

Aims

Reflect on 1995 Maori HIV/AIDS Hui

Review progress against 5 targets

Hui Whai Māramatanga, Whai Oranga: Maori and HIV/AIDS
21 – 25 March 1995, Papakura Marae, Auckland

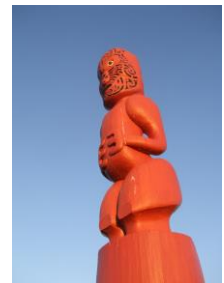

Hui Whai Māramatanga, Whai Oranga: Maori and HIV/AIDS

‘Accurate information’

‘the key is education, not just for the young, but for the whole community’

‘homophobia is a key issue’

‘Our elders...did not condemn people for their sexual behaviour or sexual persuasion’

Targets

Prevent HIV epidemic among Maori

Improve information

Prevention for whole communities

Reduce stigma & discrimination

Utilise Maori language & culture

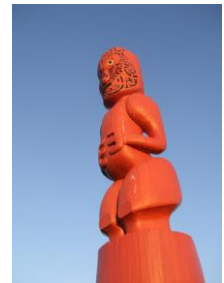

Successes

Efforts to prevent an epidemic

Information - diagnoses by ethnicity since 1996

Health promotion well received

National and international networks

Hui Takataapui 2014 – Te Papa o Rotu Marae, Whatawhata, Hamilton

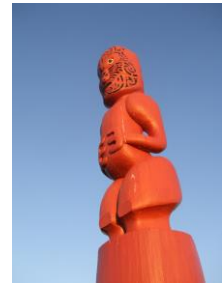

Challenges

- Research and evaluation
- Stigma and discrimination
- Resources
- Sexuality education and 'whole of community'

Priorities

- Research and evaluation
- New knowledge and collaborations
- Step up reducing HIV stigma and discrimination
- Focus on 'at risk' groups AND maintain vigilance

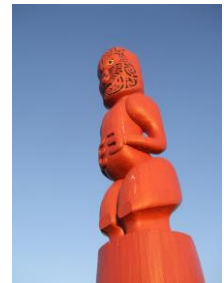

Looking ahead...

- He Kai Ata Rau: Reducing HIV-related Stigma in Maori Communities Conference, University of Waikato, 5-6 July, 2016
- Book launch 'Takataapui'
- Hui Takataapui , Gisborne, November 2016

Conclusion

- 1995 Hui landmark
- Made good progress
- Research and evaluation
- Collaborations
- Targets for 2025
