STRESS TESTING

“ You must learn to let go. Release the stress. You were never in control anyway. ”

— Steve Maraboli
Life, the Truth and Being Free

— VISION 2016 —

TAKE CONTROL

A ROADMAP FOR **GROWTH**

#vision2016

Primary approaches for stressed loss estimation

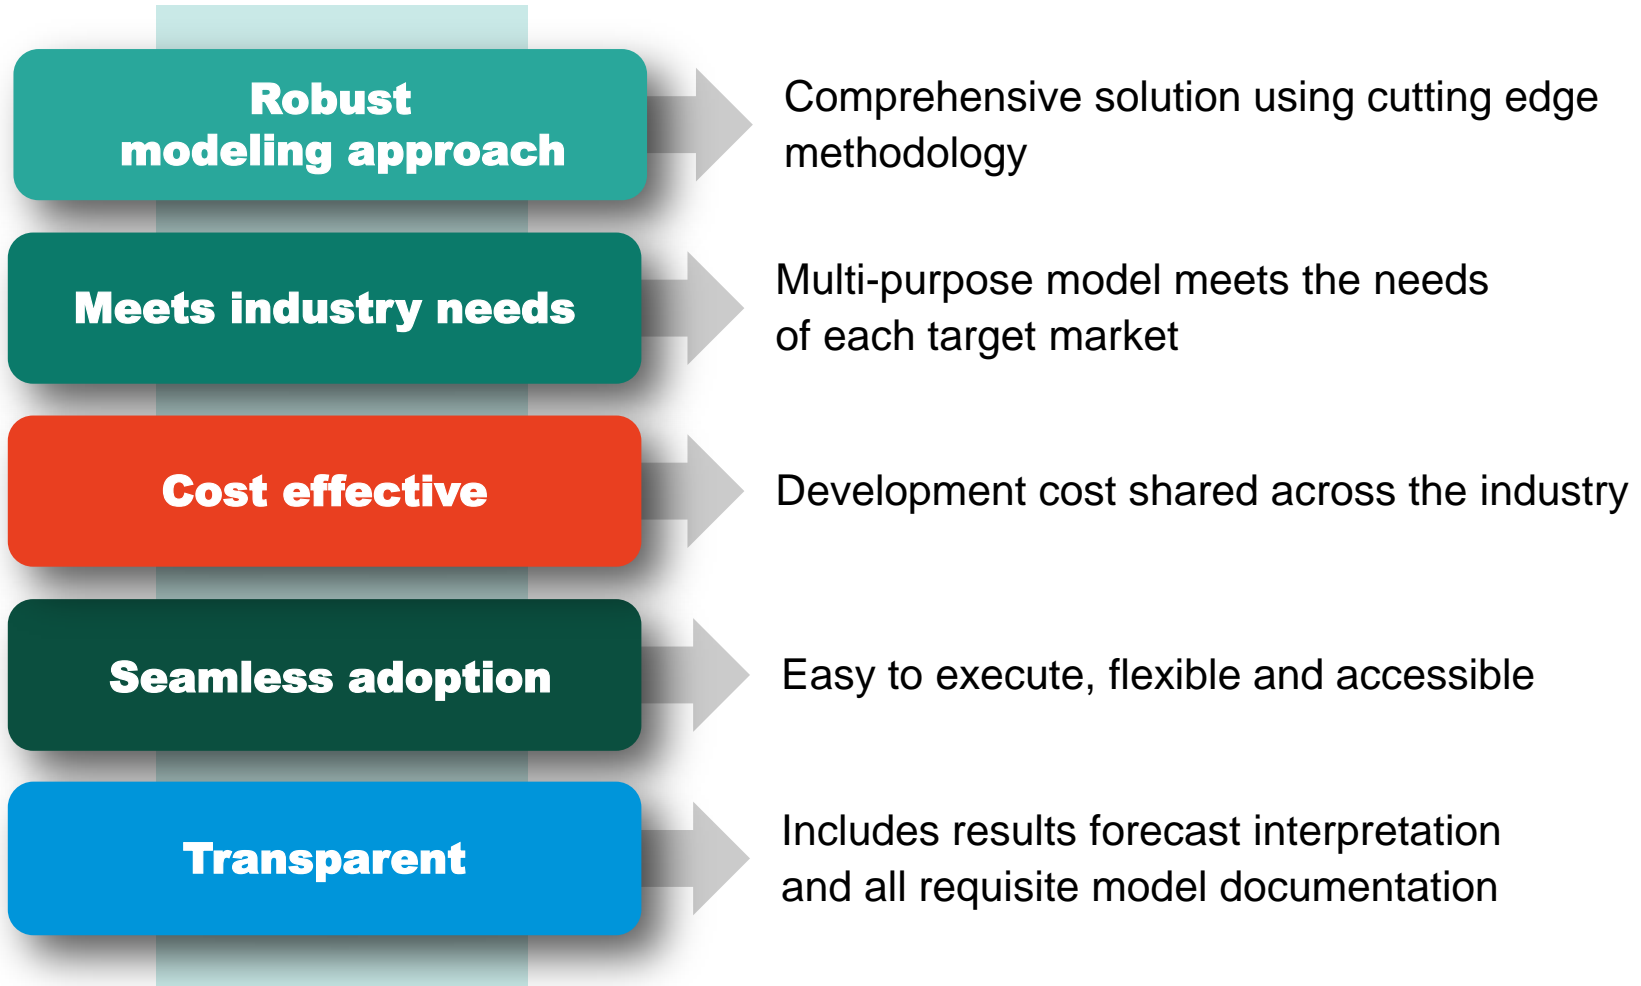

- Many alternative approaches but two basic types
 - ▶ **Top-down** approach using portfolio aggregates with macro time series
 - ▶ **Bottom-up** approach using loan level models incorporating macro and more local economic data
- Pooled models are generally inflexible to dynamic portfolios and CCAR mandates
- **Bottom-up** approach, loan-level models, have gained more favor in recent years – Experian has developed a unique conditional probabilities framework for CCAR / DFAST

Loss forecasting

Objectives in model design

Loss forecasting

Development approach

Advanced approach to model development proven through numerous custom engagements and regulator review

- **Bottom up approach** with loan level models incorporating macro/ local economic data
- Pooling of accounts and aggregation to **pool-level predictions**

Markov-chain
Transition state matrix in a competing risk framework

- Components of loss include:**
- **PD** – Probability of default
 - **EAD** – Exposure at default
 - **LGD** – Loss given default

Model development

Base competing risk framework

	0-29	30-89	90-179	DEFAULT	CLOSED
0-29	$1 - \sum P_{1N}$	P_{12}	P_{13}	P_{14}	P_{15}
30-89	P_{21}	$1 - \sum P_{2N}$	P_{23}	P_{24}	P_{25}
90-179	P_{31}	P_{32}	$1 - \sum P_{3N}$	P_{34}	P_{35}
DEFAULT	0	0	0	1	0
CLOSED	0	0	0	0	1

Data sources

Turnkey solution hosts all required data

Data sources

Account level data

- Experian credit data
- Loan level attributes

Consumer level data

- Origination and current VantageScore[®] credit scores

Property level data

- Valuations (AVMs and HPI)
- Housing related characteristics

Economic data

- US, state and MSA stressed variables

Effortless file submission

- Client input file will align with the file formatting provided with the **FR Y-14M** file submission

U.S. Unemployment Rate

Loss forecasting

Model options

Loss forecasting models

Mortgage

First mortgage ARM
Fixed home equity loan
Home equity line of credit (HELOC)

Bankcard

No pre-set spending limit
Private label
General use

Automotive

Auto loan
Auto lease

Loss forecasts across a series of scenarios

Baseline

Adverse

Severely adverse

Loss forecasting

Customized for lender-specific solutions

Re-estimation of all model components for a tailored forecast

- Re-estimation of **Probability of Default (PD) model coefficients**¹ to accommodate a client's geographic footprint
- Ability to adjust **Exposure at Default (EAD) estimates** for all products using parameters for various cost components
- Ability to adjust **Loss Given Default (LGD) estimates** based on collateral valuation parameters or historical recovery rate

Based on consultation with client and evidentiary data of the peak stress during the financial crisis

¹Experian can provide additional services to customize the PD model.

Experian forecast results

National results

CCAR / DFAST 2016 bankcard loss forecast

Data from Experian credit file

- Month-end December 2015
- Five percent random sample
- Bankcard accounts only – revolving

Observation exclusion

- Deceased
- Charge off / bankrupt
- Closed with \$0 balance

CCAR / DFAST 2016 bankcard loss forecast

Results

- National
- Sample of CCAR banks
- Non-CCAR issuers

Three scenarios

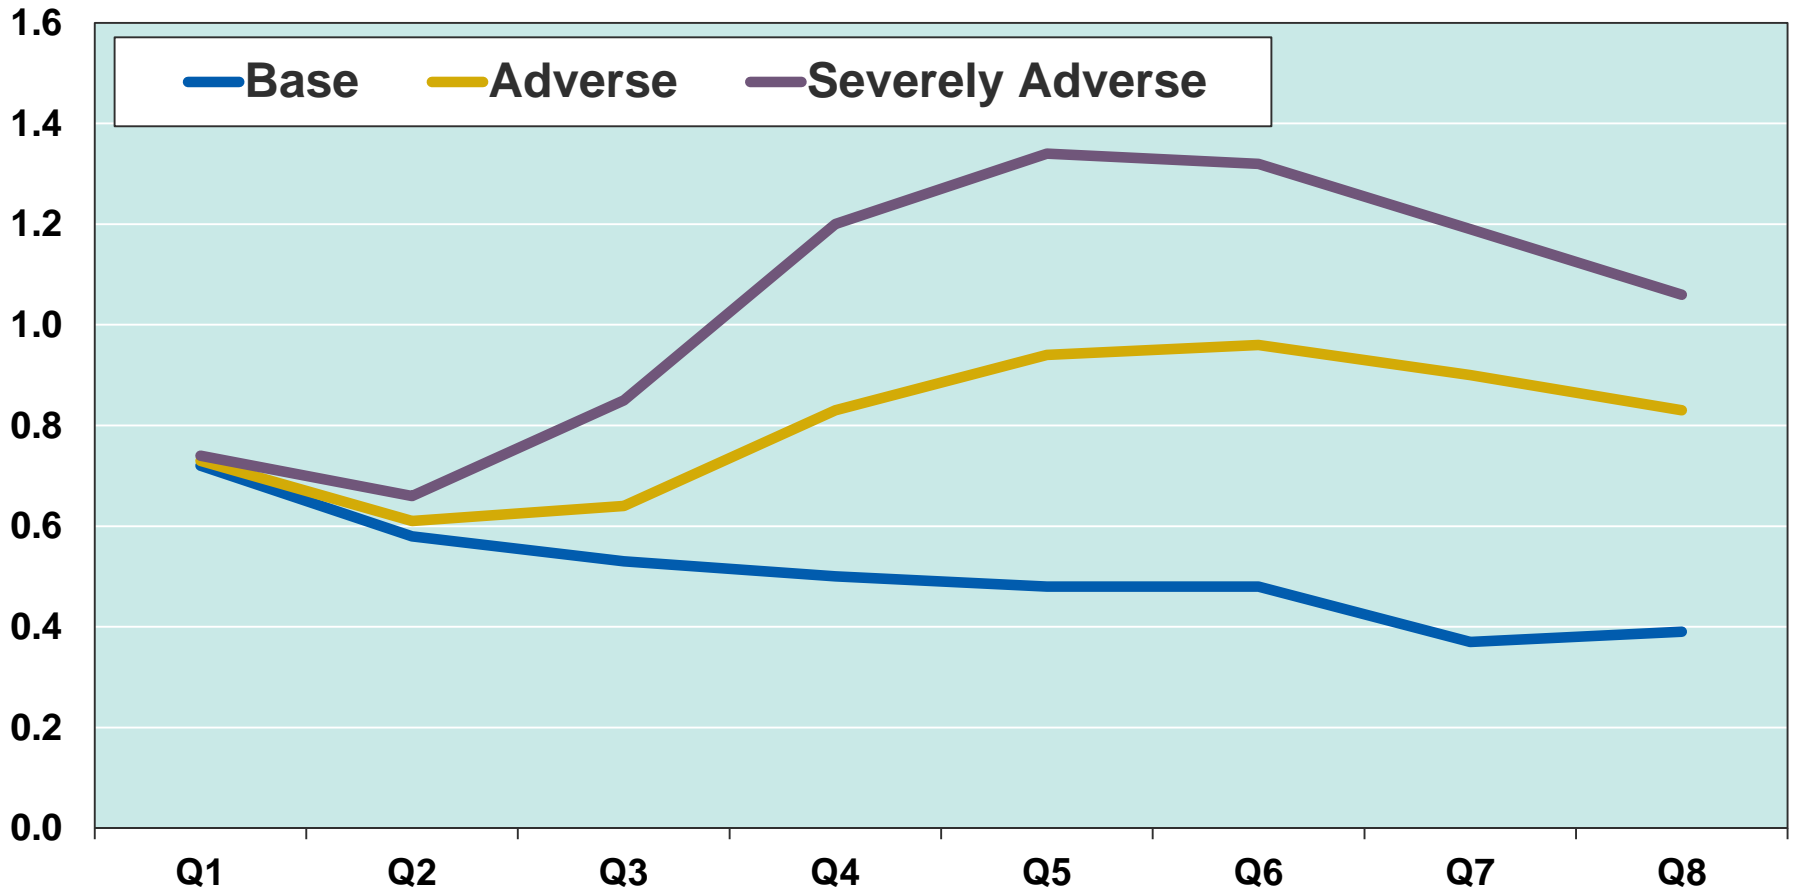

No assumption for new acquisitions

Metrics (unconditional)

- PD
- Closed
- Loss

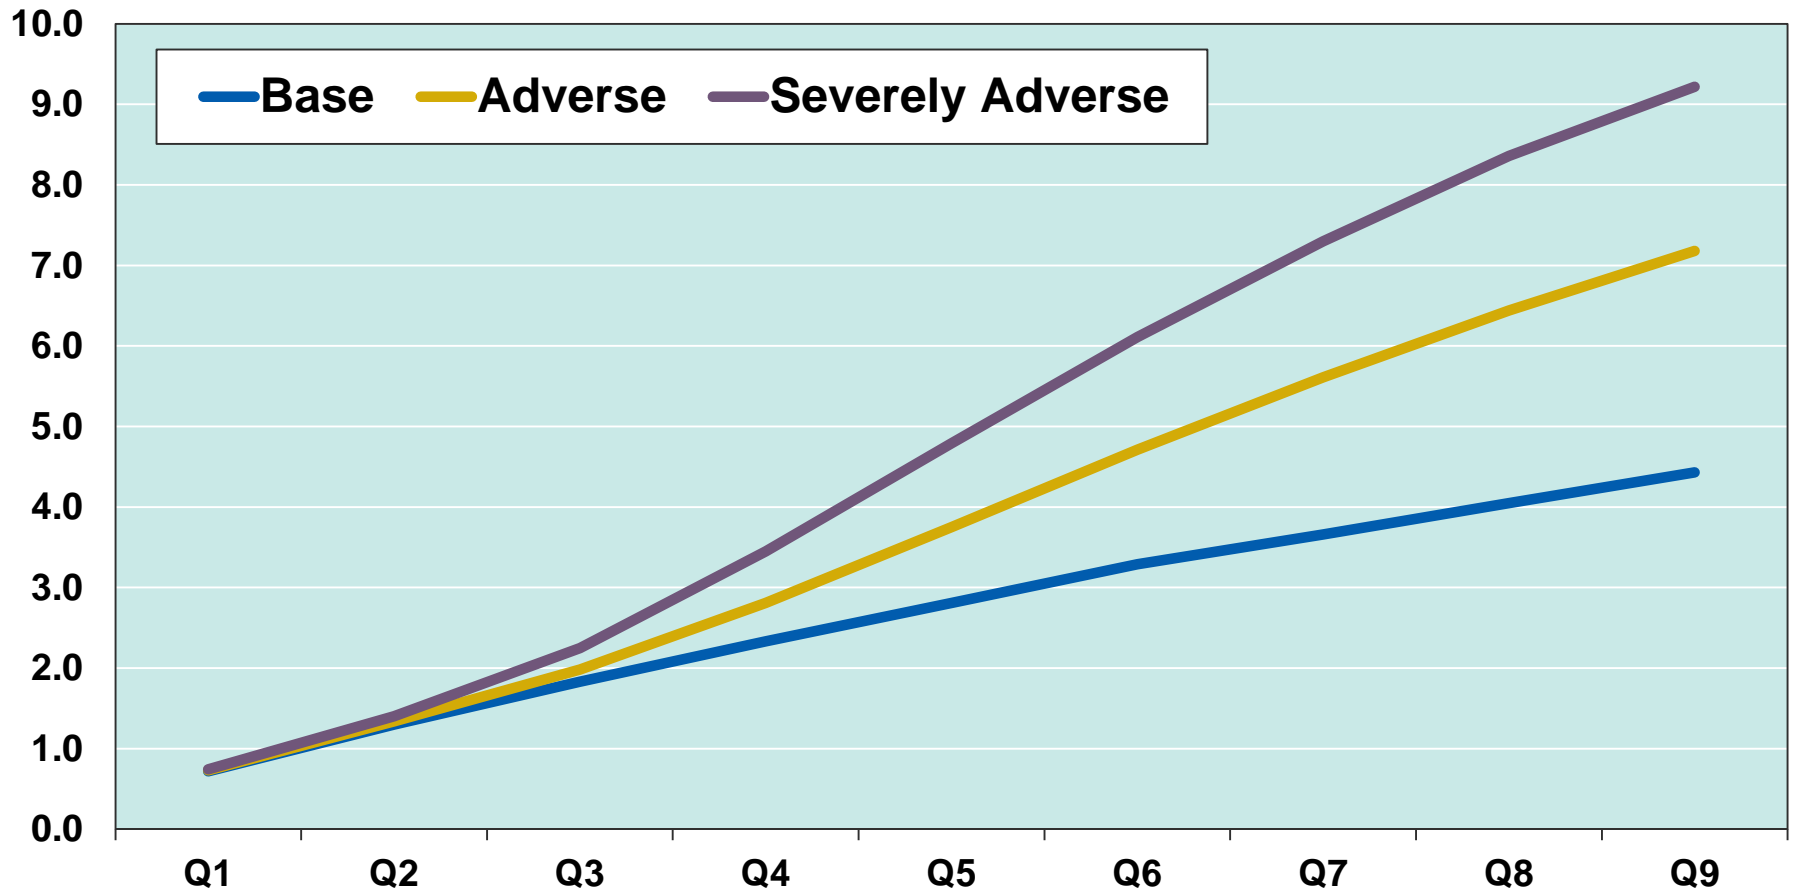

National quarterly PD

National cumulative PD

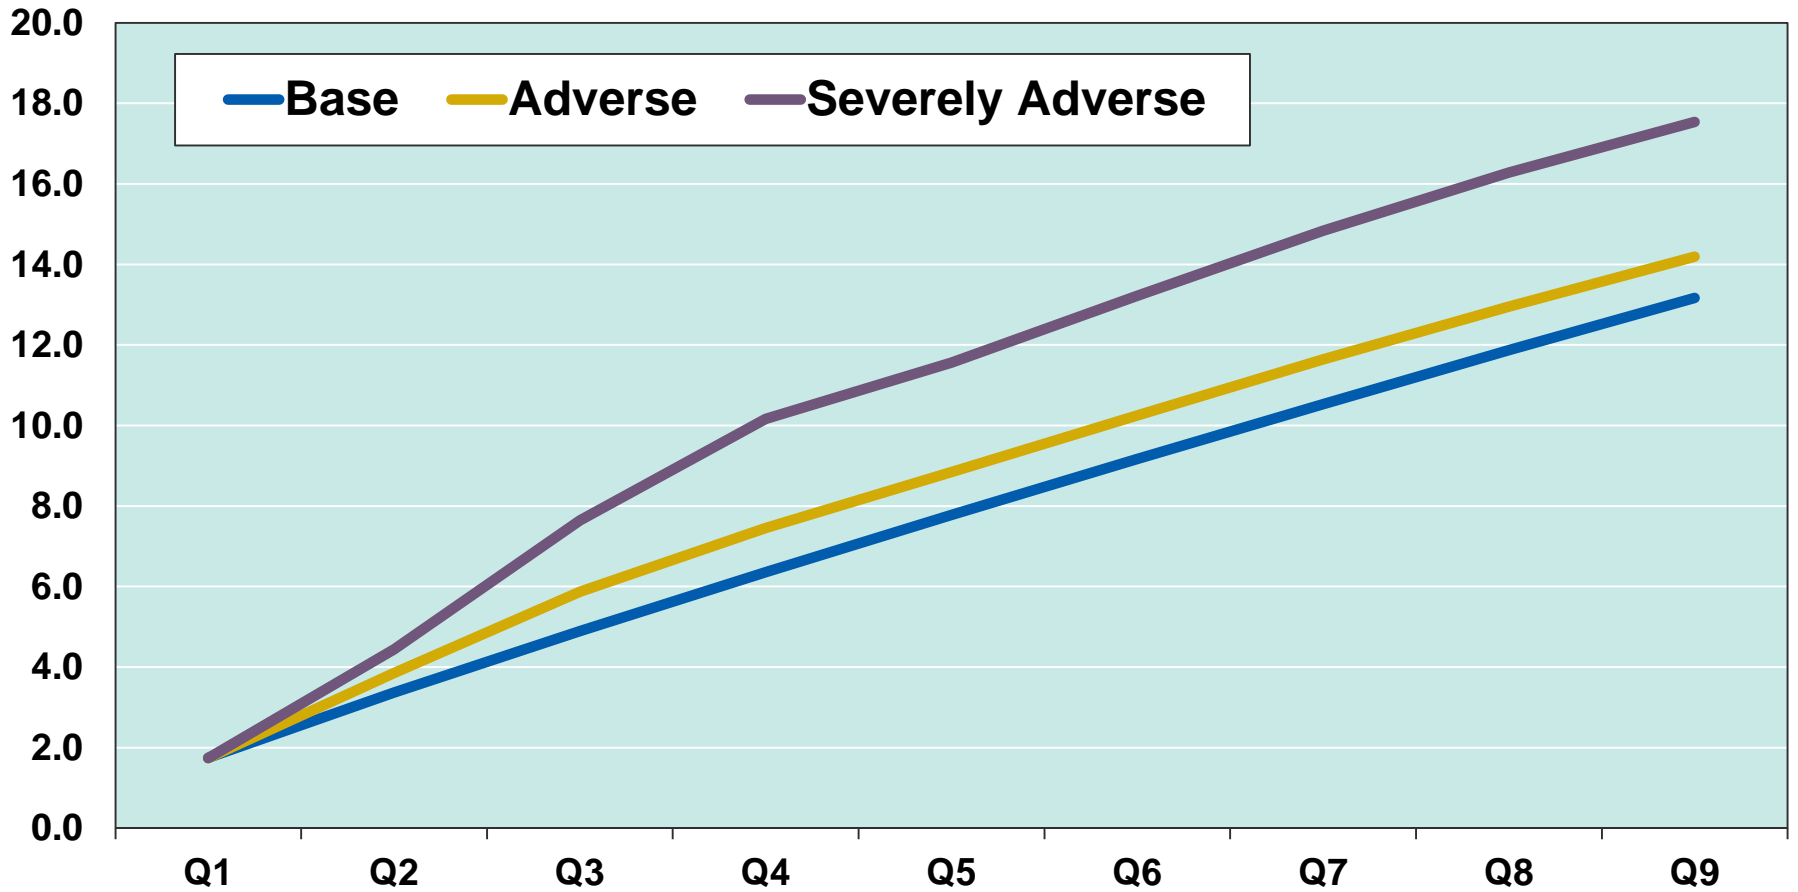

National quarterly closed rate

National cumulative closed rate

Experian forecast results

Issuer results

Issuer quarterly PD normalized to Q1

Base

Adverse

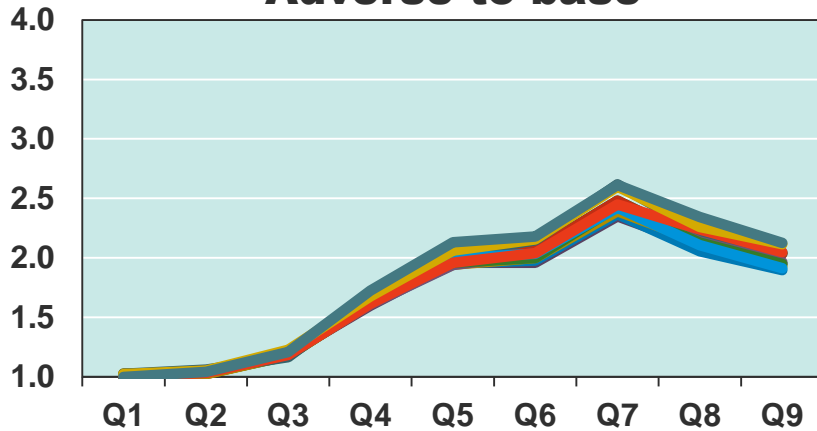

Severe

Sensitivity of PD by scenario to base

Adverse to base

Severely adverse to base

- Ratio of adverse, severely adverse to base by issuer
- Significant variation by issuer
 - ▶ Range of 2.3 to 2.6 for adverse
 - ▶ Range of 3 to 3.5 for severely adverse
- Ratio a function of portfolio characteristics
 - ▶ Not geography
 - ▶ Not cumulative PD

Sensitivity of loss \$ by scenario to base

Adverse to base

Severely adverse to base

- Ratio of adverse, severely adverse to base by issuer
- Slight change compared to PD
 - ▶ Range of 2.3 to 2.6 for adverse
 - ▶ Increase in range of 3.1 to 3.5 for severely adverse
 - ▶ Greater overlap
- Change in order
 - ▶ Impact of account management

Sensitivity of cumulative PD by scenario to base

Adverse to base

Severely adverse to base

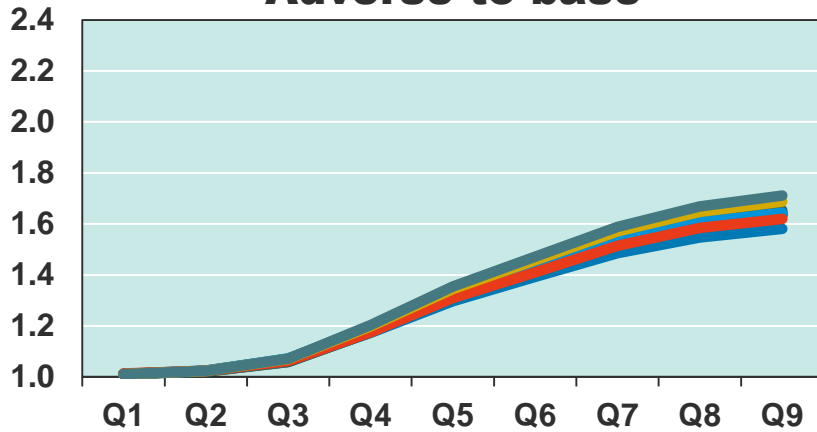

- Ratio of adverse, severely adverse to base by issuer
- Cumulative mutes variation
- Meaningful variation by issuer
 - ▶ Range of 1.5 to 1.7 for adverse
 - ▶ Range of 2.0 to 2.3 for severely adverse
- Ratio a function of portfolio characteristics
 - ▶ Not geography
 - ▶ Not magnitude of cumulative PD

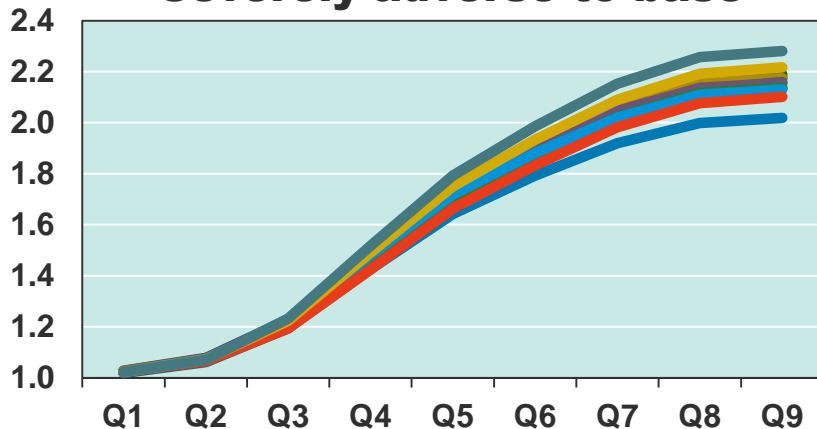

Sensitivity of loss \$ by scenario to base

Adverse to base

- Ratio of adverse, severely adverse to base by issuer
- Change in distribution compared to PD
- Reordering
- Range similar

Severely adverse to base

Share your thoughts about Vision 2016!

Please take the time now to give us your feedback about this session. You can complete the survey in the mobile app or request a paper survey.

1 Select the Survey button and complete

2 Select the breakout session you attended

Vision Conference
Breakout Session Survey

Experian

1. How would you rate the presenters' knowledge?
 Excellent Above average Average Below average Poor

2. How would you rate the presenters' delivery?
 Excellent Above average Average Below average Poor

3. How would you rate the presenters' time management?
 Excellent Above average Average Below average Poor

4. How useful was the session information?
 Very useful Somewhat useful Neutral
 Somewhat not useful Not useful

5. How would you rate the session on being current?
 Very current Somewhat current Neutral
 Somewhat not current Not current

6. How relevant was the session content to the title and description?
 Very relevant Somewhat relevant Neutral
 Somewhat not relevant Not relevant

7. How would you rate the level of content?
 Too advanced Just right Too basic

8. Why did you attend this session? (Check all that apply)
 Relates to my business The presenter(s) Interest in new product
 Compelling session description Increase product knowledge

9. Do you have any additional comments?
