

**BIG ASS FANS**

# THINK YOU KNOW BIG ASS FANS?

Our full product lineup might surprise you.  
Check it out inside.

## OUR PRODUCTS CHANGE LIVES

Our fans don't just move air—they also started a movement. Before Big Ass Fans came along, summer was grueling and unproductive in facilities where air conditioning was not an option.

Over the last 20 years, millions of people have been introduced to the benefits of Big Ass overhead fans for effective cooling, transforming spaces everywhere from airplane hangars to warehouses—even zoos!

## YEAR-ROUND COMFORT, ENERGY SAVINGS

Big Ass fans aren't just for summer. In colder months, they effectively destratify a space by mixing the warm air at the ceiling with the cool air at the floor. This helps save up to 30 percent on heating costs.

At Big Ass Fans, our bread-and-butter will always be industrial and agricultural spaces. We also make silent, beautiful fans for commercial and residential spaces that can reduce the cost of cooling up to 30 percent.

If it sounds like we solve problems, you're right. From developing silent fan motor technology to creating controls that monitor environmental conditions for constant comfort, we're all about finding new ways to meet customers' needs and make lives better.

# OVERHEAD FANS & CONTROLS

Get ultimate airflow while freeing up floor space. Big Ass overhead fans are powerful, efficient, and quiet and feature a range of control options that make year-round energy savings automatic, with performance that's as cool as it is convenient.

### Powerfoil® X3.0

Available in 2.4- to 7.3-metre diameters • Available intuitive BAFCon controller with SmartSense™  
• Hermetically sealed NitroSeal™ gearbox for zero maintenance • Wide static shaft allows for integration of additional options • Optional explosion proof motor • Equipped with redundant safety features

### Powerfoil® 8

Available in 2.4- to 7.3-metre diameters • Patented aerofoil system uses eight aerofoils and winglets for maximum coverage area • Middle-of-the-road option when superior performance is desired but a longer warranty isn't • Redundant safety features

### Essence®

Available in 2.4- to 4.3-metre diameters for ceilings as low as 3.8 metres • Silent operation • Customisable components and colour options • Delivers powerful air movement to indoor or outdoor spaces

### BAFWorks®

Controls lights, ventilation, and up to 32 fans from a single location  
• Intuitive software is simple to learn and operate • Automated scheduling and lockout capabilities
