

## **John Harrington Biography**

Currently serving as the Director of the Water Resources at the Association of Central Oklahoma (ACOG), John Harrington has over thirty years experience as a hydrogeologist and geophysicist in central Oklahoma, with twenty-two years working specifically on the Garber-Wellington aquifer. He is a registered professional geologist and received his B.S. in geology at the University of California, Davis, and a M.S. in geology at San Diego State University. John is also a certified floodplain manager. His professional interests include mathematical modeling of all sorts, including groundwater modeling and nonpoint source models. He is also an avid amateur photographer and likes to take pictures of water.
