

## Staff Location Analytics Anywhere, Anytime!

UniGuard is an advanced platform for streamlining your workforce, improving the delivery of your services to clients and saving on operating costs!

# All-In-One Solution

## LOCATION TRACKING

Keep track of user movements in real time utilising a range of data inputs from NFC and Bluetooth beacons, to GPS tracking to help ensure that everyone is in the right place, at the right time!

## NFC + BLUETOOTH

UniGuardX is compatible with both close range NFC tags and long range Bluetooth beacons to ensure you can capture vital information as efficiently as possible.

## TASKS

Create a multi-step, actionable and repeatable process for users to follow on the go. Include as many steps as you need along with photo attachments and user comments.

## GPS

UniGuardX automatically captures GPS data whenever and user event is submitted allowing you to track in real-time where data is being actioned to ensure location accuracy.

## ACTIVITY LOG

Users can create an activity log of activities without relying on hardware by submitting custom events that can include user comments, photos and GPS data to ensure all areas are covered.

## CUSTOM FORMS

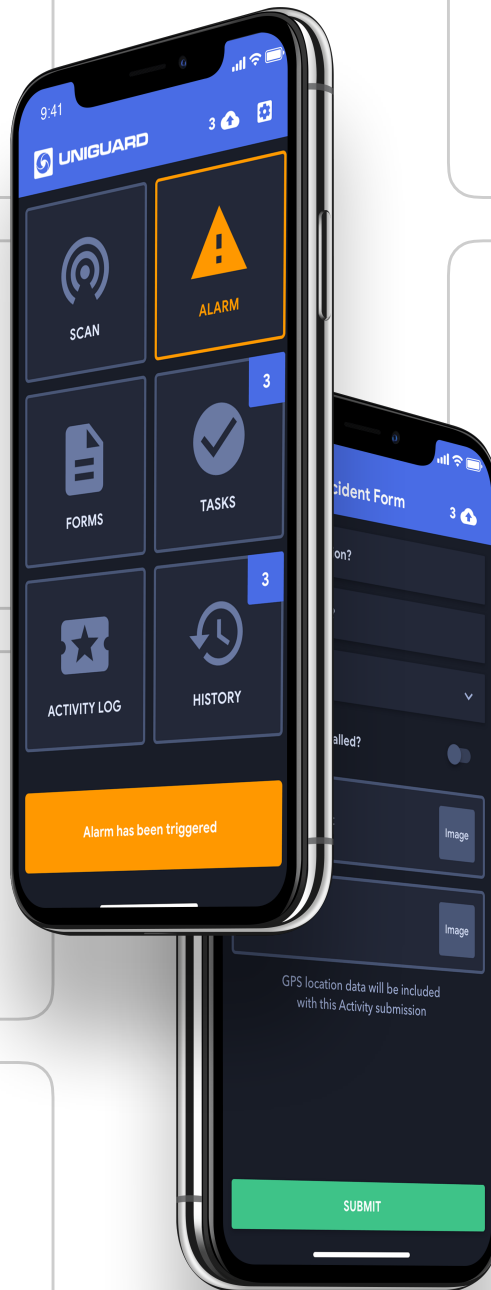

Create as many custom form templates as you need for users to submit on the go! Everything from Alarm dockets, incident reports, site audits and more can be captured in real-time.

## REAL-TIME ALERTS

Receive real-time alerts and notifications via SMS and email for events including man-down alarms, checkpoints scanned, forms submitted, tasks completed and more.

## MAN-DOWN ALARM

Users can quickly and easily trigger a man down alarm directly from their device that will alert dashboard users in real-time, as well as sending a custom message via SMS or email.

# Virtual Control Centre

UniGuard is your own 24/7 real-time virtual control centre to provide complete transparency over your operations.

## REAL-TIME ACTIVITY

Up to the minute activity from users including man-down alarms, completed tasks, submitted forms and more, all displayed at your fingertips via live activity stream or visually via live maps.

## LIVE MAPS

Rich location data from submitted events displayed at the users location in real time to ensure a quick and accurate response in emergencies, and accurate location data for important location visits.

## GRAPHS

Experience your reports like never before with super simple layouts and graphs to display your important information in an easy to understand way to ensure your entire team know what's happening just at glance.

## FORM BUILDER

Create as many custom form templates as you need including everything from Alarm dockets, incident reports, site audits and more can be captured in real-time, including photos and user signatures.

## SCHEDULED REPORTS

Quickly and easily schedule all of your reports to be automatically generated by UniGuard and delivered right to your inbox at your desired time and eliminate manual labour by not having to manually generate analytics.

## EASY TO USE

UniGuardX has been designed to be super simple and eliminate time consuming practices of the past by providing a clean, modern working environment to help you focus on your business
