**Biography**

Glenn Griffin is Director, Supply Chain (Generation) for Entergy. He has responsibility for Supply Chain operations and tactical procurement for Entergy's Nuclear and Fossil units. Glenn has worked in the electric utility industry for over 30 years. He is a Mississippi State alumni and a graduate of Belhaven University.

**Abstract – NSCSL Update**

“The Nuclear Supply Chain Strategic Leadership (NSCSL) group provides a forum for nuclear utility supply chain leadership to share best practices, execute common initiatives, and to establish an industry-wide community of practice. This session will provide an update on recent and current NSCSL initiatives. We will discuss the group's efforts in supporting INPO in development and implementation of new Performance Objectives and Criteria that assess Supply Chain's contribution to improving equipment reliability; with a focus on Supplier Performance Management and Enhanced Procurement Requirements for Critical Spares. We will also review common industry Supply Chain Performance Indicators and discuss the results of a recent joint Equipment Reliability Working Group / Supply Chain meeting at INPO.”
