State of the mortgage market

- Overall mortgage performance steadily improving, but still not 'normal'
- Underwriting is relatively tight
- New originations performing best in 20 years
- Legacy loans remain a large risk
- Price gains have built home equity

Mortgage performance improving

Serious delinquency rate

Distressed sale share

Negative equity share

Foreclosure starts

In which dimension is credit constrained?

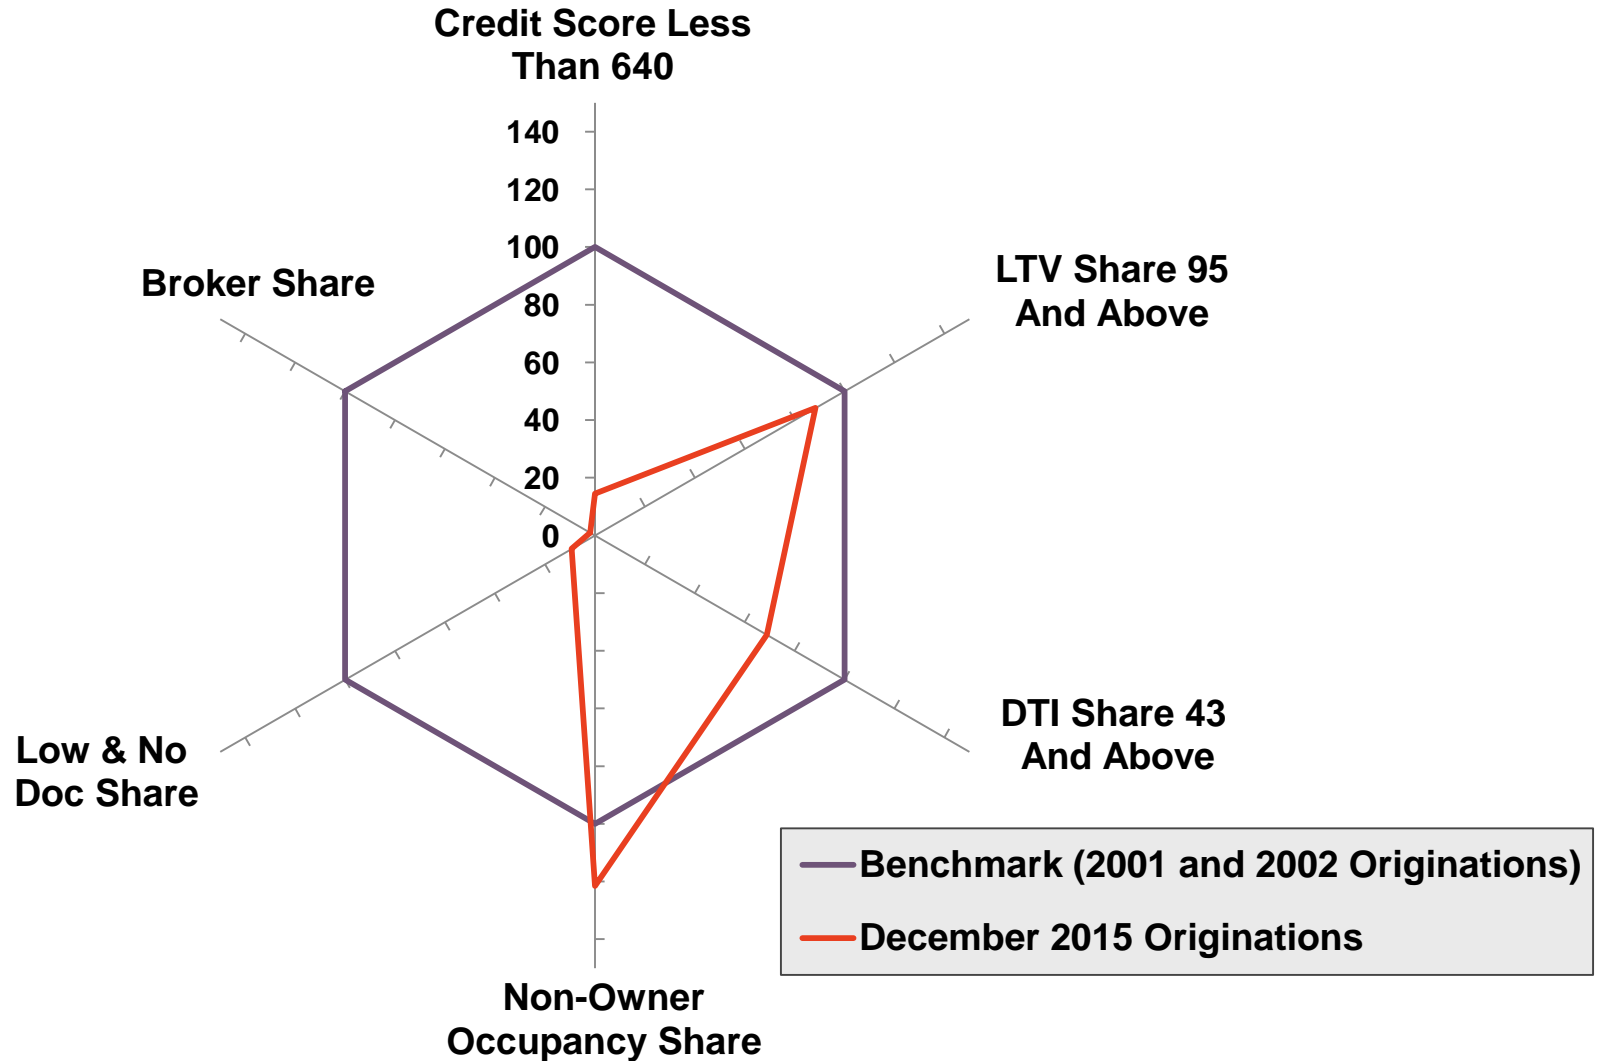

Mortgage underwriting along six dimensions for purchase loans

In which dimension is credit constrained?

Mortgage underwriting along six dimensions for purchase loans

Housing Credit Index

- Uses principal components to measure variability of mortgage underwriting characteristics
- Utilizes CoreLogic prime and subprime loan level servicing data
- Index is benchmarked to 2001-2002
- Inputs include:
 - ▶ Origination credit score
 - ▶ Origination loan-to-value ratio (LTV)
 - ▶ Debt-to-income ratio (DTI)
 - ▶ Broker share
 - ▶ Owner-occupancy status (owner vs. investor)
 - ▶ Documentation type (full, low, no)

Underwriting remains cautious

Debt trends of consumers with open first mortgage

Renaë Sherman

Trended analysis

Analysis covers three specific time periods

- Dec 2005 (pre-recession)
- Dec 2008 (recession)
- Dec 2015 (post-recession)

Data approach:

- 10% sample (weighted up)
- Recently opened first mortgages

VantageScore® 3.0

Model overview

- Predicts risk of borrower
 - ▶ Likelihood of future serious delinquencies (90 days later or greater)
 - ▶ Any type of account
- 24-month performance
- Score range of 300–850
 - ▶ Higher scores represent a lower likelihood of risk
 - ▶ Lower scores are higher risk

A = Super-prime 781–850

B = Prime 661–780

C = Near prime 601–660

D = Sub-prime 500–600

F = Deep sub-prime 300–499

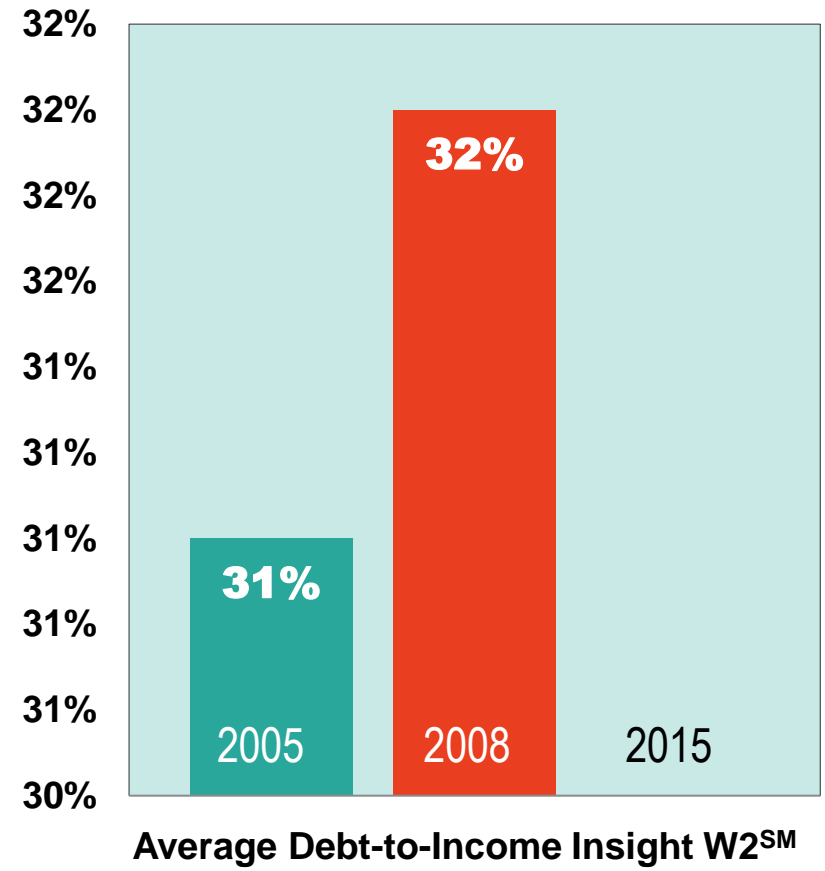

VantageScore® by score band compared across time periods
