

## **Hospital Israelita Albert Einstein achieves HIMSS Analytics EMRAM Stage 6**

*Sao Paulo, Brazil (26 June 2017):* Hospital Israelita Albert Einstein has been awarded EMRAM Stage 6 by HIMSS Analytics. The hospital joins 12 other Brazilian hospitals that are currently on EMRAM Stage 6 with Hospital Israelita Albert Einstein now being number 13 to having achieved this prestigious status of Electronic Medical Records Maturity. With 634 beds, the hospital is fully paperless in terms of clinical information. Its outstanding Electronical Medical Record was developed by Cerner.

Ricardo Santoro, CIO, Hospital Israelita Albert Einstein: Hospital Israelita Albert Einstein does an intensive use of technology with the goal of improving operational processes and patient security. To obtain the HIMSS Stage 6 certification only four months after the implementation of a complete EMR assures us that we are doing our activities with quality and that our patients and workers can benefit from the best worldwide standards.

Hospital Israelita Albert Einstein representatives were awarded at HIMSS@Hospitalar, which took place in May 2017 in Sao Paulo, Brazil.

John Daniels, Global Vice-President, HIMSS Analytics: "Hospital Israelita Albert Einstein is well on its way towards achieving a near paperless EMR environment. They have invested in and are using information technology to strengthen their already impressive clinical decision support capabilities and medication management processes."

The EMR Adoption Model (EMRAM) is an eight stage system that measures digital maturity in a hospital, with 0 the lowest and Stage 7 the highest level. Achieving EMRAM Stage 6 reflects that the hospital is well on the way to achieving a fully paperless patient record environment and using Information Technology in a smart way to improve care quality, safety and efficiency.

### **About HIMSS Analytics**

About HIMSS Analytics in Latin America

Based on individual needs of healthcare providers, governments, software providers or consultancies, HIMSS Analytics offers tailor-made advisory services tied to the digitisation of health and care delivery in collecting and analysing data to turn them into actionable results. HIMSS Analytics services include benchmarking, maturity model assessments, market research and advisory services.

HIMSS Analytics has created the EMR Adoption Model (EMRAM), an 8-stage model that allows hospitals to track their progress you to track your progress towards a paperless environment. EMRAM identifies the level of electronic medical record (EMR) capabilities in hospitals, ranging from limited ancillary department systems through a paperless EMR environment. Currently, Latin America has fifteen certified Stage 6 hospitals, twelve of which are in Brazil, two in Argentina, and one in Chile.
