/ Afternoon Sessions

Wednesday 11th & Thursday 12th, September 2013

Communications Sessions 13:45–15:00 / 15:15–16:30 / 16:45–18:00

The conference includes 3 sessions of oral communications about 6 themes:

1. Environmental changes, Globalisation, Urbanization: new health challenges:

Globalisation consequences (ex: emergence and spread of diseases, mass production and distribution of consumer products, changes in transportation systems, new economic models, etc.)? What are the consequences of environmental changes, including climate change? What are the consequences of new urban ways of life?

2. Urban Dynamics and Health: What are the links between urbanization processes and health? Between urban dynamics and health dynamics? Between cities' socio-cultural landscapes and health inequalities? Considering the diversity of urban situations, does an "urban health" exist?

THURSDAY SEPTEMBER 12TH, 2013

8:30

ROUND TABLE 1 - WHAT INTERSECTORIAL APPROACHES IN URBAN HEALTH?

P. **Voir**, Chairman of the French network "cities & Health" - WHO, France

Pr. F. **Barten**, ISUH, The Netherlands

V. **Le Torrec**, Deputy Mayor in charge of Health, City of St Denis, France

Pr. S. **Rican**, Paris Ouest University, France

A. **Feltz**, Vice-President of the Urban Community of Strasbourg, France

J-M **Le Guen**, Deputy Mayor of Paris in charge of Health, France

+ Interactive Debate/questions

10:00

Break

10:30-12:30

CONFERENCE 2 - MULTIDISCIPLINARY CROSS-PERSPECTIVES ON URBAN HEALTH

Dr. J-P. **Goubert**, Historian, EHESS, France

Pr. H. **Leridon**, Demographer, French Academy of Sciences, France

Pr. H. **Ayad**, Urbanist, Alexandria University, ICSU, Egypt

Pr. A. **Diez-Roux**, Epidemiologist, Michigan University, ICSU, US

Pr. Y. **Zhu**, Environmental Sciences, Chinese Academy of Sciences, ICSU, China

12:30-13:45

Lunch, posters

** (subject to certain conditions)*

3. Urbanization and Health Care system: What are the links between urban dynamics and health care systems? Is health care accessibility fair and universal? What are the determinants of accessibility? What model of organization for health Care systems should be promoted: Primary health care, medical demography, networks of care, transport, financing, etc?

4. Urbanization and "Health System": How intersectorial approaches between main determinants of health (i.e school, housing, sanitation, gender, etc.) can be promoted? What is the basis for a health policy in urban areas, what is the modus operandi? How should the management of this policy be implemented? What kind of democratic control over public policy should be implemented? How can it be assessed?

5. Methodology, Surveillance and monitoring of health inequalities and their determinants: Data collection and Information systems. Urban Health Observatories: experiences, uses. Systems analysis and modeling approaches. Qualitative and quantitative Methodologies.

6. Training and skills for: researchers, health practitioners, actors, decisions makers, stakeholders? What new multidisciplinary fields will emerge for specialists of "health territorial diagnosis"?

FRIDAY SEPTEMBER 13RD, 2013

8:30

ROUND TABLE 2 - COLLABORATION BETWEEN RESEARCHERS AND DECISION-MAKERS

C. Evin, Head of Regional Health Agency, Ile-de-France region, France
C. Bradshaw, Former Minister and former Member of Parliament, Canada
