

POSTER #21 - Reawakening the Connection : Technology, Boomerang Life & Person-Centred Care

Coreena Robertson

Fraserview Care Lodge, Richmond, BC, Canada.

DESCRIPTION:

With the touch of a button and better tools we can open up the world to our seniors facing memory challenges, reawakening them to what they have lived, cherished and loved. There is a need to increase quality and supportive psychosocial programming for those with memory challenges within the range of existing resources. When a client is engaged in quality and person-centered activities, this can have a positive and residual effect on mitigating challenging behaviours. Using quality tools specifically developed for those in care homes and technology we are increasing both the quality and the quantity of visits with our seniors. Specifically created digital and hand held content - 'Boomerang Life' is reducing responsive behaviours and isolation by stimulating mind activity and providing an emotional connection with a person-centered approach.
