Resilience Matters

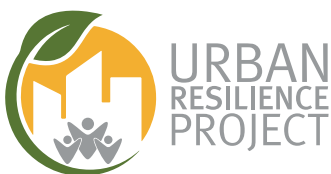

Special CREWS Edition

**Visit islandpress.org/CREWS
to download your free copy!**

In the years since Island Press launched the Urban Resilience Project, the need for information on how to build resilient, equitable cities has only become more urgent. The latest UN climate reports show that we have precious little time to avert the worst impacts of climate change, even as our communities must adapt to rising seas, monster storms, and more.

Island Press and its diverse community of authors have much to contribute to this effort. Our work takes on the defining challenges of our time: climate resilience and social equity. We spotlight solutions and tell the stories of people on the front lines of the climate crisis.

As an exclusive resource for CREWS Partners and Allies, we have collected our stories and solutions dealing with water systems in a free e-book that can be downloaded at islandpress.org/CREWS

Island Press Urban Resilience Project

The Urban Resilience Project (URP) at Island Press spotlights cities and communities that are forging a greener, fairer future in the era of climate change. We do this via books, articles, op-eds, webinars, podcasts, educational coursework, and more.

Interested in learning more? Email resilience@islandpress.org to share your story idea, get involved, or to connect with our thought leaders and authors.
