

**Axis at a
glance.**

Adding new dimensions

for a smarter, safer world

We help people create a smarter, safer world by developing network solutions for improving security and finding new ways of doing business.

Our products and services include video surveillance and analytics, access control, and audio systems to help you understand and quickly respond to what you see and hear.

With tools based on sight, sound and analytics, you can anticipate incidents and influence customer behavior, increasing safety and security while optimizing your operations.

Together, we pioneer intelligent network technology, creating unique possibilities for our partners, end users and co-workers.

Axis in 1 minute.

Axis creates solutions based on

Staying ahead in a changing world

Our world is changing fast, and we make sure we stay ahead of those changes. We operate in the IT and Security markets and have extended into Audio/Video, VoIP and Building Automation markets. This evolution gives us and our partners new opportunities to find smart solutions to solve our customers' challenges.

Our beliefs

The Axis difference is our values, ways of working, and business conduct that set us apart from the competition – from pre- to post-sales.

Quality in everything we do

Quality is about making certain that everything we do is handled with care and that every choice we make is for our customers' and partners' best interests. Our solutions are based on open platforms to match other products and give the flexibility to expand solutions.

Cybersecurity – protecting data and assets

Effective cybersecurity is about assessing risks and consequences and taking appropriate steps. It's about products, people, technology and ongoing processes. We do everything in our power to mitigate risks.

We have strict requirements for our own products and work diligently with our partners, customers and other institutions to fight this threat.

Sustainability for a better world

Focusing on business conduct, social and environmental responsibility, we strive to minimize environmental impact, create a healthy working environment, eradicate corruption and ensure respect for human rights.

We implement sustainable business practices by adhering to the UN Global Compact and its ten sustainability principles, covering human rights, labor, environment and anti-corruption.

WE SUPPORT

Axis supports South African national parks
and helps protect rhinos from poaching.

The Axis advantage

Security is our business. Our experience working with network video and audio systems, analytics and access control contributes to the protection of people and property, process optimization, and increases business efficiency and information access.

Network video solutions

We offer the largest range of network video solutions including cameras and encoders, VMS and recorders, analytics and applications. Our IP-based portfolio reduces costs, ensures scalability and simplifies integration.

Access control solutions

We have open, scalable and flexible access control solutions that integrate seamlessly with other systems. Everything from identification and entry control to advanced access management.

Network audio systems

We offer complete, high-quality audio systems to improve security, make live or scheduled

announcements, or create ambience with great-sounding background music.

Our smart solutions benefit companies, retailers, schools, hospitals, banks, critical infrastructure and other organizations around the globe, making people feel safer and more secure.

Service and support

Axis Communications Academy offers an extensive range of training designed to prepare you for successfully working with Axis solutions.

Skilled technicians offer support wherever and whenever partners and customers need it.

Using the Axis cameras to collaborate and validate what the calls for service are allows the police department to be more efficient and more effective. This gives them more time to interact with the community, build a better rapport, which ultimately will have a positive impact on crime.
