## About us

Based in Melbourne, Synergy Custom & Commercial is an importer and distributor of premium custom installation and AV products for Australia. It is a division of Synergy Audio Visual, one of Australia's leading specialist distributors.

Focusing on the AV installation market, Synergy Custom was founded to promote audio visual and integration products that are uncompromising in their technological design, function and integration capabilities. The products we choose represent our core values of high performance, proven reliability and excellent value.

Our dedicated team provides full product support, training, marketing, logistics and service functions to authorised resellers, custom integrators and AV professionals.

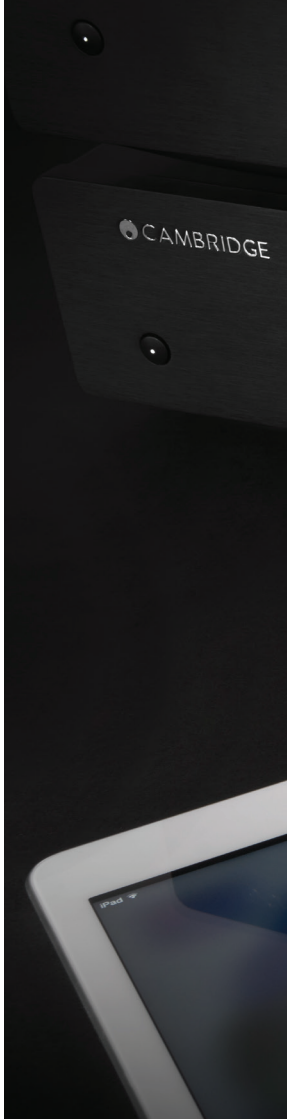

Our mission is to provide the best performance and value in custom integration products, hi-fi and home cinema for people to use and enjoy.

## A message from the Managing Director

With a lifetime passion for music, cinema and hi-fi, it was a natural decision to establish Synergy as an importer of premium audio and video brands in 1995. We are founded on the principles of integrity, customer service and long-term business. To that end, we focus on developing strong partnerships with all our suppliers and customers.

Each of the companies we represent share a common passion for excellence in their respective fields and invest heavily in research and development. Similarly, our reseller partners are amongst the finest audio and video specialists in Australia and offer the best channels to market. Our product knowledge, support and service are second to none and make working with us a pleasure. We look forward to working with you in the future!

# AudioControl®

*Making Good Sound Great™*

Established in 1977 and based in Seattle, USA, AudioControl is a leading designer and manufacturer of innovative high-performance audio products for the residential, commercial and automotive markets.

AudioControl produces premium home theatre and whole-house amplification products, and has most recently introduced a CM series of commercial series DSP amplifiers. The 70 volt amplifier solutions deliver superior quality power and sound through a large number of speakers, ideal for outdoor audio systems as well as a large variety of commercial A/V applications.

DSP control and signal matrixing capabilities, like those from AudioControl's award-winning Director Series amplifiers, enable integrators to precisely tailor the sound to any environment. Features of the CM4 amplifier allow installers to choose from balanced/unbalanced analogue, microphone and digital inputs. Outputs can be configured in mono or stereo, giving integrators the configuration flexibility to accommodate any system architecture.

# ELAC

The life of sound.

Founded in the city of Kiel, Germany 1926, an enthusiastic team lives and breathes the finest German engineering. In every ELAC loudspeaker and component, you will find the knowledge, skill and heart of experienced engineers that are proud of their proprietary technologies.

With design teams based in Los Angeles, USA (including world famous acoustic engineer Andrew Jones) and Germany, ELAC's range provides the perfect solution for every environment.

Their recently released custom installation range shares the passion and technology behind their Debut range of Hi-Fi loudspeakers, with a focus on both distributed audio and home cinema.

Along with the comprehensive range of in-wall and in-ceiling architectural speakers, they have introduced a ground-breaking in-wall subwoofer. Partnered with a DSP controlled high power amplifier with self-setup, the subwoofer system perfectly matches any room's acoustic layout.

ELAC IW-S10EQ-W In Wall Subwoofer with CVC

Home Cinema performance systems and soundbars

TruAudio started as systems integrators and in 1999, after thousands of home theatres and multi-room audio systems, believed they had the experience and expertise to become the best designer and supplier in the industry.

They provide not only the right combination of materials to create an elegant look and precise acoustical reproduction, but also offer a range of custom accessories tailored to the needs of a discerning home owner. This makes TruAudio the best in making a whole-home audio system come together in a way that was never thought possible.

Their range of speakers includes both entry and high-performance levels of distributed audio products, as well as ceiling and wall-mount home cinema products with matching high-power subwoofers.

With a growing emphasis on outdoor entertainment, TruAudio was one of the first designers of landscape audio products that are both elegant in their integration into the garden, as are they capable of creating a sound environment outdoors.

Landscape and commercial speaker systems

# THE CHORD<sup>TM</sup> COMPANY

The Chord Company has been designing, building (and refining) award-winning audio and video cables in England since 1985. Cables are not and never have been just an accessory. They are a vital part of any system and choosing the right cable is more important today than it has ever been.

The correct interconnect, power or speaker cable can transform the experience and enhance the pleasure of your favourite music or movies.

# REL

ACOUSTICS LTD

REL Acoustics Ltd, based in the UK, designs and manufactures the world's finest sub-bass systems for use in two channel and home cinema systems. REL is a specialist in sub-bass design and does not make loudspeakers. Their products are amongst the few subwoofers that allow both .1 (low level) and high-level connection simultaneously, offering owners a new dimension in high fidelity for music and film.

The new REL Serie HT is designed specifically to answer the challenge of creating affordably priced, exceptionally dynamic, pure home theatre powered subwoofers. With the ideal combination of a lightweight, modern CarbonGlas™ drivers coupled to a powerful Class D amplifier that runs cool that produce extraordinary dynamics.

Serie HT subwoofers and wireless adapters

# **FORGE™ VAULT™ SERIES**

The Vault Series of system racking from TruAudio has many features to better assist installers and end-users alike. It was designed with an integrated cooling unit at the top of the rack, a 450kg weight limit providing the ability to include all equipment within the rack, plenty of punch-outs and space for power supplies, and one of the best wire management systems available.

All of this comes at a competitive price point, making Vault versatile, economical, and perfect for your next install.

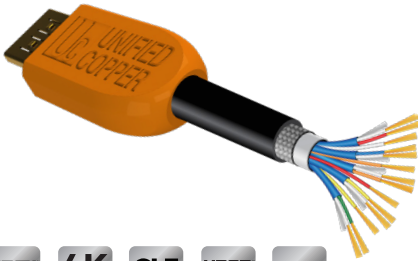

Available in 16U, 20U, 28U, 36U and 44U rack sizes.

## HDMI Interconnects

- › UL Certified CL3 flame retardant PVC jacket
- › High-density triple-layer shielding protects against radio frequency noise up to 1 GHz
- › Stranded tinned copper conductors ensures high signal strength / data transfer
- › Grip connector increases connector reliability
- › Available in 0.5m, 1m, 1.8m, 3m, 4.5m, 7.6m, 12m and 15m lengths.

## Speaker Cables

- › High strand oxygen free copper
- › UL listed for use in riser (passes UL 1666 flame test) & UL 444 (cmr)
- › Superior pvc jacket with sequential meter & footage markers
- › Available jacket colours white, black & blue
- › Super durable box design with large mouth opening
- › Available jacket colours white, black & blue

# **audio pro** business

Audio Pro Business is a Swedish company specialising in premium wireless sound for stores, restaurants, bars and hotels. The all new DECT (Digital Enhanced Cordless Telecommunications) system provides a far greater wireless range for improved placement flexibility.

The Audio Pro Business speakers are as simple as they are innovative. They are connected to existing 240V spotlight tracks – not plug-n-play, but snap-n-play. The active speakers receive power from the track and the sound signal wirelessly. There's no need for cables, as the speakers are simply attached to the track where you want the sound.

Where a conventional retail sound system can take days to install, the Audio Pro Business is up and running in a matter of minutes.

Powered wireless SP-3 speakers and Sub-3 subwoofer

## vivitek NovoConnect

Novo Connectivity solutions allow users to wirelessly connect to the big screen from the laptop, tablet, or smartphone of their choice. Up to four users can share the same screen simultaneously, with up to 64 participants collaborating together. Innovative annotation tools make it easy for everyone to join in the conversation. Snapshot and wireless file sharing functionalities help keep everyone in the loop.

## vivitek NovoDS Digital Signage

Novo Digital Signage solutions offer an affordable, network-based digital signage solution which is ideal for creating dynamic visual displays for corporate or public spaces. Digital signage content can incorporate text, photos, audio, video, and web content in fully customisable configurations for a variety of environments. Easy to use, NovoDS Solution offers the convenience of updating content over the network or using a microSD card.

Vivitek, a brand of Delta, is a leading manufacturer of visual display, projection and presentation products. The company's line of digital projection and display devices incorporate the latest innovations and technologies to deliver superior performance for our customers.

### **Large Venue & High Brightness Projectors**

For Large Venue applications, Vivitek offers high performance projectors that can be relied on for any fixed installation or rental project. Vivitek has equipped them with easy installation features such as laser light source or dual-lamp switching technology, interchangeable lenses and colour wheels and edge blending / warping options.

Vivitek 4K DK8500Z large venue laser projector

### Home Cinema Projectors

Vivitek designs both video and entertainment projectors for everyday use as well as projectors for the most demanding cinema installations. Vivitek's 4K UHD home cinema projector provides the best image with the latest in video processing performance and HDR10+ high dynamic range support.

### Compact Pocket Projectors

The Qumi range of LED powered small pocket size multimedia projectors can project from a variety of devices including cameras, laptops, smart phones, tablets, USB flash drives and directly from their in-built memory. The projectors are MHL and WiFi ready, and incorporate an embedded media and document viewer for PC-less playback.
