3i Black Water contains a unique blend of Fulvic trace minerals resulting in a plethora of health benefits and a pH of 8.5+ Our product meets the demands of the modern health-conscious consumer by providing a fulvic supplement that replaces the lost nutrient content found in today's mass-produced foods.

Our water contains no fluoride, no chlorine, no sugar, no taste. That's right, just like water!

A great supplement for your diet.

Fulvic acid is a key component found in organic matter. It is created when organic matter decomposes in soil. Millions of beneficial microbes are released during this process, enhancing the healthy components of the substance. It contains a variety of beneficial nutrients and is considered as one of the most chemically active compounds in soil. That's what makes it black!

3i Black Water is dedicated to providing the community with an all natural product that promotes good health and wellbeing.

3i Black Water is proudly Australian owned and operated, dedicated to delivering a premium product to our consumers. The awesome benefits of our unique fulvic trace mineral blend in areas such as digestive health, cell hydration, nutrition absorption rates and maintaining a balanced pH is what makes 3i Black Water so powerful.

We use pure water that is free of the nasty chemicals found in tap water such as fluoride and chlorine, and combine it with our 100% natural fulvic trace mineral blend.
