

Joe Foster, P.G.

Joe Foster is a geologist and principal for Enercon Services, Inc. in Oklahoma City. His professional background includes subsurface interpretation, environmental remediation, and project management. Recent successful remediation projects include leaking underground storage tanks, commercial and industrial real estate, oilfield sites, and energy-related facilities. Mr. Foster managed remediation for construction of the Oklahoma City Downtown Arena, MAPS I and II projects, the Oklahoma River redevelopment, I-40 realignment, and numerous OCC-regulated leaking underground storage tank cases.
