

# Alcon invites you to join them for a breakfast presentation in conjunction with Australian Vision Convention 2013.

## Science of friction - The importance of surface and optical technologies for patient outcomes

Speaker: **Dr Jason Miller** OD MBA FAAO

Dr. Miller received his O.D. degree from The Ohio State University College of Optometry in 1999, and has since finished his MBA degree in May, 2006. He is a partner in a private practice in Powell, Ohio and he is an adjunct faculty member for The Ohio State University College of Optometry. In addition, he is currently in leadership roles with the Ohio Optometric Association.

Dr. Miller has consulted, lectured and performed research in a wide variety of eye care areas, including contact lenses, myopia control and dry eyes. Dr. Miller is an ABO, NCLE and COPE approved speaker and has been published in many of eye care national publications, including a regular monthly column on contact lens care.

Within his community, Dr. Miller is active in the Olentangy Rotary Club and has participated in an international eye care mission trip to El Salvador.
