Product Information

Product Name: Security Seals
Description: We offer a wide variety of seals to cover a large range of applications and requirements, from easy-to-remove seals to ultra-high strength seals with breaking strengths of over 45kg.

Product Name: X-Safe Tamper Evident Bags
Description: We now offer a range of tamper evident bags with various security levels depending on applications and requirements.

Product Name: X-Safe Tamper Evident Labels
Description: Security labels and tapes are specially designed adhesive stickers that provide evidence of unauthorised tampering. They are available in many adhesive types, for different purposes, and some may be personalised with printing for extra security.

Product Name: RadioSecure Electronic Seals
Description: The future is here! Whether to save on costs of disposable seals, or to enhance security via timely alerts, electronic seals have capabilities way beyond conventional seals.

Product Name: Leghorn e-Locks Seals
Description: Electronic seals are ideal for securing doors and latches where frequent access is needed. Instead of using a new disposable security seal for each access, the e-Lock generates a new random number every time the cable bolt is re-inserted.

Product Name: Reusable Bags
Description: Our security bags are a result of many years of experience in the tamper evidence industry. We stock a wide range of bags to cater for the many applications and industries that our bags are used in.
