

Tom Dawson MB.ChB., DPhil (Oxon) – Ensom Co-founder

Joe Killen – Ensom Co-founder

Why Ensom?

Standards and Interoperability

- Controlled by consortia with multiple vested interests
- Difficult to navigate
- Require specialist skill sets
- Inconsistent accessibility
- Variable utility
- A practical implementation framework is needed

Solution

- Ensom digital health and care framework
- Point to protocols, guides, standards
- Identify areas of need or opportunity
- Accessible to all stakeholders – four levels
- Clear objectives and principles
- Collaborative and dynamic

Findings

- Digital healthcare protocols and standards are fit for purpose. Practical guides are now needed.
- Digital telecare protocols and standards are not fit for purpose. Work is needed.
- IoT-Med needs work, especially around trust
- Digital PROMs and ORMs are an area of future opportunity

A DIGITAL TELEHEALTHCARE
INTEROPERABILITY FRAMEWORK
