

**TITLE: Introduction to Ripple Effects Mapping**

**DATE: October 16, 2019**

**SPEAKER/PRESENTER: Dr. Scott Chazdon**

Unexpected things

- Higher ground going against world of corporate interest that are hell-bent on development and flooding people
- University institute stacked with developers

Observation: Ripple Mapping

- Would be ideal to hear from a community group/organization who went through the process and found value
- Are there resources available to carry out ripple mapping? Grassroots groups often don't have money for outside facilitators (or access to), commuter savvy data gathering, compilation and coding
