

Mike Christianson

General Manager

The Park Company, Inc.

509-547-9929

msc@theparkcompany.com

For the last 25 years, Mike has been General Manager of The Park Company, Inc., a wholly owned subsidiary of Park Corporation with headquarters in Cleveland Ohio. Since 1990, The Park Company has been engaged in buying and supplying Surplus and Obsolete Power Plant Equipment to the power industry including Safety Related, ASME Section III and Commercial Grade valves, pumps, motors transformers, instruments & controls and other equipment at their 100,000 sq. ft. facility in Pasco Washington. Sources of inventory include buying all inventories from canceled nuclear plants WNP-3, 4 & 5 in Washington State, the BWR-5 Reactor building at Zimmer Station in Ohio, large blocks of warehoused inventories from prematurely shuttered plants Trojan, Maine Yankee, San Onofre, Crystal River 3, Zion and Vermont Yankee plus inventories from TVA cancelled nuclear plants and excess inventory from Duke, Progress Energy, FPL, Entergy and other operating companies. Prior to being employed by Park, Mike was a top 10 nationwide producing sales agent for American Income Life Insurance Company, a board member and president of a small credit union for 13 years, an active food bank volunteer for 10+ years and employed 20 years as a millwright at a large manufacturing plant. He presently lives in Kennewick Washington.

Ryan Fitz-Patrick

Director, GENCO Strategic Sourcing Services and Materials

Exelon Corporation

410-979-5231

Ryan.Fitz-Patrick@constellation.com

Ryan is responsible for the strategic procurement of materials and services that support Exelon's nuclear and fossil generating plants. Ryan has been in Genco strategic procurement for Exelon since 2012. Prior to coming to Exelon, Ryan spent two years as Director of Strategic Sourcing for Constellation Energy Company's fossil fleet. Before that, he spent 13 years in commodities trading operations for Constellation Energy eventually becoming Vice President overseeing Exchange, Natural Gas and Fuels operations. Ryan received his BA degree in Economics from University of Maryland Baltimore County and his Master's in Business Administration from the Johns Hopkins Carey Business School.

Lew McKeague

Manager, NPC Business Operations

AREVA

434.832.3506

lew.mckeague@areva.com

Lew McKeague has been with AREVA Inc., based in Lynchburg, VA for 25 years. He began his career as a field **service** engineer performing valve diagnostic testing before moving into the Nuclear Parts Center (NPC) in 1998. Lew's current position is Manager, NPC Business Operations & **Product Development** where he oversees the commercial aspects of their spare parts business. Prior to his time at AREVA, Lew worked for the DOD – US Navy in Washington D.C. Lew holds a B.S. in Mechanical Engineering from the Pennsylvania State University (1987) and M.S. in Engineering Management from Old Dominion University (1996).

Dave Mueller

VP, Strategic Programs

ATC Nuclear

865.218.8271

dmueller@argoturbo.com

David Mueller has 35 years in the Power Industry. Starting out in nuclear plant construction while with Sargent & Lundy Engineers, Dave worked on the Marble Hill, Zimmer, Byron, Braidwood, LaSalle and Clinton stations. In 1989, Dave transitioned to the Supply world which included 19 years at Exelon in which he served as Site Supply Manager at Braidwood station, where he helped complete two 15 day refuel outages, Inventory Manager where he was instrumental in the development of the contingent reservation process and as Corporate Supply Operations Manager, where he provided governance and oversight to the Exelon nuclear supply organizations, specifically in the area of refuel outage efficiency and equipment reliability. Currently David is Vice President, Strategic Programs, at ATC Nuclear. Dave is responsible for continuing the same focus on improving Supply's role and image in the industry as well as implementing the ATC NIMS program. NIMS is a unique offering to the Nuclear Industry where ATC is the first to offer an independent, safety-related MRO program and the only company to offer commercial grade dedication, sourcing, warehousing, reverse engineering, and qualification all under one roof.
