

ADVANTA

Smoothwall Foil Trays

Premium ovenable trays
100% recyclable

Key Benefits of Smoothwall Trays

- Suitable for gas flushing, MAP, CAP and vacuum packaging - resulting in extended shelf life.
- Attractive appearance enhances consumer appeal and helps sell premium priced product.
- ADVANTA aluminium material is 100% recyclable and is environmentally friendly - minimises landfill waste stream.
- Product can be film or dome lidded to achieve a leak proof seal, reducing wastage.
- Heat resistant to 400°C - suitable for grilling, oven cooking and BBQ cooking.
- Can be microwaved with an appropriate modern style domestic microwave oven, reducing cooking time.
- No need to transfer food from a non-ovenable tray - minimises food handling and improves hygiene and convenience.
- Foil containers are not affected by extreme freezing -40°C or high cooking temperatures and will not become brittle, soften or lose their rigidity. This enhances consumer safety.
- Excellent conductor of heat - speeds up cooking process and reduces energy cost.
- Lightness - the low density and thinner sections result in reduced weight. This saves energy during transportation.
