

	Overall	Low Risk	Submassive Low Risk	Submassive High Risk	Massive
n	128	3	42	69	14
Treatment No.(%)					
Therapeutic Anticoagulation	96 (75)	3 (100)	40 (95)	51 (74)	2 (14)
Advanced Reperfusion Therapy ^a	29 (23)	0 (0)	0	18 (26)	11 (79)
Outcome No.(%)					
3-month Mortality	12 (9)	0 (0)	4 (10)	5 (8)	3 (21)
Major bleed ^b	10 (8)	0 (0)	0 (0)	5 (7)	5 (36)

Table 3. Treatment and Outcomes by PE severity.

^aAdvanced reperfusion therapy defined as therapeutic anticoagulation in addition to one or any combination of: systemic intravenous thrombolysis, catheter directed thrombolysis, suction thrombectomy, veno-arterial extra-corporeal membrane oxygenation.

^bMajor bleed: fatal, critical location, Hb decrease ≥ 20 g/L, or requiring ≥ 2 units pRBC (International Society of Thrombosis and Haemostasis).
