

CSP
ARCHITECTURAL

WE BELIEVE
IN QUALITY
PRODUCTS

CSP Architectural is a family owned company, established in 1978. The 'Cement Sheet Products' business was originally based on the distribution of fibre cement products for which it rapidly developed a reputation as a very reliable source for the supply of James Hardie® building products.

Gradually, new ranges of innovative, modern building materials have been added to the series of facade options such as Alpolic, Equitone, VitraPanel, Innowood, Promat and Keystone.

These products/brands are recognised building materials that perform to the Australia standards, offering quality, performance and modern style design to all architectural projects.

INNOVATION • STYLE • PERFORMANCE

OUR MISSION

Bringing leading and innovative building solutions while being the supplier of choice in the Industry.

OUR PRODUCT RANGE

- Alpolic/fr and Alpolic A2 - Fire retardant Aluminium Composite Material
- Equitone - Through - Coloured facade material
- VitraPanel - Pre-Finished compressed fibre cement panel
- James Hardie - Fibre cement building products
- Innowood - A sustainable timber composite product
- Aliwood - A timber finish aluminium system
- Keystone- Acoustic panelling solutions
- Promat - Fire-Rated building products

OUR SERVICES

TECHNICAL SUPPORT

CSP Architectural has an in-house team of experts with the skills and experience to deliver complete design solutions. We also offer full take off services for all fibre cement applications.

CUTTING

We have a full in-house CAD, cut, roll and route service for the processing of aluminium panels including composite and solid aluminium.

We can cut all types of cement sheet to the required shape and size, whether it is taper cut or cut outs to a sheet we can undertake this work with ease.

PERFORATION

We can perforate solid aluminium, aluminium composite panels and fibre cement to a range of patterns for screening, ventilation or decorative feature panels.
