## 100% ORGANIC

We play a major role in Organic food industry as a processor and exporter of quality products while fulfilling the requirements of buying partners. We assure you that our products are 100% organic because we maintain the estates from where we take raw nut & ensure you the organic quality from the beginning of the seedling to the final nut.

# éconutrena

Jaindi Exports (Pvt) Ltd was founded in 2003 as a small scale organic coconut milk production company by the present managing director Mr. Sampath Anuruddha. Initially the production was limited to 500 cans per day by a few employees using basic technologies, with the increasing demand and expanding international markets, we are compelled to expand our production resulting in shifting to state of the art manufacturing factory in Dankotuwa industrial estate. Currently we possess 20 production sections and more than 15 filling lines processing over 600 000 nuts a week in addition to king coconut.

We are manufacture & supply processed coconut based products in the form of bulks to international wholesale buyers and some small percentage to direct consumer markets in developed countries. As sustainability oriented organization, we ensure all our products are 100% organically sourced, processed, produced and packaged protection the nutritional compositions of the original coconuts & spices. And we heavily emphasize the value of fair trade for the businesses, communities and the consumers alike in the long run. Thus, we have integrated fair trade as the main policy of the company which would yield multi-dimensional value to everybody involved.

The premium quality of our products has been tested and certified by the international food quality controlling & standardizing bodies such as **BRC, ISO 22000:2005, GMP, HACCP, KOSHER and HALAL, and also we are certified by EU, JAS, USDA-NOP, FAIR TSA and FAIR TRADE FLOW-CERT.**

We maintain large 100% organic coconut estates controlled under our company ICS, ensuring the quality from the beginning of the seed to the final packaging. And we follow traditional organic pest control methods for our estates to make a better organic and environmental friendly process.

We have implemented Microbiology laboratory with all the testing facilities related to our products testing with well-trained qualified staff. Our chemical laboratories and in line testing laboratories controlled under the well trained and qualified staff guarantee the quality and the hygiene of the econutrena products.
