This symbol indicates foods in this brochure that are low gluten. Low gluten foods contain no more than 20mg gluten per 100g.

Please note: these foods are not gluten free (which means there must be no detectable gluten present in the food).

Gluten is found in wheat and wheat varieties, rye, barley, triticale and oats. People with an intolerance or sensitivity to gluten may be able to tolerate small amounts of gluten and may choose 'low gluten' foods. However, people with coeliac disease have problems digesting gluten and are likely to look for 'gluten free' foods.

Please note: that low gluten foods will not remain low gluten if combined with ingredients that contain gluten (e.g. wheat flour).
