The Australasian Society for Infectious Diseases is holding a two-day meeting on the Gold Coast to bring together clinicians, microbiologists, pharmacists, infection control nurses and researchers from Asia, Australia and New Zealand to provide a state of the art update on the issues of Gram Negative 'SUPERBUGS'. International and local speakers will review novel therapeutic approaches, the importance of the microbiology laboratory, dosing optimisation and the use of combination therapy and innovative approaches to infection control.

TOPICS INCLUDE:

- ▶ Epidemiology of carbapenem and colistin resistance in Asia-Pacific
- ▶ Optimising the Antibiotic Armamentarium
- ▶ New drugs and innovative combinations
- ▶ Microbiology Laboratory – Rapid identification and resistance testing
- ▶ Successful and novel infection control approaches
