locally made Redback® range, Altronics also import high quality public address speakers from leading suppliers in Asia, many of which are covered by a 5 year speaker performance warranty.
