Company Profile

Providing Total Coffee Solutions

Australian Beverage Corporation was established in 2005 with the purpose of providing advanced coffee systems and solutions for corporate environments and the foodservice and hospitality markets. We are the exclusive importer and distributor of a niche stable of world class European and American coffee equipment and coffee related products.

As ABC became the preferred coffee solutions provider to several large markets including the Conference, Exhibition, up market hotel and large office operation, the business focused on developing a national presence with national service capabilities. We focus on developing long term relationships with our clients in order to guarantee their success and ultimately our companies success.

Our business model is to provide turnkey packages including tailored solutions with forecasted lifecycle equipment costs. We can provide the highest level of customer and technical service as we have invested in quality systems supported by world class technology.

ABC has a wide network of professional and dedicated distributors throughout Australia and as such are able to provide outstanding service and advice to the hospitality, cafe and corporate market. Our team has over 45 years combined experience in the coffee industry and understand every facet of coffee and its integration into operational success. Our team are members of the Speciality coffee association of Europe and America, ACTA and AASCA in Australia as well as judges on the Royal Agricultural Society and the CSR Golden Bean awards.

Everybody can be a **Barista**

wmf-espresso.com.au

Insert the portafilter, press the button and out pours a perfect espresso. Remove the portafilter and you are all done.

The WMF espresso measures all vital brewing parameters, grinds and tamps automatically. This system guarantees consistently high quality espresso, allowing everybody to be a barista. Add to this an exceptional control over milk and a reduction in workflow time, and you will see that the WMF espresso bridges the gap between two worlds.

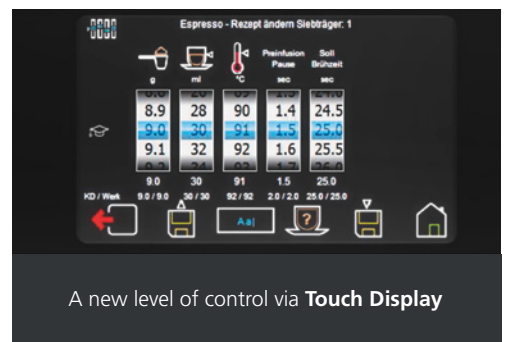

Handmade. Automatically.

2 x milk foam preparation methods - fully-automatic or traditional

Brewing time monitoring & software assisted grind adjustment

A new level of control via **Touch Display**

Steam Jet for centralised pre-heating of cups

The WMF espresso detects the portafilter automatically, controls the brewing time, signals when the grinding degree needs readjusting, grinds the coffee and tamps with 100% consistency.

An air-cooled bean hopper per group head

Heatable cup storage with soft closure

MAKE IT BETTER

Dalla Corte is the family that consistently furthers the technology behind the best espresso machines. The Dalla Corte espresso systems feature multiple boilers, unmatched temperature stability, superior energy efficiency and a myriad of advanced features the coffee machines raise the bar on quality and ensure consistent extractions.

With a myriad of features and auxiliary automated technologies the Dalla Corte espresso machine series ensures perfect coffee consistency, regardless of the operating conditions.

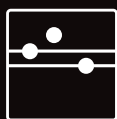

CONTROL. IN ANY ENVIRONMENT

GRIND CONTROL SYSTEM

The Grind Control System gives guaranteed and consistent coffee grind quality through automatic electronic adjustment of the grinder by the coffee machine. This is propriety to Dalla Corte and is the only system of its kind on the market.

+

DIGITAL CONTROL SYSTEM

The Digital Control System is integrated into the front of the Dalla Corte espresso machines and grinders, and gives complete control over the individual boiling units, maintenance cycles and economic parameters.

+

MILK CONTROL SYSTEM

The Milk control system is an automatic steam arm that creates perfectly steamed and temperate milk at the press of a button. It has an integrated thermometer and its design leaves the milk silky smooth through its self vortexing motion.

DALLA CORTE

Meet your high volume coffee and specialty beverage demands

BUNN is one of the biggest providers of coffee and beverage equipment and associated services globally. With a multitude of high quality equipment lines, global OEM agreements, and a company network that stretches several continents, the BUNN brand is synonymous with quality and A Partner You Can Count On®.

Within Australasia ABC import, distribute and service BUNN equipment; including filter coffee brewing systems, specialty coffee equipment and beverage mixing systems. With our service network strength and product knowledge, we can design and implement tailored BUNN solutions for clients within the Australasian market.

Foodservice Coffee Systems

High volume brewing equipment that gives operators control and consistency through smart brewing technologies, and patrons fresh and high quality brewed coffee. For venues with 30 PAX to 3000 PAX, there is a BUNN system to suit.

Specialty Coffee Equipment

BUNN have helped pioneer filter brewing technologies in the specialty coffee market. From the innovation of the Trifecta Air Infusion system, to helping develop the SCAE Gold Cup standard, BUNN has been at the forefront of development and offers the market practical and durable coffee equipment.

Beverage Systems

BUNN have innovative technologies in beverage mixing and dispensing, that minimise waste and maximise quality of product and output. From fresh juice concentrates and BIB systems to Dairy and juice based iced products, there is a BUNN system to suit.

Behind every great cup

The success of Urnex is built on finding smart ways to keep coffee clean and delicious. From the very beginning, we've worked collaboratively with professionals in the coffee business to make sure nothing gets in the way of the customer's experience. The Urnex Portfolio is divided into categories, so it is easy to select the correct cleaning product for your needs.
