W: www.locateconference.com

The premier Australasian spatial industry conference, **Locate14** has released the conference program, highlighting the focus on the diversity within the industry and its impact on society.

Locate14 will be held at the National Convention Centre in Canberra from 7-9 April 2014.

Location information is a fundamental part of our daily lives and is inextricably linked to the digital economy. Advances in mobile and cloud-based technologies are enabling location independence by connecting the digital world to physical location; connecting people to services regardless of where they are located. Changes to how government delivers services and industry does business will be especially significant in healthcare, insurance, agriculture and transport.

Locating the Digital Economy Key Stream Speakers:

- Steve Jacoby, Executive Director, Land & Spatial Information - [Queensland Department of Natural Resources & Mines](#)
- Denise McKenzie, Executive Director Communications and Outreach for [Open Geospatial Consortium](#) (OGC) U.K.
- Pia Waugh, Director of Gov 2.0, [Department of Finance](#)

The complete Locate14 Conference program is available online www.locateconference.com.

Locate14 Conference and Exhibition combines three previous national events – the *spatial@gov* Conference, the Surveying & Spatial Sciences Conference (SSSC) and the Asia- Pacific Spatial Excellence Awards (APSEA) combining to form a single premier Australian and New Zealand industry event.
