EFFORTLESS, CONTEMPORARY FITOUTS

DECO specialises in high-quality, decorative aluminium finishes and products, designed to enhance the exterior and interior of shops, cafes, restaurants and more. Using innovative sublimation finishing technology, we create and supply lightweight, durable solid aluminium building products with a realistic timber-look finish, giving you the beauty of natural wood, with minimal maintenance.

DecoArt, DecoSplash and DecoSign are our collection of custom finishes, reproducing almost any image for long-lasting decorative displays, kitchen splashbacks and signage solutions.

SURFACE TECHNOLOGY SOLUTIONS

DECO offers an unrivalled range of finishing processes and surface treatments for the baking and food processing industries, including anodising, hard anodising, Teflon coating, seasoning and blasting. Restore your baking trays, pans and more to good-as-new condition with our effective recoating services.

EFFORTLESS, CONTEMPORARY FITOUTS

STUNNING CONTEMPORARY STYLE

Battens are a popular architectural trend, with clean, contemporary lines and a simple yet elegant appearance that can enhance any store front. DecoBattens are beautiful, timber-look solid aluminium battens, perfect for adding a decorative feature wall to the outside of your cafe, a stunning screen inside your restaurant, a sweeping canopy or even an unusual ceiling feature. The possibilities are limitless. DecoBattens are lightweight, making it easy to install on high walls or ceilings, and their durable powder coated finish means they will never require painting, staining or oiling as with real timber battens.

DecoBattens come in a wide range of sizes, and can be installed horizontally, vertically or in mismatched sizes to create waves and other decorative effects. A special two-piece ‘click and snap’ option is available for quick installation and hidden fixings, creating a seamless timber look all the way round.

EASE MEETS ELEGANCE

DECO’s multi-purpose aluminium slat system is excellent for screens, shades, fences and gates, or can be used as a decorative feature on the exterior of your cafe. The natural timber appearance of DecoSlat can complement your brand colours, and be combined with brick to create a rustic effect, or with concrete for a modern, urban aesthetic. Its long, straight lines are excellent for creating modern architectural designs, and creating freshness and vibrancy for your brand, while the warm timbergrain look can create a friendly and comforting atmosphere for customers. Available in 30 natural woodgrain colours achieved through sublimation technology, DecoSlat is a durable fitout option that you will never need to maintain.

DecoSlat is available in a large range of sizes, and the spacing between the slats can be customised for a personalised design. Space your slats close together to create an attractive screen, or apart to create a stunning window shade or wall feature.

TIMBER-LOOK ALUMINIUM WINDOWS, DOORS, CAFE BIFOLDS AND MORE

Timber bifolds and window frames look beautiful, but in a busy hospitality environment, it can be difficult to find time to maintain them. When timber window frames are exposed to frequent wear and tear in a busy café, they can deteriorate quickly.

DecoWood, our premium timber-look finish, solves all these problems, adding a stylish, natural aesthetic to your store without the added hassle of repainting. Applied using sublimation technology that penetrates the depth of the powder coating, the DecoWood finish will not peel or wear off, meaning your staff can open and close your windows, doors, blinds or bifolds multiple times a day with only minimal wear. DecoWood is also created using a Super Durable™ powder coating, designed to withstand the elements, allowing it to be used in coastal areas, urban areas or areas with high UV index, without losing its stunning timber appearance.

For an attractive yet effortless shop fitout, which can withstand the elements and the hustle and bustle of café life, DecoWood is the perfect choice.

ENDLESS DESIGN POSSIBILITIES

DECO's photo imaging sublimation technology allows you to accurately reproduce your chosen image, design, photograph or logo onto almost any aluminium extrusion or shape. Use DecoArt to create custom murals or panels for your store, or to apply an image or pattern to an unusually-shaped aluminium extrusion to add character to your store and reflect your brand. Our DecoSign product, part of our DecoArt range, allows you to reproduce the name or logo of your business on a low-maintenance, long-lasting aluminium sign.

With a durable, UV and salt spray resistant powder coating, DecoArt and DecoSign are designed to last even in the harshest coastal or urban conditions. The polyurethane powder coat used is also graffiti-resistant, so you can create the perfect branding for your store without deterioration or damage from spray paint. Any paint applied to DecoArt or DecoSign can be cleaned off easily with a damp cloth.

REVOLUTIONARY SPLASHBACK DESIGN

Tired of cleaning grout between tiles? In a busy hospitality environment, it can be hard to find time to thoroughly clean a kitchen splashback. DecoSplash is the answer to all your prayers. This powder coated, solid aluminium splashback is hygienic and easy to clean – its smooth, non-stick surface can easily be wiped down with a damp cloth. DecoSplash is also available in an antimicrobial powder, for extra protection against a buildup of bacteria.

Choose from a wide range of splashback designs, and achieve the look of brick, tile or wood without the need for excessive cleaning – or use your own photograph or design to promote your brand's unique personality and aesthetic. Your image will be baked into the splashback powder coating using unique photo imaging technology, rendering it durable and unable to peel off.

Safety – both yours and your customers' – is paramount in any kitchen, and as a solid aluminium product, DecoSplash is completely non-combustible and can be applied behind any cooktop without the need for a stainless steel panel. The aluminium also dissipates the heat across the surface, preventing hot spots and rendering your splashback safer to touch when cooking.

ASK ABOUT OUR OTHER SUPER DURABLE DECO PRODUCTS

DECOCLAD

Give your store a stunning natural look and feel with DecoClad, our durable, timber-look solid aluminium cladding. The natural timber tones of DecoClad create a warm, inviting atmosphere for customers, suitable for adding a friendly touch to a city restaurant or a rustic feel to a country café. DecoClad is available in five different profiles, each imitating a real timber cladding profile but without the need for oiling, staining or painting, keeping your store looking stunning with minimal maintenance and giving you more time to spend with your customers.

DECODECK

Perfect for al fresco dining areas, DecoDeck is a realistic timber-look aluminium decking, minus the need for regular staining. DecoDeck is easily installed with a simple clip system, saving you on time and labour costs. Its durable powder coat finish is resistant to scratches and scuffs that occur with regular foot traffic, and corrosion-resistant, making it perfect for beachfront restaurants. DecoDeck uses a special, slip-resistant powder in its coating, making it easy to walk on.

DECOCRETE

Embrace the contemporary industrial trend and make your store stand out. Create a raw, urban aesthetic with DECO's newest finish, DecoCrete. Created using sublimation technology, DecoCrete combines the modern, industrial chic look of polished, light and charcoal concrete with the easy installation of aluminium. The DecoCrete finish is available for DecoClad, DecoBatten, DecoSplash and DecoSlat. Combine DecoCrete with DecoWood products to achieve the ultimate modern look.

PROTECT AND ENHANCE YOUR COOKWARE WITH OUR DURABLE COATINGS

TEFLON COATING

If you find the non-stick coating wearing off your pans, baking trays or moulds, DECO has the solution. Refurbishing and recoating your pans in new Teflon is quick, breathes new life into your cookware and prevents you scouring suppliers for a replacement for your custom shaped trays.

ANODISING

An alternative to Teflon, anodising is becoming a popular way of adding non-stick properties to your aluminium cookware. In addition to its durability and corrosion-resistant properties, anodising gives your pans a sleek, chrome-look finish.

BLASTING

Strip the rust and grease from your cookware with DECO's abrasive blasting services. Clean your pans and restore them to like-new condition, or blast them as a pre-treatment before they are coated or seasoned.

HIGHLAND SPRING

AUSTRALIA’S BOLDEST COOL CLIMATE WINES

***L**ocated in the cool climate region of NSW Southern Highlands, Highland Spring is a winery like no other. The rich, red basalt soil and crushed limestone found in the region, combined with a permanent natural spring, foster optimal growing conditions for a robust grape.*

With a passion for creating superb wines and a love of the Southern Highlands landscape, Highland Spring produces the finest quality cold climate Pinot Noir and Pinot Gris, with a rich, unique flavour and notes of fruit and fresh, cool air.
