

How to Put Your Meaningful Use Program Into AutoPilot

AMGA

April 3, 2014

Presenters

- **Teresa Hall**

Director of Outcomes Improvement and Reporting
Intermountain Medical Group

- **Beth Houck**

Vice President, Client Services
SA Ignite, Inc.

Intermountain Healthcare

- ***Integrated healthcare system***
 - ***Employed Medical Group Physicians***
 - ***Hospitals***
 - ***Insurance plan***
- ***Intermountain Medical Group***
 - ***Nearly 1100 physicians and 275 mid-level providers***
 - ***Multi-specialty group of 35 different specialties***
 - ***223 clinics, including urgent care***

SA Ignite

- **MU Assistant®** - automates, accelerates and simplifies MU management and reporting for Eligible Providers
- Key **Milestones**
 - 5,000+ MU attestations
 - \$70M+ MU incentives captured
 - 50+ clients using 13 different EHR brands
- 2013 **Fierce Healthcare Innovation Award** for cloud computing

Presentation Overview

- A. What does “auto pilot” mean?
- B. Why is it important?
- C. “Auto pilot” dimensions
 - Organization and roles
 - Change Management
 - Role Clarity
 - Attestation Process
 - Audit Preparedness
- D. Results
- E. Lessons Learned

A. What does Auto-Pilot Mean?

Two key dimensions:

- ① Everyone **understands what their role is** in meeting MU Requirements
- ② Everyone **knows where to find the information** needed to monitor performance and understand 'what counts'

① Everyone **understands what their role is** in meeting MU Requirements

- **Physicians** review their performance and document in coded fields
- **Staff** support physicians with documentation whenever possible
- **Clinic Managers** monitor performance and help staff modify workflows to improve underperforming areas

② Everyone **knows where to find the information** needed to monitor performance and understand 'what counts'

- **Timely reports** and Physician **Dashboards**
- Easy to access **reference material** and resources
- Avenues to share **Best Practice**

Access to Information

Timely Reports	Reference Materials	Best Practices
Example <ul style="list-style-type: none"> Director's Report Problem details 	Example <ul style="list-style-type: none"> Dedicated MU Sharepoint sites Leverage of existing information forums (e.g. Physician's meeting) 	Example <ul style="list-style-type: none"> Avenues for sharing best practices

B. Why is auto-pilot important?

One key reason: **Competing Resources**

- ICD 10
- PQRS
- Value-based purchasing programs
- Risk sharing payment contracts
- Internal quality quality improvement
- Core measures
- NCQA recognition

Other Drivers

- A program, not a person
 - Organizational risk if someone leaves
 - Depth of knowledge across the organization
- Reduce dependency on key staff
- MU is not going away

C. Dimensions of Auto-Pilot

- Organization and roles
- Change Management
- Role Clarity
- Attestation Process
- Audit Preparedness

Organization and Roles

Centralize

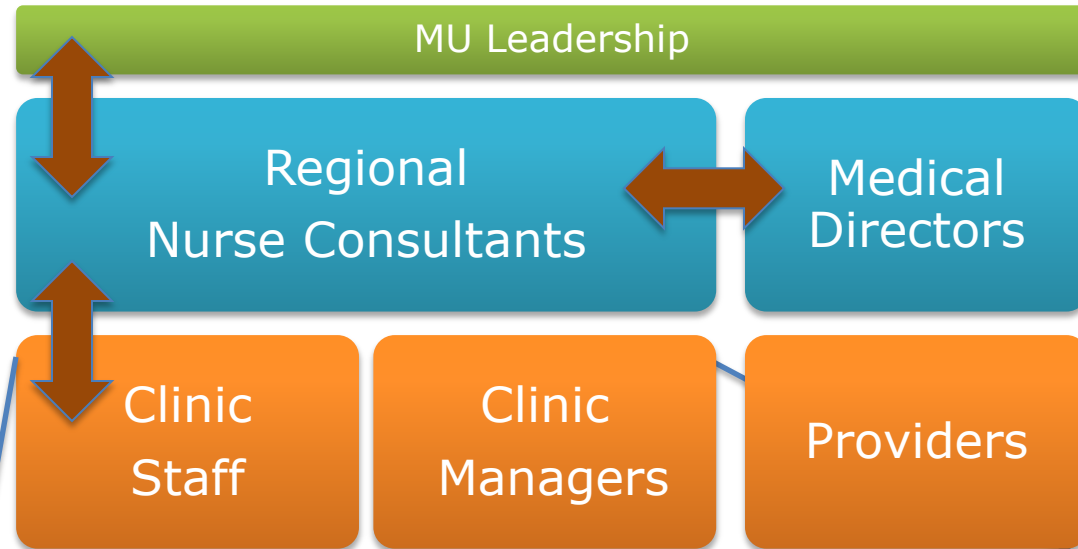

- Data interpretation
- Analytics
- Surrogate roles
- Attestation
- Audit preparation

Decentralize

- Performance monitoring
- Workflow adaptation

Clinical Team Roles

Key Role

- Organizational bridge
- Surface issues
- Identify gaps
- Share best practice

Analytics Team Roles

Administrative Team

MU Steering Committee

Meaningful Use Lead

Sr.
Administrative
Director

Surrogate
Team

EHR Team

Nurse
Consultants

Reporting
Analyst

Change Management

- ① Performance Management
- ② Data Management
- ③ Organizational Hand-offs

Performance Management

Data Management

Data management is the development and **execution** of architectures, policies, practices and procedures in order to **manage the information life cycle** needs of an enterprise in an effective manner.

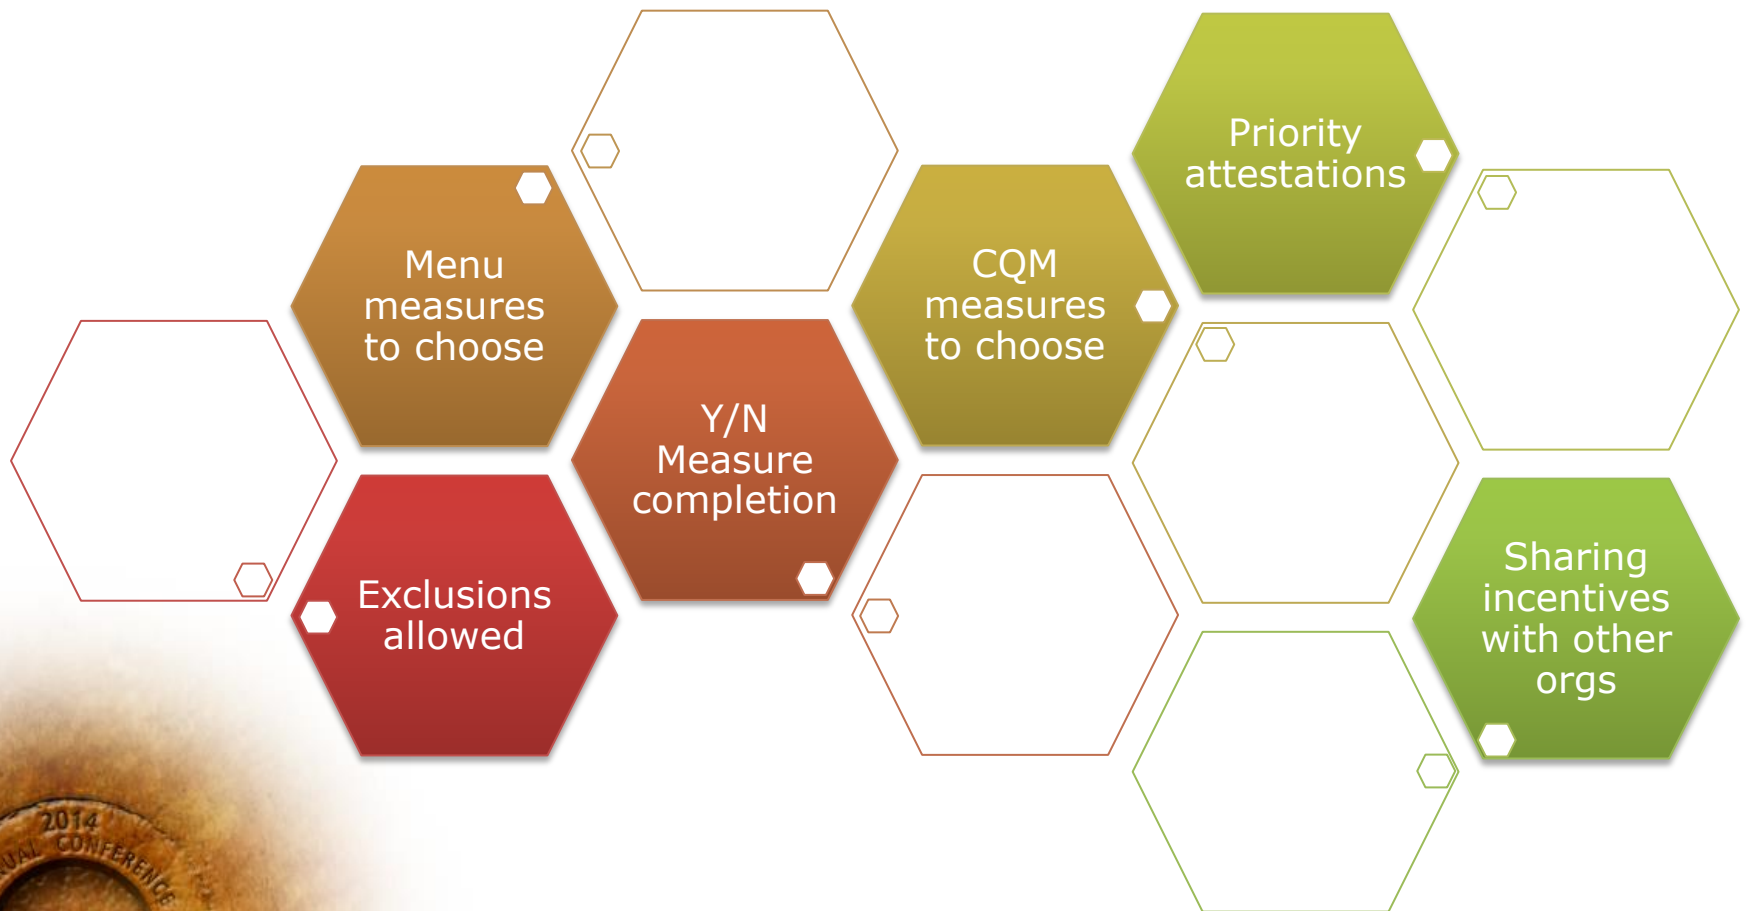

Managing Provider Profile

Managing Providers' MU Performance

Organizational Data Policies

Data vs. MU Clock

- Goal 1: Maximize incentive dollars
- Goal 2: Minimize audit risk
- Provider-based rules
- Medicare clock keeps running

Organizational Hand-offs

Okay to
Attest

- Eligibility confirmed
- Permissions granted, if applicable
- Proxy accepted

Compliant

- Program defined
- Payment year confirmed
- Compliant based on standards

Attest

- Review audit materials
- "Press the button"

Monitor \$

- Confirm payment
- Review outliers
- Reconcile money

Audit Readiness

- Prepare for “when not if”
- Checklists of items and storage strategy
- Response process
- Outlier data
- Audit and organizational structure

Audit Tips

- Dry Run
- MU Governance Structure
 - Multi-disciplinary
 - Decision-making rights
 - Data management (e.g., who decides what counts?)
- Audit Point Person
- Network with your colleagues

D. Results

80%

2012

97%

2013

PULL

From push

Resource Efficiency

MAX (Incentive\$)

MIN Penalties

MIN Audit Exposure

MIN Resources

Lessons Learned

- Centralize enrollment and attestation
- Depth in essential roles
- Data-driven iterative process
 - Medical Informaticist role
 - Improves data quality
 - Builds organizational trust
