

HANDS ON GUIDED SURGERY WORKSHOP

DIGITAL WORKFLOW IN IMPLANT PLACEMENT

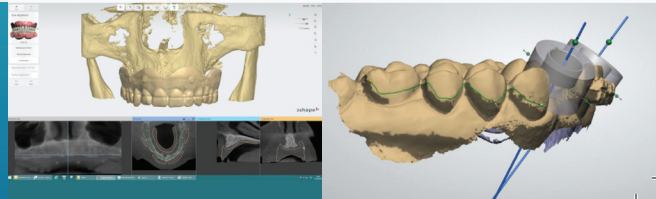

DR. ROB ANDREW

THIS IS A HANDS-ON WORKSHOP ON THE DIGITAL WORKFLOW FOR COMPUTER-GUIDED IMPLANT PLACEMENT AND RESTORATION IN TODAY'S GENERAL PRACTICE.

Our focus is on users who wish to implement guided surgery into their practice. We will detail the specifics of data acquisition, record taking and secure electronic submission of information through multiple live 3D planning sessions. Design and manufacture of the resulting guide will allow participants to place their own implants using the actual surgical tooling and following the streamlined placement protocols. The workflow of the restorative intra-oral scans using digital scan bodies will take us to the completion of each case scenario.

Rob moved to Edmonton, Canada from South Africa in 1999 after completing the Canadian equivalency exam at the University of Alberta. He studied dentistry at

the University of Stellenbosch near Cape Town and graduated in 1986. Passionate about dentistry he also completed a 2 year post graduate diploma in esthetic dentistry at the same University in 1997 and a mini-residency in orthodontics and temporomandibular disorders in 2004.

Rob has served as both director and President of the Edmonton and District Dental Society for 7 years and as a Volunteer Preceptor at the Shine Dental Clinic in Edmonton.

When not working, Rob's hobbies include playing golf, painting, traveling (77 countries and counting), and spending time with his family and exotic pets.
