

Professional development investment for staff attendance at the 2019 Higher Education Finance Conference

Finance professionals in higher education are increasingly under pressure to find innovative ways to meet budgets, diversify income streams and cut costs. Add to this, the rapid pace of technological change impacting on their strategic decisions and a vastly different education landscape just over the horizon, the importance of keeping informed and inspired could not be greater. The theme chosen replicates [the ATEM promise:](#)

Anticipated skills development

- Reporting, dashboards and data analytics
- Greater understanding of the higher education funding environment
- Insight into how other institutions are working to build capacity, efficiencies and financial resilience
- Practical demonstrations of tools to address cybersecurity, expenditure submissions, reporting and working with dashboards
- Change management
- Masterclass: *Getting on well with others* - How to build good interpersonal relationships for greater collaboration, effective teams and greater happiness at work.
