Biography – Claire Lamb

Claire recently took a position in Duke Energy’s Major Projects Sourcing, Field Operations organizations and remains based out of the Crystal River Energy Complex. She began her career in Supply Chain Management in 1986 and has held positions in Inventory Management, Warehousing, Shipping and Receiving as well as Purchasing and Contract Administration. In her current role, Claire is responsible for supply chain procurement, inventory management and warehousing in support of the Crystal River Unit 3 SAFSTOR organization. She also continues to manage inventory for five of the Florida Fossil and CT generating stations and identifies opportunities for inventory optimization through the implementation / expansion of programs such as Vendor Managed Inventory and Point of Issue Material. Claire remains a valued member of the RAPID Steering Committee and is committed to increasing the exchange of operational experience between all supply chain organizations in our industry.

Biography – Mike Barnes

Mike Barnes is the Material Control Supervisor at Wolf Creek Nuclear Generating Station. He has 40 years of Supply Chain experience in Material Control, Inventory Management and Warehousing. Mike has been heavily involved with RAPID, the yearly conferences and multiple inter-utility initiatives and projects since the 1990’s.

Biography – Lew McKeague

Lew McKeague has been with AREVA Inc., based in Lynchburg, VA for 24 years. He began his career as a field **service** engineer performing valve diagnostic testing before moving into the Nuclear Parts Center (NPC) in 1998. Lew’s current position is Manager, NPC Business Operations & **Product Development** where he oversees the commercial aspects of their spare parts business. Prior to his time at AREVA, Lew worked for the DOD – US Navy in Washington D.C. Lew holds a B.S. in Mechanical Engineering from the Pennsylvania State University (1987) and M.S. in Engineering Management from Old Dominion University (1996).

Abstract – Warehouse Issues, Panel Questions and Answers

This benchmarking session will address warehouse challenges, issues and roadblocks all of our warehouses face on a daily basis. This is a panel discussion with no lengthy presentations planned as this open session is all about sharing in an open dialogue. Come prepared with challenges you face, any new goals or initiatives your company has, any best practices you would like to share or even performance indicators or metrics you feel drive improved performance in the warehouse.
