Radiologist identifies high-risk PE (RV:LV > 0.9)
Calls switchboard
Switchboard operator notifies:
1. CCOT RN/RT
2. CCOT Intensivist
3. Interventional Radiologist
4. Ordering MD
CCOT assesses and risk-stratifies patient
Medical Hx, vitals, laboratory, imaging
Multidisciplinary conference hosted by CCOT Intensivist
For submassive & massive PE, consider systemic thrombolysis, catheter-based intervention, open embolectomy, ECMO
Book catheter-based/open embolectomy through OR desk for cardiac anesthesia
Undergo interventional therapy
ICU
Ward/HAU/Home
Long-term follow-up
- Hematology
- Repeat echo, PHTN team as necessary
